One of that painter's most clamor-ous demands was that very appointment of a professor, which is giving such lively hopes to the School this autumn. "The Acad-erny," Neagle used to say, "would have greatly advanced true art if one or two able artists had been engaged, at liberal salaries, to give instruction to students. Such a course would have made our city the home of the arts, and pupils would have become an acad-inter from all parts of the country. Thus our institution would have become an acadof the arts, and pupils would have come hither from all parts of the country. Thus our institution would have become an acad-emy indeed, instead of a place of deposit simply." Neagle's warning has now been accepted as the vivifying oracle of the School, and a professor he would gladly have wel-"That is to be your bellows-blower." JOHN NEAGLE. JOHN NEAGLE. Our last notice was devoted to the painter Allston, whose tremendous conception of Death Reviving hangs in the inorth gallery; accident having placed it directly over that Hissus of Phidias which was in some sort its prototype. A testimonial which we might have added to our own in regard to this fine conception is that of the accomplished author of "Zenobia" and "Aurelian." We have un-der our eye some posthumous lectures left by Mr. Ware, and published with such scrupulous fidelity that the collection ends with an un-finished phrase, just where the pen dropped from the failing hand. The Dead Man Re-viving, Observes this conscientious critice Pat Lyon stands in the picture, a hale man from the failing hand. The Dead Man Re-viving, observes this conscientious critic, "appears to be an absolutely perfect expres-sion of human form under the conditions in-sion of human form under the conditions in-subject is exhausted and its demands satis-fied." And we believe that even if Ware had lived to review his Lectures, he would hardly have modified these deserved commendations. Art, however, cannot forever maintain itself on the heights, and we are not very sorry that our charming little Musée has not been quite given over to that epic severity which, in the "good old colony times when George the Third was king," formed at once the minto iron. Altogether, it is a careful, the minto iron. The Company have ample means of which the Govern-ment grants the right of way, and all necessary timber and other materials found along the line of its operations; also 12,800 stress of land to the mild, taken in alternate sections on each side of the road; also United States Thirty-year; Bonds, 'amounting to from SiG,000 to \$\$,000 per mile, according to the difficulties to be summunited on the various sections to be built, tor, which it takes a second mortisgie assecurity,' and it is expected that not only the interset, but the principal amount may be paid in acryices, readered, by the Company in transporting troops, mails, acc. THE EARNINGS OF THE UNION PACIFIC BAIL BOAD, from its Way or Local Basiness only, during the year ending June 80th, 1868, amounted to over

Four Million Dollars, which, after paying all expenses, was much more than enflicient to pay the interest upon its Bonds. These carn-ings as a no indication of the vast through traffic that must follow the opening of the line to the Pacific, but they cor-tainly prove that

FIRST MORTGAGE BONDS upon such a property, costing nearly three times their Are Entirely Secure.

The Union Pacific Bonds run thirty years, are for \$1,000 The union Facine monor fun thirty years, are for \$1,000 each, and have coupons attached. They bear annual in-terest, payable on the first days of January and July at the Company's office in the city of New York, at the rate of hix per cent, in gold. The principal is payable in gold at maturity. The price is 102, and at the present rate of gold, they pay a liberal income on their cost. A very important consideration in determining the value of these bonds is the tenoth of time they have to run. It is well known that a long bond always commands a uch higher price than a short one. It is safe to assume at during the next thirty years the rate of interest in United States will decline as it has done in Europe, and we have a right to expect that such six per cent so-curities as there will be held at as high a premium as there of this Government, which, in 1837, were bought in at from 20 to 33 per cent above par. The expert Gemaud
