OITY BULLETIN.

MEETING OF THE FRANKLIN INSTITUTE-INTER-BSTING PROCEEDINGS.—The monthly meeting of the Franklin Institute last evening was of unusual interest and very largely attended. After the usual business, including a report from the Board of Managers advising an application to the Legislature for the use of one of the Poun squares, which was approved by the Society, the Resident Secretary. Prof. Morton, read his report on "Novelties in Science and the Merchanic Arts." At the opening of this report he sliuded to the guppowder pile-driver invented by Mr. Thomas Shaw, and called upon that gentleman, who was present, to give a full explanation of the apparatus. This, with the aid of a working model and diagram projected on the screen, was very successfully accomplished. the Franklin Institute last evening was of uu-

This instrument consists of a heavy steel cylin-This instrument consists of a heavy steel cylinder, open above, and resting on the head of the pile to be driven, and a ram or weight, with a plunger, fitting this cylinder, and moving vertically above it in guides, near the top of which is a rack in which a paul on the ram catches and so helds the ram up until released by pulling a cord. The ram being heisted to the ton of the guides holds the rain up interest of partial and the rain being he isted to the top of the guides, to begin with, a small cartridge is thrown into the cylinder, and the cord being pulled, the rain falls. The plunger enters the cylinder, explodes the powder by its percussion, and is driven back to the top of the guides by the force of the explo-sion, where its paul catches on the rack and holds it ready for another blow. The amount of powder required is wonderfully small. In the model used, where the ram weighed seven pounds, the charge was half a pistol cap full. With a the charge was hait a pistol cap ruit. With a larger machine in use, having a ram of seventy-two pounds weight, rising twenty feet, the amount is an ordinary pistol charge, or about haif a thimblefull. The practical effect of the double blow obtained by this arrangement is shown to be at least eight times that produced by the mere fall of the weight. This admits of explanation on the received principles of mechanics, but we have not here space for a discussional statement of the space for a discussion of the space sion requiring so many words.

These were projected on the screen, as were also drawings exhibiting the results of the late remarkable discoveries made with the spectroscope by Lockyer and Jausen, and a number of photographs of improved forms of machinery, including an hydraulic dredge, by Messrs. Gwynne & Co.; the Babcox & Willcox engine pulleys for short belts; adjustable hangers, by J. W. Loraine; Pitt's safety bathing apparatus, &c. A resolution was offered by Mr. P. E. Chase, and warmly seconded by Mr. Caleb Hallowell, directing the officers of the Institute to memorialize Congress as to the propriety of appropriating funds, to be expended under the direction of the Coast Survey and Bureau of Navigation, in making observations of the total eclipse of the sun, due August 7th next.

The meeting was then, on motion, adjourned.

PENNSYLVANIA TRAINING SCHOOL FOR FEEBLE-

PENNSYLVANIA TRAINING SCHOOL FOR FEBBLE-MINDED CHILDREN.—The sixteenth annual report of this institution, made to the Legislature, has been received. The institution is located at Media, Delaware county, and was incorporated April 7, 1853. The report shows that since the foundation of the school 501 inmates have received shelter, nurture and training. Of these there were orphans, 262; children of the poor, 286; mutes, 89; semi-mutes, 113; defective articulation, 150; defective in sight, 97; defective in hearing. 98; unable to walk, 15; imperfect gait, 24; unable to feed themselves, 56; unable to dress themselves, 91; uncleanly in habits, 195; destructive, 295; epileptic, 111; malformed, 54; scrofulous,

Under the improvement of natural growth and Under the improvement of natural growth and favorable treatment, there have been taught to speak, 37; articulation improved, 196; taught to read, 187; taught to write. 113; taught to feed themselves, 46; taught to dress themselves, 70; taught to walk, 5; gait improved, 214; reformed from bad habits, 140; reformed from destructive habits, 256; accustomed to some employment, 100; artillersy gived, 15; spillersy improved, 57

196; epilepsy cured, 16; epilepsy improved, 57.
Of those discharged there are at home, condition improving, 134; at home, conditionary, 57; at home, alding in household service, 52; at home, self-helpful, 108; at home, entire'y dependent, 57; at common schools, 19; at trades, domestic or farm service, 37; in "county houses," self-helpful, 15; in "county houses," entirely dependent, 7; removed and condition unknown, 108; at present in institution, improving, 159; at present in institution, not improving, 21.

The report says:
"By examination of the above statistics, it will be realized that orphanage, poverty and disease, are prevailing conditions to which it has been the sad office of our work to minister, as well as to defective minds and perverted morals; when mo-mentarily discouraged, as we occasionally are, with the slow advancement of our legitimate work, we find ourselves deriving some satisfac-tion from these most evident facts, that the great majority discover in us their only friends, that many homes are brightened, and many heavily burdened mothers relieved; that many sisters and brothers are receiving full parental and school care, because of the withdrawal of these helpless and shadowing ones to a home and associations far better suited to them. They must be removed to an artificial home, adapted to their unnatural condition, else the natural home becomes no resting place for any of its members.

"This then becomes one of the essential advant-

ages and one of our proposed duties, to relieve the home, indeed, neighborhood where the child has The operations of the school during the past

year are thus set forth: Number of inmates December 31, 1867, 175; admitted during 1868, 51; removed during 1868, 36; on roll December 31, 1868, 180. Of 36 removed there are: Deceased, 5; discharged improved, 22; discharged not improved, 5; removed, and in remunerative employment, 4.

The 180 inmates are from States as follows: fassachusetts, 1; Connecticut, 1; New York, 1; Massachusette, 1; Connecticut, 1; New York, 1; New Jersey, 21; Pennsylvania, 136; Delaware, 5; Maryland, 5; Virginia, 2; Alabama, 2; Missouri, 1; Ohio, 1; Indiana, 2; Hilmois, 1; Cuba, 1. Pennsylvania, 2.

