honor has now become an obligation, and must enhance
the market value of their securities.

These bonds are a first mortgage upon one of the longest
lines of railroad in the world. The amount will be less
than \$27.000 per mile. The earnings from local business
over a portion of the road last year were over five million
dollars, and after its completion early this season the inmense through traffic of the Pacific States will increase
this sum to fifteen or twenty millions. The payment of

WASHINGTON'S BIRTH DAY.

As this nation approaches its hundredth

irthday, the events relating to its infancy

and to the men who were active in securing

its independence become more and more in-

teresting. The present condition of the Re-

public, the struggles and trials it has gone

through, and its enormous and rapid growth,

are to be looked upon as the development of

the work begun a century ago, when the

people of the British American Colonies were

engaged in effecting a separation from the

mother country. For, though the Declara-

tion of Independence fixed a date that is re

cognized as our national birth-day, there was a

virtual separation from England several years

among the public men of the period. The

Presidential chair, which he honored and

consecrated, has been, unhappily, degraded

and desecrated lately, and this has been a

source of sorrow and shame to the people of

the country. But, this year, in considering

the Presidency, in connection with Wash-

ington, we have the comfortable reflection

that in ten days from his birth-day a new

President will be placed in office. Like Wash

ington, Grant was the chief military actor in

a gigantic struggle from which the nation

emerged victorious, and it was in recognition

of their services that each was chosen for the

Presidency. The people have perfect confi-

The drain upon it during last week, as hown by the bank 'statement, added to that which this week's tatement will undor bredly show, indicates an improved state of affairs. The same condition characterizes all the money centres of the 'Atlantic seaboard, and it only requires a healthy employment in the usual channels of trade to make the country once more presertors and happy. There are already symptoms of approaching scivity in most branche of industry, and if a real stripgency in money does not coun, we may conficulty entirelate an active revolution of the wheels of trade.
