THE FIRE AT NORTH AND CHEST-

Continuation of the Coroner's Investi-The Coroner resumed the investigation into the causes of the death of James F. Polk and Edward Hagan, who lost their lives at the fire at J. E.

Caldwell & Co's jewelry store No. 992 Chestnut street, on the morning of January 14, 1869.

James E. Caldwell nffirmed—I reside at No. 2033 Walnut street; I occupied the store No. 992 Chestnut street; at the time of the fire I was out of town and do not know its cause; the night before the fire the building was entirely cleared out, and there was not a pound of paper or hay about; there were two bins in the basement on the west side; there was but enough hay for one day's work; each bin was about ten feet long by six feet wide, and opened at the ceiling with two ordinary doors; the cleaning department was under the pavement in the basement; there were no acids or other explosive material used; there may have been one or two bot-Caldwell & Co's jewelry store No. 902 Chestnut ment; there were no acids or other explosive miterial used; there may have been one or two bottles of acid in the fourth story front which we did not consider explosive; there was no cleaning acono in any other part of the building; there were no old rars used: clean linen rags and towels were used; I have conferred with most of my employes, and I have not been able to come to any conclusion as to the origin of the fire; one of my clerks slept in front of the counting house, on the first floor; I front of the counting house, on the first floor; I had the most unbounded confidence in the carefulness of those who slept in the building; I am not able to say whether the gas was turned off at the metre or not; the rear part of the building was composed of glass; inside of that we had iron

grating.
Richard A. Lewis sworn—I reside at No. 1909 Richard A. Lewis sworn—I reside at No. 1909 Green street; I am a member of the firm; I have no knowledge of the origin of the fire: at the time I left the store in the evening everything was in order; I left at ten o'clock Wednesday night, and looked through the building and all was in order; I was in the basement twice during the day and found it unusually clean; Mr. Andrews remarked that he intended to have was kept wet and was used for away ping purposes on the first floor; the reason that it was the position where found, was to sop up the water from a leak of the water-pipe from the

water from a leak of the water-pipe from the water-closet in the basement; it was generally kept under the Sanson street pavement; I do not remember smelling any gas about the building. Henry Lapsley, affirmed—I reside at No. 908 Sanson street; I reside nearly opposite to the store; about half-past twelve o'clock I heard a rumbling and an explosion; there were three distinct explosions, and then I saw the flames coming out of the building; the fire came out of the western door of the first floor; I noticed the noise of the explosion first and then heard the class falling about; it sounded to me like an exglass falling about; it sounded to me like an explosion from a gaseous substance, and resembled a puffing noise.

John Rice, sworn—I reside at the corner of Twenty-first and Walnut streets; I erected the store according to contract, and it was built strictly in accordance with the plans; my opinion is that the explosion of the flue was the cause of the fire, and cut the gas-pipes; the brick-work was tied in all the way up to the roof, and it could not have fallen down except by an explosion; saw the fire when it first made its appearance in Howell's store, and it was communicated through a hole which was occasioned by the falling of an

a hole which was occasioned by the falling of an iron girder, which tore a hole in the wall.

John McArthur, Jr., sworn—I was the architect of the buildings; the buildings were erected in accordance with plans prepared by me, and were first-class buildings; the material was of the best, and no finer stores were ever erected; the walls were thick and were well constructed; the joists were thick and were well constructed; the joists are training to the property of the propert were thick and were well constructed; the Joists not only rested upon the walls but hung in iron stirrupe; I superintended the erection of the buildings and know that they were built according to the specification; the builder could not and did not receive his money for the work until I gave him a certificate; I altered the store when Mr. Caldwell took possession of the store, and put in an additional skylight.

Benjamin F. Wright, sworn—I am one of the

put in an additional skylight.

