spalts of seitling the Alabama claims before the fatal 4th of March that ends his official existence. The gay old Reverdy, with his everlasting talk and public banquets, has completely knocked the negotiations in the bend. John Bull saw our eggerness and tried to take the advantage, and, had the matter been kept quiet; it might have succeeded. But public opinion has driven our venerable diplomat of the State Department to a demand for better terms, and the time is too short for further negotiations of any sort.

"The fact is, the time has come," said Stanton the other day, "when the interests and dignity of our government call for some other foreign policy than that of cowardice. While non-intervention is our better course, it ought to be an armed non-intervention, ready to strike and not beg, when our interests are touched. We have been too long regarded as a nation of shopkeep- ore, willing to suffer wrong and put up with ingult rather than he at the expense of a war. This is paying a premium on aggression, and we cannot get our rights or command respect so long as it continues. It is time to run up the American flag, and not keep it locked a way in legations as a precious relic, sacred to the eyes of the initiated. Nor should it be flourished, as it was over the barrieades in Cadiz the other day, for which the press here is so loud in its praise, What that fellow was doing there as an American Co. sal, with the American flag, is more than I can make out. I am willing to bet that at manity contempt. This is why Gen. Grant keeps aloof from Andy Johnson.
