In expectation of a peesible statement on the ist of April they are c-ntracting their loans, and a e therefore less accommodating to the public. This movement is also rendered necessary as a preparation for quarter day, when large deposits are generally withdrawn from the bonks to meet usual country and other payments. This is the cause of the activity which has characterized the outside market during the current events, and of the consequent hardening of the rates for a certain class of loars.