Benjamin F. Wright, sworn—I am one of the Building Inspectors and was an inspector at the time of the construction of the building; I paid particular attention to it, and thought that they were well constructed; I made a close examination yesterday, and found the walls to be eighteen some particular their ware nearest that the particular that were nearest. inches thick; there were no joists that were nearer than six inches to each other; I have been there several times and can give no idea as to how the fire originated. The fine was constructed in the ordinary way; I examined it since the fire and do not think that it could be thrown down being nine inches. thrown down, being nine inches, except by an explosion. The flue in the first tory is intact now. I never saw such a quantity

story is intact now. I never saw such a quantity of iron used in any building, and greater care was not taken in the erection of any building. Henry Horn, sworn—I am employed in the Gas Works; my attention was called to the fire at Howell's store, and I proceeded to turn the gas off; a member of the Schuylkill Hose Company showed me where the cock was, and with Mr. Snyder we stopped the gas off; a fireman went down in the basement and stopped the gas at the meter; it was eight o'clock in the morning when I got there.

when I got there.

Hugh Hawkins sworn—I am employed at the Gas Works; I was at the fire as soon as the alarm: was given, and when I got to Ninth and Sansom streets the lower floor was all in a blaze; I could not find a stopcock either on Sansom or Chest-nut street; there is one in the street, but there was so much water, mud and dirt that I could not find it; the meter was in perfect order when taken

away. R. C. Snyder sworn—I am a Fitting Inspector in the Gas Works; I inspected the pipes and fittings in October and November, and found them in perfect order; gas will be observed it there is a leak, and a very small one will be noticed; I think that if there was one it would have been observed; no one could remain in the building and not smell it; it is lighter than all and ascends and when it mixes with the air it

W. Lowry, sworn-I am a Meter Inspector; the state of the meter on December 24, was 252, 500 feet;21 days elapsed up to the time of the fire, and then it registered 311,700 feet when examined; the average for 31 days was 3306 feet; the gas con eumed during the 21 days would average 59,200 feet but including the night of the fire 69,426 feet. there were 300 burners in the building, some of which were in use during the day; the amount of gas consumed from November 23 to December 24 was 102,500 feet.

John A. Miskey, sworn—I reside at No. 853 North Twelith street; I am superintendent of distribution and public lighting; I superintended the laying of the gas main on Ninth street from Dickerson street to Chestnut street; there was no connection made with Sansom street, and but one connection was made, which was at Spruce street; it is an impossibility for the gas to escape from the main into the culvert and then into

Caldwell's building.

H. B. Houston sworn—I reside at No. 1939 Mt. Vernon street; I was in the cuilding until half past ten o'clock the night of the fire, and at twenty minutes past ten o'clock went into the front cellar to see if an article had been sent home, and looked through the basement, which was in per-

fect order.

Robert Dixon, sworn—I have been employed in the Gas Works 33 years, and superintended the laying of the main on Ninth street; the work was well done, and we made no connection at Sansom

Adjourned until Monday morning at 10 o'clock LARCENY OF WASHED CLOTHING .- People who varelessly leave their washed clothing hanging up in the yards all night, have suffered very much recently from the depredations of thieves. Nearly every day one or two individuals are arrested for lorcenies of that kind. This morning Policeman Flick arrested Ellen Leary, on Hubbell street, be-low Fitzwater. She had under her arm a bundle of washed clothing, supposed to have been stolen. She was committed by Ald. Bonsall.

THE RIVLE CLUB. - The annual ball of the Philadelphia Ritle Club will be given at National Guarda' Hall on Monday evening next. Great preparations have been made by the committee of arrangements, and those who participate in the affair may expect to have a very pleasant

property stolen is about \$25.

ANNIVERSARY OF THE SIEST BEYORMED PRES PYERIAN CHURCH.—The seventy-first anniversary of the First Reformed Presbyterian Church. sary of the First Reformed Presbyterlan Church of which Rev. Dr. Wylle is pastor, was celebrated last evening. The spacious school room in which the exercises were held was crowded in all pates and it was with much difficulty that accommodations could be found by all who desired admission, the room was decorated with American fage and on the walls were suspended the portraits of Rev. Dr. S. B. Wylle, the first pastor, and Elders McCune, Sterling, McKinley and Henry.

George H. Stuart, Esq., presided, and was assisted by Thomas Reath and others, who acted as Vice Presidents.

The exercises were commenced by the congre-

as Vice Presidents.

