It Department copies of all letters written by come on the market, the logic of the advance is obvious. After North Carolinas, new Tennessee bonds were most inquired for and strongest.

Gold opened this morning at 135%, and advanced quickly to ½, from which it fell again to %, and ranged during the greater part of the day between these extremes, reaching 135% at five o'clock. The tendency to the higher figure was due in part, besides the heavy shipments of specie, to the parliamentary crisis in England, which is fraught with the gravest danger.

The report of the Gold Exchange Bank for to-day furnishes the following items: Gold cleared, 860,203,000; gold balances, 81,755,67; currency balances, 82,109,844. The disbursaments of coin interest were 822,042. The steamer Weser took with her, \$350,000 in specie, and the Missouri 8480,000; making an aggregate of \$330,000.

Foreign exchange is steady, without change in rates. The money market worked during the early part of the day similarly to yesterday, the rate on call loans being six per cent. on government and seven on stocks. Later, however, owing to the heavy disbursements by the Treasury on account of the bonds purchased yesterday, there was a relaxation from those figures, and transactions are reported at five and six towards the close. Discounts are also easier, the extreme range being eight to twelve per cent. with the bulk of business hetwen opened at 94, and sold up to 951, with large Senator Sprague, containing charges against blocks selling at the extreme figures.
