This season's experience in the matter of clothing is doing much to overcome the old prejudice entertained by some against ready-made clothing. So far as looks are concerned, it is impossible to distinfar as looks are concerned, it is impossible to distinguish between the ready-made and made to order, and
as to care in making up, if occasionally a ready-made
garment ripe, it is an exception, and an exception
which is every day becoming more and more unfrequent, and the difference in price is sufficient to pay
for sewing up a dozen rips, and besides, any garment
bought at Oaks Hall which happens to become unsewed, Wanamaker & Brown will send for and have
sewed over again, and send home again, without any
charge to the customer.

year will be of equal grandeur. Many novelties are to
be introduced.

ONE OF THE

BEST INVESTMENTS.

THE FIRST MORTGAGE BONDS

UNION PACIFIC

OF THE

RAILROAD COMPANY. 900 Miles Completed.

A limited amount of the First Mortgage Bonds of the Union Pacific Railroad Company are offered to the pub-lic, as one of the safest and most profitable investments. They are a first mortgage upon the longest and most important railroad in the country.

2. By law they can be issued to the Company only as the road is completed, so that they always represent a real value. 3. Their amount is limited by act of Congress to Fifty Million Dollars on the entire Pacific line, or an average of

less than \$30,000 per mile. 4. Hon. E. D. Morgan, of the United States Senate, and Hon, Oakes Ames, of the United States House of Representatives, are the trustees for the bondholders, to see that all their interests are protected.

5. Five Government Directors, appointed by the President of the United States, are responsible to the country for the management of its affairs. 6. Three United States Commissioners must certify that the road is well built and equipped, and in all respects a first class railway, before any bonds can be issued upon it. 7. The United States Government lends the Company

its own bonds to the same amount that the company is sues, for which it takes a second mortgage as security:

8. As additional aid, it makes an absolute donation of 12,800 acres of land to the mile, lying upon each side of 9. The bonds pay six per cent, in gold, and the principal aiso payable in gold. 10. The earnings from the local or way business were

over Four Million Dollars last year, which, after pay-ing operating expenses, was much more than sufficient to pay the interest. These carnings will be vastly increased on the completion of the entire line in 1866. 11. No political action can reduce the rate of interest. It must remain for thirty years—six per cent, per annum in gold, now equal to between eight and nine per cent, in currency. The principal is then payable in gold. If a bond, with such guarantees, were issued by the Government, its market price would not be less than from 20 to 25 per cent, premium. As these bonds are issued under Government authority and supervision, upon what is very largely a Government work, they must ultimately approach Government price. No other corrects have

approach Government prices. No other corporate bonds are made so secure. 12. The issue will soon be exhausted. The sales have IN. The issue will soon be exhausted. The sales have sometimes been half a million a day, and nearly twenty millions have already been sold. About ten millions more may be offered. It is not improbable that at some time not far distant, all the remainder of the bonds the Company can issue will be taken by some combination of capitalists and withdrawn from the market, except at a large advance. The long time, the high gold interest, and the perfect security, must make these bonds very valuable for export. for export.

All the predictions which the officers of this Company have made in relation to the progress and business success of their enterprise, or the value and advance in the price of their securities, have been more than confirmed, and they therefore suggest that parties who desire to invest i their bonds will find it to their advantage to do so at once The price for the present is 102, and accrued interest at per cent. in currency from July 1, 1868, in currency, Subscriptions will be received in Phitadelphia by