The exercises were commenced by the congregation uniting in singing the 98th Psalm, "O sing a new song unto the Lord." The Scriptures were read by Rev. Mr. McCokle. Prayer was then offered by Rev. Mr. Sterrett. An anthem was surg with fine effect by a number of ladies who appropriate for the occasion. who volunteered for the occasion.

Rev. Dr. Walje then made an address, in which he stated that the congregation was organized he stated that the congregation was organized Jan. 28, 1798, Dr. S. B. Wylie, the pastor, serving the congregation until his death, which occurred in the year 1852. His pastorate of over fifty years was marked with many facts of interest, and showed with what success an earnest and devout minister generally meets. Rev. T. W. J. Wylie, the present pastor, assumed his responsible duties in the year 1843. He still continues to labor with marked success.

labor with marked success. the was stated that the late difficulties in the thurch had left the congregation still quite strong. The revenue of the past year from pew rents, notwithstanding the difficulties, diminished only \$700. The contributions for benevolen purposes were increased. The total revenue of the congregation for the last year was over

\$7.000.

Rev. J. W. Faries was presented by the congregation with a splendidly bound Bible, as a mark of their high esteem. The gift was acknowledged in an appropriate speech. A series of resolutions expressive of the gratification of the audience at the past prosperity of the church and hopes for future prosperity were unanimously adopted.

adopted.

During the evening short addresses were made by Rev. Drs. Church, Mears, Wylle and other clergymen. and Hon. James Pollock, Judge Lowrie and others.

FALL OF A HOUSE .- On the east side of Thirty. fourth street, from Chesinut street to the Darby road, there is a row of four-storied dwelling houses, of brick, with marble cappings. The buildings have been completed, and workmen are engaged in putting the finishing touches upon them. Last evening, about seven o'clock, the house at the corner of Thirty-fourth street and Darby road fell down with a tremendous crash. The building was completely demolished—the ruins tumbling into the cellar—and in its i li carried with its portion of the walls of the adjoining structure. The cause of the disaster is said to have been a poor foundation. The loss to the owner of the property is about five thousand dollars. No person was injured by the accident.

Suppen Drath.-H.P. Samson was found dead this morning in an apartment in the basement of the State House, which he had occupied for many years. The deceased was 86 years of age. He was well known to everybody who has visited the chambers of City Councils when those bodies were in session, having occupied the position of door keeper since the first organization of the Councils under consolidation, in 1854. Years councils under consolidation, in 1041. Tears ago Mr. Samson was in the wholesale grocery business. For some time past he has been very feeble, and a few weeks ago had a paralytic stroke. He was at his accustomed post yesterd by afternoon, discharging his duties, and appeared to to in a cheerful mood. His sudden death is attributed to general debility.

HANDSOME NEW CARS .- The Pennsylvania Rallroad Company are constructing twenty-four new and improved passenger coaches, which will be placed on through trains between Philadelphia and Pittsburgh. The heating apparatus is on a new plan, the stoves being hung under the floore, and the heat disseminated through the cars is means of pipes. The interior of the cars is ele-gant, and the seats are lower and neater in shape than those now in use. The window-blinds are than those now in use. The window-olinds are arranged so as to cover the glass entirely, which is a decided improvement on the three-quarter shades now in use. Better light will be furnished, as there are two chandeliers—one near each end of the car—arranged for three candles each, making six lighte, instead of two.

A POOR JOKE -A colored man was sitting on Spruce street wharf yesterday afternoon. Au individual, named Spencer Chance, came along zens went to the assistance of the man, and after considerable difficulty, he was taken from the water. Chance was arrested. He said that he had "done it for a joke." The policeman couldn see that there was any fun in attempting to drown a man, and took his prisoner before A! derman Kerr. That gentleman is sometimes facetious himselt, and always knows how to appreciate a good thing, but he thought the joke perpetrated by Chance a very poor one, and sent him to Meyamensing.

PATENT SPRING CAR .- We examined, yesterday, a working model of a passenger railway car, in which the motive power is in coils of springs. It, of course, dispenses with steam and horse power, and the power is so adjusted as to be entirely and immediately under control, and be entirely and immediately under control, and only needs to be renewed by winding up the spring at the end of each trip. The spring car has been patented by its inventor, Mr. Stokes. It is ingeniously contrived, and we see no practical difficulty about its application. The Society for the Prevention of Cruelty to Animals should look into this invention, in behalf of their equine friends. friends.

