These letters are fresh, delightful and postic pictures of travel in the Orient. The Author, in wandering through Greece. Turkey, Egypt. Nubla and Byris. explored each storied spot with the interest of an anti-quarian, and traced with the pen of a true poet the indo-lent luxury of boat-life on the wife and the adventures and romance of desert-travel, in all of which he mingles a vein of sweet and philosophic thought.

Durability and Facility of Repair THE HARRISON BOILER WORKS Gray's Ferry Road, near U. S. Arsenal. PHILADELPHIA, February 12th, 1869. Joseph Harrison, Esa., Philadelphia-DEAR Sin: The Harrison Bollers of 300 horse power. ordered in December, 1866, for the Plymouth (Mass.) Cordage Company, have given excellent results. When doing the same work as the company's old boilers (which are of the fire-box flue variety, of the best construction and in first-class order), a saving of about 20 per cent. in fuel has The new boilers were erected to supply steam for a Condensing Beam Engine of 500 P., and no difficulty is experienced in obtaining an ample quantity; in fact, a surplus of steam for all requirements. I would, however, argue in this connection the advantage of having an excess of boiler power, on the ground of the greatly diminished consumption of fuel which is sure to follow for instance: two 50 P. Harrison Boiler furnished an abundance of steam for the engine above referred to, where developing about an average of 175 P., two additional 50 P. boilers crease in the consumption of coal was fully one In conclusion, it gives me pleasure to state that I regard the Harrison Boiler with the highest favor as a safe, reliable and economical steam generator, and believe, with proper management, its durability and freedom from repairs will prove additional recommendations for it.
