or intermittent character of the traffic or the engineering difficulties of the ground to be under or levelling them, and will perform its ment being now prosecuted with complete

stantial posts, which are ordinarily about one hundred and fifty feet apart, but the interval

indeed, not unlike an exceedingly stout electric trial was overruled. It is understood that a telegraph; and there is something almost droll in the sight of a regiment of well-laden trucks bill of exceptions will be filed, and the case taken to the Supreme Court. or boxes passing gravely along it at stated intervals, and at regular pace, much as if they were at aerial drill. The most important point in Mr. Hodgson's invention is his method of Baltimord Railroad ran into a hand-car loaded in Mr. Hodgson's invention is his method of passing the points of support, which consists in so curving the frame of the truck or box as to make the centre of gravity come under the rope. So admirably is this managed that some of our leading engineers have been discussing quite recently the possibility of constructing a stout wire tramway between Dover and Calais, stont wire tramway between Dover and Calais which should be supported from a line of pillars sunk in mid-ocean and along which

passengers could be conveyed. The cost would be comparatively small, and suspensory trains could, it is argued, be despatched across tion to travel will be caused, as everything the Channel without difficulty or danger.

"It should be stated that where heavy loads must necessarily be carried, a pair of stationary supporting ropes, with an endless running ary supporting ropes, with an endless running hand-car, loaded with telegraph cross-arms, loaded with telegraph cross-arms, rope for the motive power, are employed, and that by these means as many as a thousand tons per day can be easily conveyed. The cost of mail car down an embankment of five feet. erecting these transways in England, and of supplying motive power and rolling stock, is from £250 a mile for carrying fifty tons a from £250 a mile for carrying fifty tons a day, in boxes holding half a hundred weight each, to £1,500 a mile for one of the doublerope lines, to carry one thousand tons a day, in boxes or trucks holding six hundred weight

each. For all districts where there is traffic but where it would not pay to construct a railwhile playing at a fire-place, overturned a potway, the wire tramway is particularly applicable; and, as will be readily understood, whereever there is standing room for posts, there a traders in copper for putting one up for them, which should run through an African forest, and over an African innels, down to the coast.

HAVANA, July 12.—The recent decree closing ports in this island retards the receipt of morning that the coast.

There are in this harbor forty-four lasses. line can be erected. A recent application from traders in copper for putting one up for them, and over an African jungle, down to the coast, llustrates the varied circumstances under which the new system of transport may be apand the company of Benedict Hats were used by the Dorics probably as long ago as the time of Homer, but only by the etter class of citizens when on a distant jour-

ney; the Elgin marbles show that the same custom prevailed among the Athenians. The Romans used a cap at their sacrifices, but hats with brims when journeying. In the thirteenth century Pope Innocent allowed cardinals to use scarlet hats, and about the middle of the ifteenth century hats became common in France, and soon after in the rest of Europe. St. Clement is said to have invented felt guard the heads of pilgrims against inclement The first authentic account of hatters appears during the middle ages, the earliest spoken of being at Nuremberg in 1360. The atting trade of America is noticed first by the ondon Board of Trade in the year 1732. In he lifteenth century, hats in Great Britain were alled vanities, were imported, and cost as high as forty English shillings, which at that time

ultimatum about the year 1700, after, which three-cornered hats came in vogue. The hatters' annual festival is November 23d, being the day of Queen Elizabeth's grant to the hatten of London. From our late editions of Yesterday By the Atlantic Cable.

Briest, July 12.—The steamer Great Eastern, up to this morning, was off Newfoundland, and only 30 miles distant from the point where the splice is to be made. The signals were good, and leads well

was a large sum. Broad-brims reached their

and all well.

LONDON, July 12.—Messrs, Bright and Forster have withdrawn their resignations, which they recently tendered to the Reform Club.
