THE FALL ELECTION.

In a few weeks the political campaign in this-State will be actively opened, and it becomes | be classed all accidents arising from defective | gravity of the issues which are to be presented to them. So far as the city of Philadelphia is concerned, no argument seems necessary, beyond a simple appeal to the Democratic ticket itself. The Democratic party has long been thrown down an embankment, and a number now, for the first time, boldly hoisted their. black flag and demanded that not only their party, but the whole community, shall ruled by their representative men.

The open and desperate resistance to the honest and fair provisions of the Registry law, in which all grades of the Democracy have united, is a confession of fraudulent purposes, which there appears to be no longer any desire to conceal. It is the wish of the Democracy to force their Aherns and Stewarts on the decent people of Philadelphia, by the free exercise of that terrorism and rascality which were so dis-gracefully exhibited last fall, and this wish is so clearly demonstrated that he must be a very foolish man indeed who cannot see and under-stand its signs. Philadelphia's individual work such as the must be a very foolish man indeed phia's individual work stand its signs. Philadelphia's individual work which there appears to be no longer any desire

It is not a contest in which men may choose indifferently between men of equal personal respectability, for the Executive or the Judicial positions which are to be filled. For both of these high positions the Republican party has put forward men already tried and approved in their re-spective offices, against whom our adversaries labor in vain to find any accusation. Governor Geary won the confidence and affection of the people of Pennsylvania, on the battle-fields of of the Rebellion, in defence of the country inpon which Asa Packer coolly turned his back in its dark hours of need. RAILROAD CRIME.

There are classes of railroad accidents which cannot be thoroughly provided against by any human ingenuity or care. Such accidents may be called railroad misfortunes. There are others which can be foreseen and prevented and palliated. These are properly to be rated as railroad crimes. Among these last, are to GEO. J. HENKELS, or misplaced switches, and the number of these is very large. The long list is increased to-day, by a serious, though, for a wonder, not fatal accident on the Hannibal and St. Joseph's road, in Missouri. On Thursday, a train was | 1301 and 1303 CHESTNUT STREET of passengers were seriously injured. The mv7-3m4 cause and excuse for the disaster was the old one of "a misplaced switch."

We class accidents from this cause among railroad crimes, because they need never occur. For more than two years the "Safety-Switch," panies of this country.
