The principal front of the building, containing the main entrance doorway, is on Third street. There is a tower on the northwestern corner of the building, projecting some distance above the gothic roof, which is covered with slate. The structure is substantially built. The site of this building was formerly occupied as a board-yard, and at a later period as a place for pork-packing, there being long ranges of low sheds for this pur-pose, all of which were often complained of by the residents in the vicinity as a great nui-sance. The present edifice is an ornament to sance. the city. Its commanding steeple, which one hundred and minety-four feet high, can be seen a number of miles up and down the river Delaware, and it will be readily recognized as one of those landmarks indicating the progress of civilization and religion. The building is of civilization and religion. The building is enclosed with a neat iron railing. The work-men are busily engaged in forwarding the work in the interior, and it is stated that it will be finished by the middle of June. In the niche back of the pulpit will be a splendid allegorical painfing. The ceiling is done in *fresco*, and along the centre are emblematic representations of an appropriate character. in a very short space of time. A Remarkable Episcopate. It is well known that the Bishops of the Methodist Episcopal Church in this country are not diocesans, but exercise a joint and general authority over the whole church. One of them, Bishop Kingsley, is about to start on a course of Episcopal visitations, which affords a striking illustration of the breadth of the field over which our American Methodists have extended their missionary operations. He goes first to Colorado, where he will or-gen, to superintend the meeting of Conference. Then back to the California Conference, and thence to Shanghai, in China, and from that to the System in Germany, Deumark, Sweden, and other European countries. This visitation round the Bishop expects to reach home again, if life is spared, in September of next year. In the programme of this tow the days of the moth are specified on which each integring is to be held; and such is the "correct-neest of modern arrangements for travel that very lithe anorden method is to a followed in the set of modern arrangements for travel that meeting is to be held; and such is the correct-ness of modern arrangements for travel that very little apprehension is felt of a failure in the appointments. We are often told that the drun-beat of the British army is heard round the entire world, but we have never heard of a tour of inspection in that organization to remplete the circuit of the globe in fifteen menths.