House Entered .- The dwelling of Charles B. Lower, at Twenty-first and Norris streets, was entered yesterday by boring through the kitchen door. All the rooms on the lower story were raneacked, but the thieves were frightened by a noise in the house, and decamped before they had secured any booty.

A WARNING .- The following notice has been posted on the outside of the door leading to the Mayor's office: "Applicants loitering in these halls, or on the staircase, after presentation of papers, will diminish their chances of success."

Mormonism in Maine,

A Mormon preacher, Elder Sessions, is laboring n Mexico, Oxford county, Maine, and he writes o Utah that he is baving good success. Three amilies will leave for Salt Lake City next spring.

He says:
"The people are ready to hear the gospel, and I have strong hopes that I will find some to obev. I have rever found the people so willing to hear, and I can get access to their meeting houses where I never could before, and those who opposed when I was here before now invite me to their houses and treat me with all the kindness that they care and the most wealthy and consider that they can: and the most wealthy and popular that they can; and the more wants, and popular are ready to listen and respect our religion, while but few ridicule or oppose. I have never seen the time that the prospect looked brighter in all my travels than it does to-day.

Teleg aphing across the Continent.

tFrom the San Francisco Bulletta, Dec. 28.3

A telegram was received last evening, at the office of the Western Union Telegraph Company, direct from the New York office, a distance of about 3,500 miles, announcing that a banquet was being given to Prof. Morse, the inventor of the American Islandary. American telegraph. The operator in the office bere seked west time it was in New York, and is less than a minute from the time he commence the message, the response came, showing a differ once between the two places of three hours and seventeen minutes.

-The statt of the Paris National Guard having advertised that the position of drum-major in that part of the French militia is vacant, twenty or thirty men, over seven feet in height, have come to Paris as applicants for the place, and they are daily promenading on the boulevards, to the great disgust of all small Parislans, who now

look chorter than ever. Assaulting a Woman.—Dennis McBudd was arrested yesterday in Manayunk, and was taken before Ald. Ramsdell upon the charge of assault and battery on Mary McGinnis. He was held in \$400 bail for trial.

Stable Robed.—The stable of J. Ladlow, on Haines street, near Chew, in Germantown, was centered on Wednesday night, and robbed of a set of harners, blankets, &c. The value of the property stolen is about \$25. NEW JEBSEY MATERIA

HEALTHFUL LEGISLATION.—A few bills of bealthful legislation for Camden have been introhealthful legislation for Camden have been intro-duced into the New Jersey. Legislature, during the present week, which, if passed, will result in the accomplishment of much good to the fature advancement of the Interests and Improvement in that city. One bill contemplates investing the Board of Education with power to assess six mills on the dollar as the educational ratio of taxation for school purposes. This sum, it is thought, will be sufficient to carry on the public schools with that degree of progress demanded by the exigencies of the day. Another bill provides for the appointment of an additional Judge for Camden county, and also for instituting a Court for the trial of small causes, in which all cases of for the trial of small causes, in which all cases of minor consequences can be tried and disposed of without the necessity of subjecting them to the action of the Circuit Court of Quarter Sessions. action of the Circuit Court of Quarter Sessions.
As the matter stands at the present time, if a man is arrested on the day after the grand jury adjourns, he must either lie in jail three months, or give bonds, before his case can be reached. In this new court it is proposed to give him a speedy hearing. This improvement cannot fail to be heartly approved.

heartily approved.

Grand Concert.—Last evening the best and most fashionably attended concert ever given in Camden came off at the Court House, for the benefit of Miss Clare Hindle, a young lady of superior vocal powers, who has obtained great public prominence by her singing on charitable occasions. She was assisted by some of the best talent of Philadelphia, and the performances were highly appreciated. The concert was conducted by Prof. Jackson.

OITY NOTICES.

