Seymour, the cold-blooded, seeks the favor of the Northern wing of the party, and the people of England, hitherto untroubled by these tiny cannibals, should be complaining of a like visitation. The coincidence is ex traordinary, and proves the existence of some great cause-great enough to produce a simultaneous result in two distant hemispheres. Precisely what this is, it is difficult to determine. The wet weather of last winter, world wide as it was, may have had something to do with it. The insects may have been stirred up by the unusual succession of earthquakes, volcanoes and hurricanes last spring. Perhaps the Gulf Stream has changed its course—that is the popular explanation ust now, for all phenomena; or the blame may be at the door of the Democratic Convention, assembled just before the appearance of the insects. This Company, National in its character, offers by reason of its Large Capital, Low Rates of Pre-'mium and New Tables, the most desirable means of insuring life yet presented to the public. The rates of premium, being largely reduced, are made as favorable to the Insurers as those of the best Mutual Companies, and avoid all the omplications and uncertainties of Notes. Dividends and the misunderstandings which the latter are apt to cause the Policy-Holder. Several new and attractive tables are now pre-sented, which need only to be understood to prove acceptable to the public, such as the IN-COME-PRODUCING POLICY and RETURN PREMIUM POLICY. In the former, the policyholder not only secures a life insurance, payable at death, but will receive, if living, after a period of a few years, an annual income equal to ten per cent. (10 per cent.) of the par of his policy. In the sured the total amount of money he has paid in, in addition to the amount of his policy. The attention of persons contemplating insuring their lives or increasing the amount of insurance they already have, is called to the special advantages offered by the National Life Insurance Circulars, pamphlets and full particulars given on application to the Branch Office of the Com-

Ang. 6.—The gold market has been strong and excited to day, and the fluctuations were from 148½ to 150 with the closing transactions prior to the adjournment of the board at 148½. The decline in the afternoon was owing to sales by some of the leading buils to realize profits, and the suddenness with which the price yielded caused them to turn from sellers to buyers to prevent a heavy break. The fact is that gold has been run up entirely too fast of late, even supposing that speculation will ultimately carry it bigher, and a violent reaction in it is inevitable. The mercantile community are asking why Mr. McCulloch does not sell gold, especially now that it is known that
