FRANKLIN INSTITUTE MERTING .- This Society has been accused of old forvish tendencies and unduc tompolence; but however such a character mas have been deserved in former times, it can with have been deserved in former times, it can will little show of Justice be assigned now. Gertainly the proceedings of last evening showed an emi-nent vitality and wakefulness to the interests of the manufacturing industries and our community

at large.

After the reading of the minutes, a report was precented from the Board of Managers embodying, a plan and regulations for the organization of sections in the institute for the special development. of sections in the institute for the special development and discussion of particular subjects, such as chemistry, engineering, photography, microscopy, &c., by means of which the usefulness of the Institute might be greatly enlarged, as thus at the meetings of each section those subjects retaining only to that section would be as thus at the meetings of each section those subjects pertaining only to that section would be discussed, and thus each subject would receive an attention and develop an interest which was out of the question in a general meeting, where every subject was brought forward, and each, therefore, was confined to a very limited death. therefore, was confined to a very limited devel-These plans and rule were printed, and opment. These plans and rule were planted, and were distributed to members, and will be furnished to all on application at the Institute.

A biographical notice of the late Prof. A. D. Bache was then read by Prof. Fairman Rogers, in

accordance with a previous resolution of the stitute. This essay was of great interest and full of valuable information in connection with the history of the Institute and of the progress of Bache was so intimately connected.

A report was then read from a committee appointed to make application to the Legislature for the use of one of the Penn squares. The committee reported that they had presented a memorial, of which the following is the substance: They ask this grant of one of the Penn Squares for the following reasons:

1st. It is believed that of all institutions of learning and education this Leating to the penning of the square of the same of the sam

such a grant, in view of what it has already accomplished.

By its exhibitions of American Manufactures, originated by it, and discontinued of late years only on account of the lack of suitable accommodations;

By its experimental researches, recognized throughout Europe and in this country as of standard anthorities.

out Europe and in this country as of standard authority;

By its library of technical works, its capinet of models, etc., collected after great labor and expense:

By its lectures for scientific and technical instruction, its drawing schools, etc.—All of which have tended to the advancement of the Mechanic Arts in the State of Pennsylvania, and especially in the city of Philadelphia, which owes its present position and rapid increase of population and wealth mainly to the manufactures for which it is justly celebrated.

2nd. As the Penn Squares were given by the Proprietary, among other objects, "to be sites to Schoolhouses," it is submitted that in no "School-house" can the mechanics, citizens, and apprentices of the city be so well or so cheaply instructed in that which portains to their several callings, as in the Franklin Institute, founded expressly, as the latter part of its corporate title imports, "for the promotion of the mechanic arie;" and that without such instruction as can be afforded only by it, or by kindred institutions (which thus supplement the common school system), our mechanics cannot, as a class, compete with those of other cities more fortunately situated in this respect, in the acquirement of that technical knowledge inseparable frem further advance.

Your attention is here respectfully called to the

chanics cannot, as a class, compect with all control cities more fortunately situated in this respect, in the acquirement of that technical knowledge inseparable from further advance.

Your attention is here respectfully called to the efforts made elsewhere in the same direction, to wit:

In Boston, which has an Institute of Technology, a Beneficiary of the State and city, by large grants of money and of land.

In New York, where the Cooper Institute and Astor Library have been richly endowed.

In Baltimore, where the Peabody Institute and the Maryland Institute are also dargely endowed; all of which institutions are influential agents in the dissemination of technical and scientific information to the artisans of those cities.

Brd. The extended space and central location required by such an institution as the one we represent, in order to properly fulfil its object, can nowhere be so well obtained as in one of the Penn Squares, which, as you are aware, are situated at the juncture of the two principal thoroughfares of the city, and thas afford ready and convenient access to mechanics and manufacturers in all parts of the city.

