If this be not the result of the very bad weather to-day it may perhaps indicate that the crisis which the atened the money market has already reached its climax and that a gradual easing up may be expected from day to day.

The condition of trade generally is very unsatisfactory, from day to day.

The condition of trade generally is very unsatisfactory, whilst in some particular branches it is regarded as quite critical. What the end will be it is about as difficult to predict as it is to define the cause, but the simple fact is there—a very limited trade for the list of April, and a very uncertain prospect of improvement in the norgaturure. The result is very sensible on the money market, and now that preparations have been made for quarterly indebtedness, and speculation have been made for quarterly indebtedness, and speculation have been made. preparations have been made for quarterly indestedness, and speculation has well night died out, the process of recuperation will probably be very rapid. The rates for loans on call varied between 7 and 8 per cent, on Governments and 869 per cent, on mixed securities. The discount rates for prime mercantile paper ranged between 10613: er cent, and the bulk of this busicess was done on the street.

Government bonds were weak. Gold at 12 M. stood 131%. Stude Loans were steady, with sales of the first series at 104 the second series at 104%. City Leans—new issue closed at 100%.

Rew York mency Market.

(From the New York Herald of to-day.)

Marchi 28.—The ensuing week will be one of deep interest to those who are concerned in the course of events in Wall street. The great annual settling day, the first of April, happens in its midat, and the contraction of the lanks on the one hand and the rapid movements of correct on the other will create a spasm in the money market which it will be well to prepare for in good season of the year among the farmers and the manufacturing interests, and the hal ance on hand to accommodate their city customers has been very small. Currency has gone to Boston to be distributed to the Eastern mills and to Philadelphia to be distributed to the Eastern mills and to Philadelphia to be distributed to the Eastern mills and to Philadelphia to be distributed to the Eastern mills and to Philadelphia to be distributed to the Eastern mills and to Philadelphia to be distributed to the Eastern mills amount. The country banks have been drawing down their balances with us in meeting the first calls of this general demand, and much anxiety is felt as to the extent of the stringency which will result when the final movement comes.

The weekly statement of the associated banks is not as unfavorable as was expected in some portions of the surface of the large tenders has been \$3,000,000, the banks have expanded to the extent of more than \$200,000, showing the effort which these institutions have been making to accommodate the mercantile demand of the city in the face of the heavy calls upon them from the outside country. The deposits have failed of the sum paid for customs during the week.

The decrease in legal reserve is about \$2,500,000, leaving the banks about \$8,600 in excess of the legal reserve as a basis of operation for the coming week, which, as it includes the left day of April, the great settling day of the country, will be a very close one for the working of the money market. It is fortunate that the aggravation of a quarterly strement is not added to the natura

stid at 100.

(Special Despatch to the Philadelphia Evening Bulletin.)

New York. March 29.—The stringency in the Money Market shows no abatement. Loans of all classes of collaterals, not excepting Governments, are made at seven per cent. coin, and for miscellaneous and stock collaterals an additional shave of a sixteenth to an eighth is asked. There is a certain class of concervative bankers, however, who loan to the extent of their ability at seven per cent. currency. The banks are in no condition to render assistance to norrowers, as they are poor and obliged to respond to the calls of country correspondents, which have drawn the currency balance down to an alarming degree. That they are in receipt of a certain amount of currency is indicated by the decrease in the legal tender item of \$219,000. The remainder of the items in the associated bank statement reflects a continued expansion on the part of the banks, in the fact that the loans were increased during the week \$811,000, against a decrease in deposits of \$2,331,000, of which the specie loss constituted \$3,189,000. The legal tenders constituted precisely 25 per cent. of the currency deposits and the circulation combined. In discounts there is rather more movement, prime paper ranging from 10 to 12 per cent. Government bonds are dull and heavy, prices 4,6% lower. The continued activity in money prevents operations in the market, and prices are allowed to take their own a course. Gold has been firm at 131½ to %, owing to the possible difficulty between Prussia and France, growing out of the probable accession to the throne of Spain of the Duke Montpensier. Cash gold loans were made at two per cent. for carrying to four per cent for borrowing. The majority of the loans made are fiat. Stocks are generally duli, but prices remain eitone, considering the activity in money. movanced to the attar, and the celebration of Sol-emn High Mass began, the music being set to Mozart's Twelfth Mass. Father Morrill was Celebrant, Father Noves Deacon, and Father Mines Sub-Deacon. Incense was offerep during the singing of the Gradual, and the Gospeller read the Gospel for the delt, attended by two acolytes bearing the Gospel Lights, which, together with the Paschal light, had been beautiof the congregation. After the singing of the Creed (Merbeckes) Father Mines proceeded to the pulpit and delivered an excellent sermon on the uture great Easter of the faithful, at the terminaproceeded to administer to the choir and general congregation. After all had communicated, Mozart's magnificent "Gloria in Excelsia" was done with a force and precision which rendered it very grand; the ablutions were performed, the blessing was given, and the procession, having reformed in the same order as on entering, retired singing the "Nunc Dimmittas." Altogether this was one of the grandest and most solemn functions that has yet been witnessed in St. Alban's Vespers were sung at 4 o'clock in the afternoon,
