This child of Queen Olga of Greece received on the day of his birth (August 2) the names of Constantine Henry Demosthenes. The belis were rung and cannon fired. The vast square before the royal palace was densely filled with an enthusiastic populace, and shouts of "Long live Coastantine" were frequently uttered. The King appeared on the balcony with the Grand Duchess Alexandra of Russia, mother to the Queen, her two sons, Grand Dukes Alexis and Nicholas, and all the officers of the court and highest officials of State. A syrup compounded with this new salt has been introduced by Dr. Churchill, for the treatment of pulmonary phthinis. Recent trials made at the Bromoton Consumption Hospital, an institution especially devoted to the treatment of diseases of the check, have abundantly do monstrated the absolute necessity of obtaining this new therapt utic agent in the most perfectly pure and natural condition. Each table spoonful of syrup contains four grains of perfectly pure hypophosphite of Hime; and as compounded by MM Grimault & Co., of Paris, the syrup is the only preparation which guarantees to the medical profession all the properties required in this valuable medicine.
