WASHINGTON, Oct. 15, 1868.—The proposition to withdraw Seymour and Blair is the all-absortling anbject of discussion here, and bids fair to split the Democratic party from centre to circomference. Nothing has occurred during this or any past campaign so utterly destructive to the integrity of their political organization. The President is tickled with the idea. All the White House politicians chuckle over it, and appear to be really as much delighted with it as the Republicans. They say the Democrats must rencunce Seymour and Blair, or be defeated, and if they do repudiate them at this late hour defeat the Republicans. is equally certain. "So they can take either horn of the dilemma," one of the officials of the White House remarked to me to-day. The Evening Express, a strong Democratic paper here takes open ground against the "surrender" of Syrour, and the Blairs will never agree to Frank's being thrown overboard, unless they get a quid pro quo in some other shape. So the plot thickens. Chase is clated with the idea of being nominated, even at this late hour, and world willingly take the nomination if he could get it, but to put him up would incense the outand-out rebel Democrats, who could not sto nace one of the original abolitionists; to say nothing of his being the father of our present national banking system, the bloated bondholders, and all the other dinancial machinery for crushing out the rebellion, which the Democrats abhor so dreadfully. Then, too, at Parkersburg, West Virginia, did he not recently maintain that the national debt was constitutional and should be poid, and that the internal taxes to pay it should be rigidly collected? Talk about Chase now! The original Democrats here absolutely some blue and some of the leader lutely spurn him, and some of the leaders say that sooner than vote for him they would rather vote for Grant outright. This is the feeling here, in the great political centre of the country, and I assure you, it finds a sympathetic response

"Baltimore, Oct. 15, 1868.—Hon. Hugh McCulloch, Secretary of the Treasury—Sire: I see it stated in a newspaper that "two cents, placed at interest for 2,000 years, will pay off the national debt." It is not stated at what interest, and I have not the time to sire into a calculation to have not the time to enter into a calculation to test the truth or falsity of the assertion, even if the rate per cent. were given, nor can'l wait to nurse such an investment, but taking for granted that the statement is correct, I will not begradge the amount, and so enclose it to be applied by an exception of the court of the you according to your best judgment. When you have done this, how idle will be all the talk of repudiation, and the world will learn that after all, the national debt is but a two-cent

Secretary McCulloch has turned it over to Gen. Spinner, United States Treasurer, who has, as yet, made no disposition of this liberal donation from one of the fair ladies of Baltimore.

#### BOME.

An Appeal to "Heretics." A correspondent of the Pall Mall Gazette sends this important intelligence from Rome:
The Pope will shortly promulgate another Envelical, addressed to the Bishops of the Church of England and other Protestant communions, inviting them to attend the Coumenical Council on December 8, 1869. This document, it is said, will be more lengthy than that despatched to the achismatic Bishops of the East, and will dwell on the importance of Christians of all persuasions meeting together to discuss amicably their religious differences and endeavor to come into accord.

The Pope and Spain. The Vatican and the Roman official world have been greatly agitated by the events in Spain, though the public telegrams are considered to exaggerate the importance of the insurrection. The messages received at the Spanish Embassy and by the Spanish prince in the Pontifical Zonaves, and as those forwarded to the Vatican by Monsignor Franchi, Nuncio at Madrid, represen affairs in a light much more favorable to the queen. It is believed at the Vatican that the revolution has been got up by the Duke de Montpensier, prompted by Count Bismarck, who is trying by this movement to force Napoleon from his at-