POLICEMAN ASSAULTED .- Last evening, about nine o'clock, the cry of murder came from the house of Robert Haskell, No. 1244 William street. Policeman McKeever, of the Eighteenth District, went to the house, and a servant girl told him that Haskell was in the habit of abusing her. She desired to leave, and asked the officer to protect her while she got her clothing. He stepped inside of the door, and Haskell put his arm around his neck, apparently in a friendly manner, but sud-denly bit his nose in a severe manner. He was sted, and, after a hearing before Alderman Neill, was held in \$1,500 bail for trial.

RIOT ON SHIPBOARD.-Yesterday afternoon, as the British bark Brother's Pride, hence for Matanzas, was proceeding down the river in tow of the steam-tug E. A. Souder, a desperate fight commenced among the crew when in the Horse Shoe during which one man was thrown overboard, and despite the efforts of the tug to rescue him, sunk to rice no more; another was severely cut. The names of both could not be ascertained, as the bark proceeded down in tow at four o'clock this morning, having obtained two additional men.

PICKPOCKET CAPTURED. - A man was relieved of a pocket-book containing \$29, last evening, on one of the Union Passenger Railway oars, on Ninth street above Walnut street. The alarm was given and Policeman Devine gave chase to was given and Policeman Devine gave chase to the supposed thief. After a run to Seventh and Locust streets, he captured the fellow, and found the stolen pocket-book and money in his posses-sion. The prisoner gave his name as William Penton, and said that he belongs to Boston. He will have a hearing at the Central Station this af-

The following letter from John Bright to one of our countrymen, though written more than a year ago, is just published, and is of general interest:

Dear Sir: 1 do not think the punishment of death is necessary to the security and well-being of society; and I believe its total abolition would not tend to inand I believe its total abolition would not tend to increase these crimes which it is now supposed by many to prevent. The security and well-being of society do not depend upon the severity of punishments. Barbariem in the law promotes barbarism among those subject to the law: and acts of cruelty under the law become examples of similar acts done contrary to law. The real security for human life is to be found in a reverence for it. If the law regarded it as inviolable, then the pet ple would begin also so to regard it. A then the peculie would begin also so to regard it. A deep reverence for human life is worth more than a thousand executions in the prevention of murder, and thousand executions in the prevention of murder, and is, in fact, the great security for human life. The law of capital punishment, while pretending to support this reverence, does, in fact, tend to destroy it. If the ceath peralty is of any force in any case to deter from crime, it is of much more force in lessening our chief security against it, for it proclaims the fact that Kings, Parliament, Judges and juries may determine when and how men may be put to death by violence, and samiliarity with this idea cannot strengthen the reverence for human life. To put men to death for crimes, civil or political, is to give proof of weakness rather than strength, and of barbarism rather than Christian civilisation. If the United States could get rid of the vallows, it would not stand long here. One by one we than strength, and of barbarism rather than Christian Christian Civilization. If the United States could get rid of the gallows, it would not stand long here. One by one we "Americanize" our institutions, and I hope, that in althat is good we may rot be unwilling to follow you. I am, very truly yours, John Batohr.

I am, very truly yours, Hon. Reverdy Johnson's Speeches. A despatch from Washington giving the summary of the correspondence between our Government and that of Great Britain relating to the Alabama claims

nestion, says:
"In his letter of the 15th of January, inclosing the two treaties, Mr. Reverdy Johnson alludes to the po-sitions taken two years ago by England, and says that he has reason to believe that the abandonment of he has reason to believe that the abandonment of these positions is due to the growing friendly feeling for the United States which has been so strongly ex-pressed since his arrival, and then conveys the pleas-art information that, anticipating such an effect, he de-termined to lose no time in cultivating the feeling, and this was the sole motive in the speeches he made last Fall in various parts of England."

OITY NOTICES.

Carinet Organs.-The success of the Mason & Hamlin Organ Company, now the largest manufacturers of instruments of this class in the world, producing and finding a demand for an average of hundred and twenty-five organs per week, illustrates what can be done by energetic and persevering purnit of right principles in business. The following are what may be said to be Articles of their Constitution, kept always in view and never deviated from:

1. Excellence in the manufactured article must never be sacrificed to economy and cost. The bost, only and always. 2. No degree of superiority shall be considered sat-

is factory as long as improvement is possible. 3. The use of every valuable invention and real im_ provement must be obtained, at whatever cost. 4. Productions to be sold at lowest possible prices: these to be printed and offered to all alike, thus deal-

ing fairly and impartially with the public.

This Company have expended an immense amount in experiments for improvements, in which they have been greatly successful, developing, enlarging, improving and adding to the well known Melodeons of former times, until they have become the magnificent Mason & Hamlin Cabinet Organs of the present, to which was awarded the Paris Exposition Medal for

superiority last year. They have just introduced an important improve ment, the Mason & Hamlin Improved Vox Humana, a beautiful invention, which is said to be as great an advance upon the Vox Humana already used as the Cabinet Organ is upon the Melodeon. They also announce important reduction in prices, offering their unequalled Organs at prices which are oven less than there commonly demanded for inferior workmanship. This is the natural result of their greatly increased facilities for manufacture, and fixed rule to sell at smallest profits .- New York Tribune.

The longest six per cent, gold interest bonds of the U.S. (the '81's) will be due in 12 years, and they are worth 112. If they had 30 years to run, they would stand at not less than 125. A perfectly safe First Mortgage Bond like the Union Pacific should approach this rate. The demand for European invest ment is already considerable, and on the completion of the work will doubtless carry the price to a large pre-