Some MEN put their money in Life Insurance simply as a good investment, an easy and sure way of making money. Most men, however, want nothing more than to recure the payment of a certain amount to their families at their death. To such, the mutual plan of in-uring offers no advantages, while what is known as the stock or net-cash offers the vastly important advantages of lower rates and additional security. The American Life Insurance Company of Philadelphia does business on all good plans and offers special inducements to those who wish to insure at the lovest rates and on the simplest plan.

THE TEETH'S SALVATION.

The interior bark of the Soap Tree of Chill is admitted by botanists to possess cleansing and preservative qualities unshared by eny other known substance. Its native name, Quilling, is from Quillian, to make clean. This matchless antiseptic is a main constituent of the famous preparation for the teeth known as Sozonors, which has long since taken the lead of every other anticle of its class throughout the Western Humisphere.

TO PHYSICIANS.

NEW YORK, August 16th, 1967. Allow me to call your attention to my PREPARATION OF COMPOUND EXTRACT BUCHU. The component parts are FUCHU, Long LEAF, CUBEBS, JUNIPER

BERRIES.

area de como comando

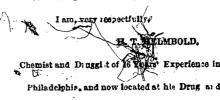

ACTION BY THE STATE STATE

Mode of Preparation .- Buchu, in vacuo. Juniper Berries, by distillation, to form a fine gin. Cabebs extracted by displacement by liquor obtained from Juniper Berries, containing very little sugar, a small proportion of spirit, and more palatable than any now in use. The active properties are by this mode extracted.

Buchu, as prepared by Druggists generally, is of a dark color. It is a plant that emits its fragrance; the action of s flame destroys this (its active principle), leaving a dark and glutinous decoction. Mine is the color of ingredients, The Buchu in my preparation predominates; the smallest quantity of the other ingredients are added, to prevent fermentation; upon inspection, it will be found not to be a Tincture, as made in Pharmacopous, nor is it a Syrupand therefore can be used in cases where fever or inflammation exists. In this you have the knowledge of the ingredients and the mode of preparation.

Hoping that you will favor it with a trial, and that upon inspection it will meet with your approbation

With a feeling of confidence,

Chemical Warthouse, 594 Broadway, New

HELMHOLD'S FLUID EXTRACT BUCHU, for Weaknes triting from indiscretion. The exhausted powers o Nature which are accompanied by so many alarming ymptoms, among v hich will be found Indisposition to Exertion, Loss of Memory, Wake'ulness, Horror of Disease, or Forebod'n ;s of Evil, in fact, Universal Lassi-

tude, Prostration, and inability to enter into the enjoy-

ments of society.

ness, requires the aid of Medicine to strengthen and invigorate the system, which HELMBOLD'S EXTRACT BUCHU invariably doss. If no treatment is submitted to, Consemption or Insanity ensues.

HELMEOLD'S FLUID EXTRACT BUCKE, in affections peculiar to Females, is unequaled by any other preparation as in Chlorosis, or Retention, Painfulness, or Suppression of Customary Evacuations, Ulcerated or Schirrus State o the Literas and all complaints incident to the sex, whethe striging from habits of dissipation, imprudence in, or the decline or change of life.

HELMBOLD'S FLUID EXTRAOT BUOHU AND IMPROVED ROSE WASH will radically exterminate from the system diseases arising from habits of distipation, at little ex pense, little or ro change in diet, no inconvenience or exposure; completely superseding those unpleasant and dangerous remedies, Copaiva and Mercury, to all these

Use HELMBOLD'S FLUID EXTRACT BUOHR in all diseases of these organs, whether existing in the male or female. from whatever cause originating, and no matter of how long standing. It is pleasant in taste and olor, "imme diate" in action, and more s'rengthening than any of the preparations of Bark or Iro 1.

Those suffering from broken-down or delicate constitutions, procure the remedy at once.

The reader must be aware that, however slight may be the attack of the above ϵ is eases, it is certain to a left the bodily health and mer tal power.

All the above discuses require the aid of a Diuretic. HELMBOLD'S EXTRACT BUCHU is the great Diuretic Sold by Druggists every where. Prior-\$1 25 per bottle. or 6 bottles for \$6 50. Delivered to any address. Describe symptoms in all communications.
