THIRD PARTIES. It would be astonishing, were it not so con mon, to see the tendency of small bodies of men, or special classes and interests, to magnify bemselves in their own eyes, until all other things grow small before their distorted vision. A few men, or a single class of men, anxious to attain some end which is of paramount importance to them, quickly persuade themselves that they have but to sound their trumpet and raise their standard, to gather the great masses of the people around them. Neither philosophy nor experience suffices to teach them that what is great to them may be very small to all the rest of mankind, and that the argumost vital truth, have but little weight or interest for the millions around them, engrossed with other questions, and swayed by other

Our enterprising trans-Delawarian neighbors have actually put Philadelphia in the background, for once. Camden has a Paid Fire Department. Back went the price to 1334/c and thence it r point by point, sometimes slowly, sometimes quickly unrestingly, to 1354/s. The consternation of the "shot was terrible. JACMEL, July 17.—The Committee of Public Safety of Jacmel have just decided a case with which it is important that those trading with this part of 'Hayti should be made ac-quainted. Some time ago, the revolutionary authorities at Bainet seized the Dutch vessel Margaretta in that port, on the ground that, knowing the port was not open to foreign commerce, she had, nevertheless, entered it, discharged her cargo, and taken in 300 bags of coffee, thereby violating Article discharged her cargo, and taken in 300 bags of coffee, thereby violating Article 4 of the law regulating the customs. The captain of the vessel protested against the selzure, and the case was taken before the Correctional Tribunal, which, after a hearing decreed the confiscation of the vessel and her cargo. He then appealed to the Committee of Public Safety, but they have confirmed the judgment of the Tribunal, and ordered that the vessel and the coffee be 80ld according to the terms of the judgment. It seems, then, that taking advantage of the proclamation of blockade by President Salnave, the revolutionists are prepared, when it suits, their purpose, to seize vessels entering the ports held by them, and to confiscate such vessels and their cargoes.

On the 3d inst., a war steamer appeared off this port and fired a blank shot, which was responded to by a shot from the Grand Fort. The steamer then moved beyond the range of the cannon at the fort and hoisted the Haytian flag, upon which she was recognized as one of Salnave's vessels. Preparations were immediately made to repel an anticipated attack, but after passing slowly along the outer limits of the harbor, the steamer left, going in an easterly direction.
