CITY NOTIOES. THE TEST OF TIME.—It is high prelies to be able to say truthfully of any mechanical invention that it has stood and continues to stand the test of time. The Grover and Baser Sewing Machines (the Philadelphia agency for which is located at 780 Ohest-nut street) have done a better thing. They have not merely stood the test of time, but have stood the test of competition with all the world as well, and not only preserved their original popularity, but greatly enhanced it. This is mainly due to the fact that tho proprietors have steadily continued to add to the per-fection of their instruments, until now it is not over-cetimating the fact to say that the Grover and Baker Sewing Machines combine in themselves all the excel-lencies that pertain to any and all the other sewing machines extant. Of course they are the best to buy. THE STUDY OF FRENCH.—The French language UNDER THE DIRECTION WILL OPEN ON "LET US HAVE PEACE." THE STUDY OF FRENCH.—The French language has become a necessity in the education of every American. Yet there are but few French instructors who really and thoroughly understand the art of imparting a practical knowledge of the language to students. Conspicnous among these few, however, is Professor Arthur De La Cour, by whose new and ingenious system students can speedily acquire not only the practical application, but the easy elegance of pronunciation so essential in speaking Frenck.