At the same time, the buildings to be erected thereon by the aid of that pecuniary support which, it is believed, will be rendered by the community at large for such structures, may be made ornaments to both the noble avenues referred to,

In considering the claim thus put forth, the fact should not be overlooked that hitherto the Franklia Institute, with large annual expenses, has been supported solely by voluntary contributions; and that thus mechanics and artisans of limited means have been enabled at a very small annual expenses, has been supported solely by voluntary contributions; and that the mechanics and artisans of limited means have been enabled at a very small annual expenses has been supported solely by voluntary contributions; and that the mechanics and artisans of limited means have been canabled at a very small annual expenses to avail themselves of its advantages.

And

The report of the Resident Secretary, Prof. Morton, was then read, in which the progress during the last month and the present condition of the Sucz Canal was; described. (This was of the Sucz Canal was described. (This was supplemented by some interesting remarks by Mr. Robert Briggs on the same subject). The great breakwater and sea-wall at the harbor of Brindisi in Italy, now nearly finished, was then described, this, like the preceding and following reports being thereted. points, being illustrated by diagrams projected

Other engineering works, native and foreign, were then noticed; and next in order various mechanical improvements were exhibited and mechanical improvements were exhibited and described, as Chameroy's fluid meter; a safety and regulating stopcock by Mr. Stratton, of this city, calculated to avoid the destructive actions which sometimes follow from the escape and

which sometimes follow from the escape and ignition of gas in buildings: Gwathmey's cotton gin, with samples of its work; silk raised in Cali fornia; safety bathing apparatus, &c, &c.

The latest scientific discoveries were then narrated and some curious optical effects exhibited. After the report, a motion was presented and unanimously carried, to the effect that a remonstrance from the Institute chandle of the consented and unanimously carried, to the effect with a remonstrance from the Institute should be conveyed to the State Legislature against the passage of an act now pending which would enforce the application to steam bollers of certain passage of the state of the community. tented attachments, thus taxing the community at large for the benefit of a few individuals, and at large for the belief of a wind much assistable hing a very victors precedent. After this the meeting adjourned at a late hour, having, we think, performed good work and much of it.

FIRE IN THE FIFTH WARD -This morning, about half-past two o'clock, a fire was discovered in a large five-storied building, No. 114 South Second street, occupied by M. B. Dyott, manufacturer of lamps and chandeliers. The flames broke out in the tin shop in the fourth story, and burned through into the third story. A hole was burned through into the tink story. A note was also burned in the ceiling of the second story. The building was but slightly damaged, and the loss is fully insured in the Franklin Insurance Company. The stock was considerably damaged by water, but the loss cannot be estimated at present. The stock is fully insured in the Franklin, Spring Garden and Ætna Insurance Companies. The fire had evidently been smouldering nies. The fire had evidently been smouldering for several hours before it was discovered.

NARROW ESCAPE.—A fire occurred at a house on Stafford street, between Seventh and Eighth streets, about 3 o'clock yesterday afternoon. The flames, which had originated from the stove, were extinguished before much damage had been done Three small children had been left in the room They were found by Bergeant McGlenn and Policeman Lowry, lying on a bed in an insensible condition from the effects of the smoke. They were taken cut and by the use of the proper vested to the prope remedies they were restored to consciousness.

ATTEMPTED SUICIDE .- John A. Ferguson was arrested last evening at Sixth and Brown streets for drunkenness. After being locked up in th Eighth District Police Station House, he swallowed poison. The act was discovered, a phy sleian was summoned, and the would-be suicide was prevented from accomplishing his purpose.

VIOLENT Assault .- Frank Fagan and William Harmer were before Alderman Carpenter yester day, upon the charge of having knocked down and badly beaten a young man at Sixth and Spruce streets, on Monday night. They were held in \$600 bail for a further hearing.

A MISTAKE.-It has been announced from Washington that Joseph P. Smith has been appointed Assessor of Internal Revenue for the First District. This is a mistake. The appointment is Joseph R. Smith for the Twenty-first

DISORDERLY HOUSE .- Annie Woodward was ar rested yesterday, and taken before Alderman Carpenter, upon the charge of keeping a disorderly house, No. 246 South Water street. She was committed for trial.

WALKED OVERBOARD. - This morning about three o'clock Annie Allen, aged 55 years, walked into the Delaware at Queen street wharf. She was rescued from drowning by the sailor, be-longing to a steamship lying at the wharf.

