EVENING BULLETIN. Monday, March 8, 1869.

President Grant has lost no time in setting the machinery of his administration in motion, and his first official acts are most comfortable indications of the kind of work upon the same basis, in Rhode Island; while which he means to accomplish. The first business is evidently to repair, so far as possible, the mischief done by his predecessor. This, President Grant has commenced by his re-distribution of the military commands, and by the revoking of some of the unjust rewards and punishments with which Johnson closed his disgraceful career In re-adjusting the military appointments, nalignant policy which struck down every army officer who was even suspected of sympathy with these principles of freedom and loyalty upon which the war was fought out and the Rebellion finally crushed. Sheridan, Canby, Reynolds and Terry are recognized by the President as the right men to superintend the military affairs of the South, and the ban which Andrew Johnson sought Carrying out the same principle, the veteran Low Church doctrines among his people, the We regret to announce that, in consequence of Emory is restored to his old command of the Bishop forbad Assistant Bishop Cummins, of a severe attack of illness, Mr. James E. Suparms Court—Chief Justice Thompson, and Justices Read, Agnew and Sharswood.—Judgment was entered in the following cases this morning:

Johnson et al. vs. the City of Philadelphia. Appeal from the decree of the Court of Nisi Prius.

Opinion by Sharswood, J.—This is a bill alled by the plaintiff for themselves and others, stockholders of the plaintiffs for themselves and others, stockholders of the West Philadelphia Parsenger Railway Co., against the said Company and the City of Philadelphia, praying plaintiffs for themselves and others, stockhelders of the West Philadelphia Parsenger Rallway Co., azainst the said Company and the City of Philadelphia, praying that the Company may be restrained from paying and the city from receiving or exacting the annual charge of \$20 for each car intended to be run on the railway of the raid Company, under an ordinance of the said city approved April 1, 1859. The principal question involved in this controversy was considered and decided by this Court in the Frankford and Philadelphia Passenger Railway Company vs. the City of Philadelphia Passenger Railway Company vs. the City of Philadelphia, on a writ of error to the District Court for the City and County of Philadelphis, and the indement of that Court was affirmed March 2, 1868. Our brother Read was not present on the hearing, and the same question has now again been argued before a full beach. A majority of the Court adhere to the principles settled in that case. The opinion of Mr. Justice Strong experses so fully and well the grounds of the decirion, that to add anything to it would be a work of supergradion.

rogation.

It is further urged that the ordinance of July 7.

1657, and he bond executed by the West Philadelphin Passenger Railway Company, dated April 15, 1658, conditioned that the company shall "faithfully and truly comply with the provisions of the said ordinance, and perform and tolin! the conditions thereby taid and imposed upon them," constituted a contract, and that it was not competent for the city to vary the terms of that contract. Monday, March 8, 1869.—The money market was free from excitement to eay, and though the demand was rather active, the supply was ample for all who could sustain their claims for accommodation by good collaterals. For this class of borrowers the market worked easy, but for those who had only second rate paper to offer the market was stringent, and the terms rather high. In the local market proper, currency was freely offered 5% 5% per cent. for call loans on Governments, and at 6% 6% per cent on miscellaneous securities; street loans were made at 8@ 5% per cent, according to grade.

It is now stated positively that the banks will not be called upon to make their usual statement on April let. This, if true, will undoubtedly relieve the money market of the periodical excitements incidental to these occasions, but it will, at the same time, make the banks more conservative in their treatment of borrowers, as the new law requires from each bank at least five statements every year, at any time which the Computoller may select. The uncertainty which will surround these statements in future will necessarily have this effect upon them. Aside, however, from this, the change will be halled with satisfaction by all classes of the community.

Bonds are weak and less active under decreased demands from foreign countries. Gold was buoyant and large sales were made at our quotations.

The business in stocks to-day was small, but there was a firmer feeling for most of the speculative shares. State 6%, 3d series, sold at 10%. Chy Leans were firm at 101 for the new and 6% for the old issues.

Reading Railroad was firmer and closed at about 4% 99. Pennsylvania Railroad was firmer and closed at about 4% 99. Pennsylvania Railroad at 5%. 18 from the N. Y. Herald of to-day.

