TO PHYSICIAMS. New York, August 15th, 1897. Allow me to call your attention to my PREPARATION OF COMPOUND EXTRACT BUCHU. The component parts are BUCHU, Long LEAF, CUBEBS, JUNIPER BERRIES.

Mode of Preparation.-Buchu, in vacuo. Juniper Berries, by distillation, to form a fine gin. Cubebs extracted by displacement by liquor obtained from Juniper Berries, containing very little sugar, a small proportion of spirit, and more palatable than any now in use. The active properties are by this mode extracted.

Buchu, as prepared by Druggists generally, is of a dark color. It is a plant that emits its fragrance; the action of s fiame destroys this (its active principle), leaving a dark and glutinous decoction. Mine is the color of ingredients. The Buchu in my preparation predominates : the smallest quantity of the other ingredients are added, o prevent fermentation; upon inspection, it will be found not to be a Tincture, as made in Pharmacopœa, nor is it a Syrup and therefore can be used in cases where fever or inflam mation exists. In this, you have the knowledge of the ingredients and the mode of preparation.

Hoping that you will favor it with a trial and that upo inspection it will meet with your approbation,

With a feeling of confidence.

I am, very respectfully, H. T. HELMBOLD,

Chemist and Druggist of 16 Years' Experience in Philadelphia, and now located at his Drug and Chemical Warehouse, 594 Broadway, New York.
