June 2.—The public debt statement, just published for the month of June, shows the remarkable decrease of \$13,384,777 compared with that of May 1, and \$22,050,646 compared with March 1. The coin belonging to Government amounts to \$81,383,469 against \$92,031,732 on May 1, showing a decrease since that date of \$10,192,263. The certificates of coin deposit were \$23,340,720 on June 1, against \$16,307,200 on May 1, showing an increase of \$7:229,000. The currency on hand amounts to \$19,984,556 on June 1, against \$7,895,564 on May 1, showing an increase of \$12,000,000 since May 1, resulting from the sales of gold. The government has lost \$10,192,263 in gold coin, and gained as an offset \$12,000,000 gold, this movement is not calculated to strengthen government credit. Among the subjects brought before the meeting for consideration was that of the condition of the Indians, and the duties and responsibilities devolving upon the society from the late action of President Grant placing them in a position to carry out their views in regard to governing the Indians. The Friends consider that their position is one of much responsibility, but, while they fully appreciate the difficulties to be overcome, they preciate the difficulties to be overcome, they express full faith that they will meet with success in their efforts. The number of Indians who have been placed in their charge is much less than has been generally reported. JUNE 2.—The speculation in the gold market was
"bearish" in its tone, in sympathy with the general drift
of the feeling to-day in Wall street. Immediately after
the opening of business there was some irregularity,
owing to the decline of five-twenties in London, based on
the higher quotation of gold last night, and in a flurry
produced by apprehension arising from this cause there
was a rise to 139%, the highest point of the day. From
this figure the market slowly settled under the bear influences referred to, which were helped by the telegrams
from Washington announcing a reduction of nearly
fourteen millions in the public debt for the month of
May.