March 7.—Wall street, during the week which has just closed, was prompt in its responses to the changes which took place at Washington, the effect of the outgoing of the law administration being at once reflected in the prices of gold and United states recurities. The finances of the country are con the cevel of the new order of the country are concequence of the new order of things. The interior of the country are consequence of the new order of things. The interior of the president when he demands of the legislative branch of the government full faith in the matter of the payment of the national debt and stigmatizes anything like repudiation. The announcement of the Cabinet selection of Mr. Stowart produced a profound sensation and was the occasion of a second period of agitation and fluctuation, the friends of that gentleman—and their name in Wal street is Legion—predicting of Mr. Stowart produced a profound sensation and in Wal street is legion—predicting and their name in Wal street is legion—predicting in Mr. Stowart produced in the Mr. Stowart produced in the Mr. Stowart produced a profound sensation and their name in Wal street is legion—predicting in the Stoward produced as a second period of a first sense in Wall street, although it is impossible to conceal the fact that this selection is viewed with a great deal of fear and apprehension by members of the possible to conceal the last materials on by members of a great deal of fear and apprehension by members of a great deal of fear and apprehension by members of a great deal of the management of the state of the st a great deal of fear and apprehension by members of the mercantile or munulity who are his rivals in business. The b-nkers and the brokers, the strictly moneyed men, are his advocates and hall his choice as an omen of the snore as which awaits the finances of the country under proper management. As to the venerable law which disqualifies him, they suggest that there is a precedent for supending its provisions given in the case of Albert Gallatin, who was Becretary of the Treasury and a large shipping merchant and shipowner.

Government bonds on Saturday last fouched the extreme 'ague of 119½' for the issues of 1862, but as the market is sympathetic with prices at Loudon there was a falling off at the close of the day in consequence of a define abroad based upon a very unfa orable interpretation of the defeat of the Public Credit Bill, which falled through the refusal of the retiring President to sign it, and must therefore go through all the stages of legislation once more.

On the same day gold was freely seld at 130, the lowest point which if has declined to since 1865 The "drop" commenced the day before with the amouncement of Mr. Stewart's selection for Secretary of the Treasury, but there was a reaction from this figure when it was discor-

Mr. Stewart's selection for the figure when it was discovered that a serious obtacle existed to his administration of the office. The doubt and the uncertainty as to the settlement of the question were reflected in a very unsettled market up to the close of business on Saturday evening. Cash gold became less abundant as the week advanced and in the heavily oversold condition of the market, caused by the decline in the premium, the activity in loans was quite noticeable, the carrying rate ranging down as low as one per cent, just before Clearing House time on the last day. On Saturday the transactions in gold reached the enormous sum of \$122,000,000.

The money market was active at the full legal rate of interest which in some instances was exacted in crin or with the addition of a commission of one-sixteenth to one-sighth. At the close there was an exist recling, and loans on call were made at six per cent. on government collisterals. The weekly statement of the bank as pre-rented yesterday afternoon is not a favorable one, the item of loans being increased \$700,000, against a decrease of \$23,000,000 in specie and legal tenders. The decrease in specie is due to the large customs payment, and in legal tenders to the withdrawal of money by the country banks in preparation for the expocted demend for a quarterly statement. The deposits have fallent of \$2,600,000 and the discreance, as compared with specie and legal tenders, is, doubtless, due to the withdrawal of which are funded with decrease in substitutions payment, and in legal tenders, is, doubtless, due to the with the prefer and legal tenders, is doubtless, due to the with the prefer and legal tenders, is, doubtless, due to the with the prefer and legal tenders, is, doubtless, due to the with the prefer and legal tenders, is doubtless, due to the with the prefer and legal tenders, is doubtless, due to the with the prefer and legal tenders, is doubtless, due to the with the prefer and legal tenders, is doubtless, due to the with the prefer and legal tenders, demand for a quarterly statement. The deposits have failen off \$2,600 600, and the discrepancy, as compared with specie and legal tenders, is, doubtless, due to the return of funds withdrawn for speculative purposes. The stock market was subjected to a "bear" attack commencing in the early portion of the week and iss limit the opening of business on Baturday morning, when, the object of the movement having been attained, there was a general "covering" of the shorts, resulting in higher prices and a firm market at the end of business. Senthern securities were improved, in sympathy with the better prices for government bonds. The Louisianswere the feature, in conequence of a large investment demand, resulting from the fact that the adjournment of the Legislature put an end to the fear of new issues of bonds.

Mrs. Lincoln's Pension. the Legislature put an end to the fear of new issues of bonds.

[Frem the H. Y. World of to-day.]

Maken 6 - Wall street affairs were disturbed to-day and the course of the markets was contrary to general expectstion. Government bonds were basely steady in this market and lower in Europe, gold advanced, stocks declined, and the money market was exceedingly cary. The conjecture that the nomination of Mr. A. T. Stewart, as Secretary of the Tressury, would have a favorable effect on our national credit in Europe was not verified by results. Government bonds declined in Europe in day on receipt of the news. The five-twenty bonds of 1862, which opened at \$3%, declined to \$3, and the market was reported heavy. The pressure to repeal, or, rather, modify the law which disqualifies Mr. Stewart for bolding the office of Secretary of the Tressury is universally condemned.

The steady advance of our bends in Europe is count. The steady advance of our bends in Europe is remarkable, and the progress towards par in gold has been more rapid than expected by even the most sanguine believers in the value of our bends.
