The nominations do not appear to create much enthusiasm. A ratification meeting will be held some time next week, time not stated.

The New York Money Market. JULY 9.—The gold market has been without the elighter variation from 140% to day—an event without preceden in its history in this country since the suspension of speci payments. There was only a moderate volume of bus

shares of the stock of the Fort Wayne Company bought for each, which he duly paid for and then asked them to accommodate him by exchanging the certificates for fifty shares into ten certificates for five shares each, which request they compiled with. The result of this has thus far been seen in the presentation at the fransfer office of three of these certificates aftered to a hundred shares each. The numbers of the other seven certificates are advertised, and the public is cautioned against receiving them. The broker, belonging to the open board, who sold the forged certificates is said to have disappeared, one report being that he has since died; but there is no evidence of a conclusive character that he had a guilty knowledge of the transaction. A similar trick to obtain certificates for small amounts of another stock was practised upon another house; but no clue to the antecedents of the forger has yet been obtained. The speculative feeling on the Stock Exchange is very bullish, and a further general advance in prices is probable. The earnings of the railways are large and the crop prospects highly encouraging. Government securities were nominally steady but dull on the first call at the closing prices of last evening. After it became known that Mr. Beymour was the democratic nomines for the Presidency prices improved elightly for the five-twenties of left, and the tone of the market for all the issues became stronger under purchases by some of the leading dealers, who had bought at the reduced prices of Tuesday and Wednesday, and were, therefore, desirous of promotins a further advance on which to cell. The recovery since yesterday morning has, however, been so rapid, especially in the bonds of 1867, which at one time touched 107%, whereas they cold at 109% this afternoon, that a relapse is probable, the outside demand having been checked by the recent proceedings in Congress and the Convention.

The gold market was dull throughout the dhy at 140%. The harkers and large dealers are not buyers at the quotat the Mississippi at Rock Island.

They were big, strapping fellows, and smaller chaps always avoided them for the wantonness with which they imposed on those too weak to defend themselves. Thirty or thirty-five vears ago the canal which now serves Washington City as a sewer was not the mud-hole it has become of late years. It was a favorite bathing place for boys, particularly the smaller ones, who did not venture to go to the river. On one of these occasions, when Frank and one or two other of the Blairs were present, a little fellow in advance of the others picked up a shirt from the pile of clothing and began to shirt from the pile of clothing and began to dress. By this time all except the Blairs had dressed themselves, and the plie of unclaimed clothes was reduced to those belonging to them, and the lad selected as a victim.
