Your labors during the past seesion have not been light, and although your teachers have endeavored to make your burdene easy, they well knew that it was only through industry and self-sacrifice on your part, that your powers could be properly developed, trained and fitted to grapple with those giant questions in medicine and science which continually seek a sola-tion. **Fortieth Congress.** Third Session. (BENATE-Continued from the Third Edition.) Mr. Sherman briefly explained the action of the Committee of Conference. Mr. Spragne, in behalf of the suffering indus-trices of the country, earnestly protested against the passage of this bill, a measure better calcu-lated than any other yet proposed to bring about the repudiation of the national debt, and certain to do so if the people were true to themselves. to do so if the people were true to themselves. Mr. Hendricks did not think the bill improved by the action of the confirence committee, and again urged the view that Congress has no right

again urged the view that Congress has no right now to change the contract originally made ba-tween the people and the bondholders. Mr. Doolittle thought it exceedingly unwise to attempt to press this bill to a vote now when less than twenty four hours of the session remained, and when there was so much urgent business to be done. The report of the Committee of Con-ference presented really a new bill, and it could not be properly considered in a burry, and even if passed, the President would not have time to examine it and give his approval. The bill itself he regarded as a measure for the benefit of for-eign holders of our bonds. Mr. Corbett said there were two classes of for-

### SECURITY OF THE BONDS.

It needs no argument to show that a First Mortgage o \$26,500 per mile upon what for a long time must be the only railroad connecting the Atlantic and Pacific States is PERFECTLY SECURE. The entire amount of the mort gage will be about \$20,000,000, and the interest \$1,800,000 per annum in gold. The present currency cost of this in terest is less than \$2,500,000 per annum, while the gross earnings for the year 1868, FROM WAY BUBINESS only, ON AN AVERAGE OF LESS THAN 700 MILES OF ROAD IN OPERATION, WERE MORE THAN

FIVE MILLION DOLLARS,

The details of which are as follows:

This large amount is only an indication of the immense traffic that must go over the through line in a few months, when the great tide of Pacific coast travel and trade wil begin. It is estimated that this business must make the earnings of the road from PIFTEEN TO TWENTY MILLIONS A YEAR.