-CORONER'S INQUEST .-- The inquest upon the bodies of Mrs. Margaret Kidd, Thomas Kidd and Mies Margaret Kidd, who were killed by the falling of the house in Loid street, Twenty-sixth

Ward, was resumed this morning:

Gabriel Kidd testified—Mrs. Given rented the house to us, and we lived there about a year; I never looked at the house much; my wife wanted Mrs. Given to repair the house; have heard my vife say that the house looked as if it would fall down; there was a large crack in the wall in the first story, and it was stopped up with old rags; heard my wife say that she had notified Mrs. Given to fix the house; it was raining hard the night before the accident; there was a little water in the cellar; we went to bed about eight o'clock that night; we all slept in the same room on the second deep

on the second floor.

Sarah Ann Kidd, testified—My mother had told
me that she had asked Mrs. Given to fix the house; when we moved in a mon fixed some-thing about the house; the house had settled backwards so that anything dropped on the floor

would run back.

B. F. Wright, Building Inspector, testified—
Have made an examination of the rules; the west wall had bulged in, and the northwest corner had fallen in; it seemed as if water from the hydrant in the next yard had soaked in; the east and south walls are all perfect and good. about one foot thick, and of good material; the west and north walls were stone a foot thick; the west cellar wall gave way; I think that it had been giving for years; the foundation of the west wall gave way, I think, by being undermined by water

John F. Shermer, Building Inspector, testified that in the northwest corner the foundation was gone; the water and frost had destroyed the adgone; the water and tross had destroyed the ad-hesive quality of the mortar, and then there was nothing to hold it; should think that the danger ought to have been seen a year ago, although the foundation might have given way under the cellar steps; it was where it would not likely be

Felix Taylor, residing at No. 420 Bangor street, felix Taylor, residing at No. 420 bangor streets that the building was put up 25 years ago, when no exactness of walls was required; never considered it dangerous; had heard the women say that it was, and that one corner was

women say that it was, and the safe giving way.

The verdict of the jury was:

"That the said Mrs. Margaret Kidd, Miss Margaret Kidd and Thomas Kydde came to their death by the falling of their dwelling house, in rear of 1412 Shippen street, March 11, 1865.

"The evidence showed that the same was caused by the incorprise of the brilding, and the neglect by the insecurity of the building, and the neglect of the owner to attend to it after being notified." FATAL ACCIDENT.—A boy named Gibbs, aged

4 years, while playing in the yard of a house at Clement and Washington streets, this morning, was killed by a book-case falling upon him. An Owner Wanteb .- A baker's wagon, filled with bread, found yesterday, at Front and Wal.

nut streets, by Policeman Williams, awaits an owner at the Central Station. RECKLESS DRIVING .- John McCann was ar rested yesterday afternoon, at Fourth street and Girard avenue, for reckless driving. He was fined by Ald. Eggleton.

VELOCIPEDE TOURNAMENT.-The mammoth Skating Rink, at Twenty-first and Race streets which is now used as a Velocipede School, under the management of Mr. J. W. Post, was crowded with ladies and gentlemen last evening, the oc-casion being a velocipede tournament. The en-tertainment met the anticipations of all the visitors, and the trials of skill were as interesting as tors, and the trials of skill wore as interesting us the efforts of novices were ridiculous. There were eleven entries for the prize—a silver goblet gold-lined. The judges being selected—Captain Searles, P. W. H. Deshler and William Phillips the trials commenced. The decision of the judges was rendered upon the skill of the contestants in these seven points of volocipeding: Mounting, graceful riding, fancy riding, daring feats, dismounting, slow riding and fast riding.

Mr. Richard Peters carried off the prize, he having excelled in all the points, though there others of the contestants who were not far chind him in skill. He made the distance of twice round the Rink (one-eighth of a mile) in 56 seconds. The tournament proved a most pleas

JOHN B. GOUGH.-Those who have not already secured seats to hear this eloquent speaker should lose no time in doing so. We are informed that more tickets were sold yesterday than were ever sold in one day before for any of his lectures, although the demand is always

OITY NOTICES.