#### Rumors of War.

General Dumont has returned to Rome, and held a meeting with the superior officers of the Pontifical army, to whom he said, "Gentlemen, get all ready. Soon, perhaps, you will be called to combat by the side of the soldiers of France against the common enemy." The General made loud complaints to the Pontifical Minister of the delay in completing the new remember. War of the delay in completing the new armament of the troops; and, in consequence of these remonstrances, commissioners are to be despatched to England, France and Belgium to hurry the delivery of the Remington rifles. Preparations for war, indeed, are being made here on every side. At Civita Vecchia the French are enlarging the barracks, and are building a barrack for cavalry. They continue to disembark heavy guns, ammunition and supplies, and have just received an ambulance continuent. The war forer here selected ambulance equipment. The war fever has selzed the partisans of the Pope at Rome, and, not to be outdone by French and Belgians, they are subscribing to present his Holiness with two batteries of rifled cannon. All this ardor in his cause has put the Holy Father in good spirits. Last Monday he walked through the streets from Pincio to the Pinzza of Venice, and, on returning to the Vatican, rubbed his hands together, exclaiming: "I hope soon to assist at a final triumph ing: "I hope soon to assist at a final triumph over my enemies, and then I shall be ready to render up my soul to God."

#### Treatment of the Clergy.

A letter from Andalusia says:
"Much hostile feeling prevails against the priesthood, who all belong to the fallen party; and it is to their baneful influence over the and it is to their bancini influence over the Queen that her present unpopularity is to be chiefly attributed. The vicario here at first refused to give up the keys of the church to allow the bells to be rung, but, being told that if he did not the doors would be forced, he gave in. At Seville the Jesuits were allowed twenty-four hours to leave the city, and their building has already been confiscated and made into a school for the children of the poor. The Seville revolutionary committee say that they into a school for the children of the poor. The Seville revolutionary committee say that they will have freedom in education, and that they hope soon to see Spain occupy the place she should fill among civilized nations. At Port St. Mary's, opposite Cadiz, there is a college for young priests; they were all (tweuty-four in number) packed into an open boat and sent adrift, but they were picked up by a vessel passaling.

#### Insults to the Queen. A correspondent writes from Madrid:

—A correspondent writes from mauria:

"The Queen's position is by no means an enviable one. Hunted from her capital, abandoned by her old admirers, who are actually in arms against her (Serrano for instance), she has been humbled to the very dust. It is reported that she is not devoid of personal courage. When strongly urged to quit the miserable place in which she has been residing, at San Sebastian, lest it should be taken by surprise by her enemies, she replied, 'Let them dare to come. I shall know how to defend myself.' It appears that her Majesty despatched a special envoy to Marshal Serrano. (We all recollect the story of the imprisonment of this handsome Don Juan in one imprisonment of this handsome Don Juan in one of the petits appartements of the palace at Aradpuez, &c., &c.) Serrano, victorious in old times and a conqueror now, refused to receive the Queen's messenger. Franchement, this was bard upon the Queen. The message with which she charged her envoy was as follows: "The Queen of Spain will abdicate her crown and pardon her generals, on condition that they recognize her gon as Kirg of Spain." But what do they want? exclaimed Isabella on hearing the fate of her messenger."

Inberni Infinences at Work. The Daily News is of opinion that the influences of the nineteenth contury have been gradually permeating Spanish society. Liberal ideas have been kept from expression to propagate themselves in silence. Under the external appearance of a boasted Catholic unity, religious Liberalism has made prodigious advances among the educated classes; while the artisans of the large towns and the middle classes ge have been alienated from the throne by a repres-sive policy, and driven to desire change in the Liberal direction. But all these influences might have been reckoned with if the Queen and her nave been reckoned with it the Queen and her advisers had not been smitten with the blindness which precedes destruction. The least revolutionary of all the Latin races, the Spanish nation might have been one of the easiest to rule, had the Queen been desirous of acting the part of a really constitutional monarch. But Bourbons, like Stuarts, must be wilful. They cannot learn to rule by obedience. They cannot even conciliate a people by acquiescence in its will. Even their code of morals must be their own, and not that which common mortals obey. It is the family folly which leads to the family doom. The natural end of a Bourbon's throne is for its occupant to fly, and for the record of the flight to be accompanied with such signs of popular rejoicing as we now hear of from Madrid, "Everywhere music is heard. The streets are illuminated."
