OITY NOTICES

THE MOST USEFUL MAN .-- While New York is THE MOST USEFUL MAN.—While New York is running after its "wickedest men," Philadelphia is turning after its "wickedest men," Philadelphia is turning its attention towards its most u eful men. By common consent Mesers. E. G. Whitman & Co., No. 318 Che tunt street, below Fourth, stand among the foremost of this honor ble fraternity. They are worthy of the distinction, because they please the palato, non-lish the system, and care for the healths of all comers. Their confections stand A 1 among delicions and wholesome dainties, and doubters have only to rry their roasted Jordan Almonds, cr. am fruits, chocolate and gum preparations, caramels, fine bon bons, &c., &c., to become converts.

A PLAIN STATEMENT OF FACTS.—To gentlemen who appreciate the comfort and luxury of good-fitting Boots or Gailers, we would suggest an early visit to our friend, Mr. William H. Herwer, the article cordonnier, at No. 585 Aron street, next to the corner of Sixth. His accuracy in fitting even the most ungainly feet, has secured him a reputation far beyond the generality of his craft. Those who are affilicted with corns or bunions should make a note of this fact. Only the best workmen are employed, and the the generality of this child make a note of this fact. Only the best workmen are employed, and the best material used; ergo—he that cannot be pleased with the fit, workmanship and materials of "Helw ko's Boors," had better give up trying and go barefoot.

The Chinese Government having (through the Hon. Anson Burlingame) conceded to this Company the privilege of connecting the great scaperis of the Em-pire by submarine electric telegraph cable, we propose mencing operations in China, and laying down a of 900 miles at once, between the following ports

Total. ... 5.910,000
These ports have a foreign commerce of \$900,000,000 and an enormous domestic trade, besides which we have the immense internal commerce of the Empire, radiating from these points, through its causis and navigable rivers.

The cable being laid, this company propose erecting land lines and establishing a speedy and trustworthy means of communication, which must command there, as everywhere else, the communications of the govern-ment, of business, and of social life, capecially in China. She has no postal system, and her or ly means now of communicating information is by courier on land, and by steamers on water.

The Western World knows that China is a very large

country, in the main densely peopled, but few yet rea-lize that the contains more than a third of the h. man race. The latest returns made to her central authorities for taxing purposes, by the local magistrates, make her population Four Hundred and Fourteen Mulions, and this is more likely to be under than over the actual ag-gregate. Nearly all of these who are over ten years old not only can but do read and write. Her civilizaold not only can, but do read and write. Her civilization his peculiar, but her literature is as extensive as that of Europe. China is a land
of teachers and tracers; and the latter are exceedingly
quick to avail themselves of every profiered facility for
procuring early information. It is observed in California that the Chinese make great use of the telegraph,
though it there transmits messages in English alone. To
day, great numbers of fleet steamers are owned by Chinese merchants, and used by them exclusively for the
transmission of early intelligence. If the telegraph we
propose, connecting all their great seaports, were now in
existence, it is believed that its business would pay its
cost within the first two years of its successful operation. cost within the first two years of its successful operation, and would steadily increase thereafter. No enterpuse commends itself as in a greater degree remunerative to capitalists and to our whole people. It

is of a vast national importance commercially, politically and evangelically.
Shares of this company, to a limited number, may be obtained at \$50 each, \$10 payable down, \$15 on the lat of November, and \$25 payable in monthly instalments of \$2 50 each, commencing December 1st, 1868, on application to