A MOST striking proof of the progressive spirit of the times may be seen in the marvelous perfection of that remarkable invention, the American Buttons Hole and Senise Machine, when compared with any of the old mechanisms in this line. The rapid development of improvement as seen in this new and spiendid machine, and the astounding degree of excellence attained, are, indeed, almost incredible. And what is most gratifying in this connection is the fact that this is altogether a Philadelphia institution, the Company being located here, with their factory at Twentieth and Washington avenue, and Salesbooms S. W. Cor. of Flexibith and Chestis Tis. We commend this extraordinary machine to the notice of all who are interested in such matters; and to those who deelgn purchasing family machines we say, by all means examine the American.

CUBA AND SAN DOMINGO.

Recognition and Annexation. The Washington correspondent of the New

York Herald says: The House Committee on Foreign Affairs had up for consideration the resolution introduced by General Banks relative to the recognition of the independence of Cuba and the annexation of St. Domingo. After some discussion it was decided that before making any report to the House on these subjects the committee should call upon the Secretary of State for the latest official information in the department relative to the condition of both Cuba and St. Domingo. Mr. Banks, the chairman of the committee, is anxious, when he makes a report, to be able to back it up with such official data as will secure its process in the House and he is account. its success in the House, and he is confident that the State Department has information of such a character as to warrant the aunexation, peace-fully, of St. Domingo and the recognition of the independence of Cuba.

There is an old English statute which prohibits people from getting married after a certain hour in the day, because such a solemn obligation ought to be entered into only when the parties

REWARD

DETECTING

COUNTERFEITER

HELMBOLD'S BUCHU

HOW TO DETECT IT.

The Genuine has my Name and Address Blown in Three Sides of Bottle;

THE COUNTERFEIT HAS NOT.

Unquestionably the business has been carried on for some time, and to a considerable extent, and the selling has been managed by experts, who depend upon the external appearance, without regard to the quality or con

tents of the bottle.

My conclusion is that the expensive wrappers were stolen, or a transfer of the original plate taken by a dishonest engraver. I have been in consultation with the leading Glass Works in regard to it, and they assert that they have never made any bottles for any one the pattern of the

purious. I have purchased all my bottles, for twelve years, from Messra Sheets & Duffy, Konsington Glass Works, and each and every bottle has the following plainly blown on three sides of the bottle: "H. T. HELM BOLD'S GENUINE FLUID EXTRACTS, PHILADEL PBIA. THE SPERIOUS HAS NOT, and in the genu-ine the lettering can be felt without removing the wrapper, in a majority of cases.

My name and address is not blown in the sparious, and I have never used any bottle without this precaution.

Thus far it is evident that the SPURIOUS has emanated from SMALL JOBBERS or PEDDLERS, of preparations, who, when questioned, reply "that they never take bills or receipts when procuring their sup-plics," which causes difficulty in tracing. My Buchu it no patent medicine or secret con

but a superior preparation, a concentrated fluid extract of the (Diosma Crenata) Buchu Leaves. Any druggist, physician or patient that is at all familian with the properties of the Bucha Leaves would have no difficulty in DETECTING THE FRAUD, as not the slightest regard has been paid to the contents of the spurious bottles, but simply a colored liquid with little taste

A very important item to druggists is that quite a quartity of the epurious has already fermented, and such a result has never occurred to the genuine. I cannot imagine what impression the afflicted may have formed of me, who have been so unfortunate as to have purchased the spurious, or the injury done my name an ousiness by this counterfelt, which possesses no modicina virtues whatever. But my friendly relations and extensive acquaintance in the trade, and the precautions ave taken, will prevent its recurrence. I will greatly appreciate it if the druggists will examine their stock a once and report. I WILL PROJECT SUCH FROM LOSS, AND WILL CAUSE TO BE ARRESTED DEALLOSS, TO STAND WILL THE REPORT OF THE PROPERTY OF THE PROPE ERS FOUND WITH THE SPURIOUS FROM THIS

Any information derived leading to detection will be thankfully received, and receive a reward of ONE THOUSAND DOLLARS.
