LETTER FROM ROME.

(Correspondence of the Philadelphia Evening Bulletin. Rome, Sept. 27, 1869.) The Eternal City is unusually active for the month of September. In every direction can be seen the greatest amount of bustle and work going on.

Hotels, boarding-houses, and apartments are being cleansed, refurnished and prepared in the most tempting manner for the crowds of strangers, especially Americans, who are expected to visit Rome this winter.

While on this subject of banking and having cheques cashed in Rome, I will mention a fact which is well for persons to know, especially ladies visiting Rome.

What commission do you charge? I asked one of the heads of the establishment. "None, to Americans," was the courteous reply, with a polite bow.

Thirteen pieces of that curious old stone, for a long time unknown except by tradition to the moderns.

The ancients were very skillful in their china and glass work, especially the workers of Alexandria, Egypt.

All these facts strengthened the doubts about Murria. To be sure, there was Pliny's description of "Murrhine," which made other learned ones think it must have been a mineral something like fluor spar.

By October the Roman-American circle of residents will be pretty well assembled. Rogers and Ives bring their families back from Perugia the 15th of September.

"Yes, we'll take possession open up this old place, and amez Italy!" The wonderful discoveries at the Emporium—the ancient marble wharf of the Romans on the Tiber—are to me one of the greatest marvels of the present day in Rome.

"The Emporium" belonged to any government it would be made a mine of wealth. It belongs to the Pope, and he will not sell a stone.

The Chapter of that Cathedral is so grateful to Pius IX. for his magnificent gift of superb antique marbles which were reserved for the restoration of the Dome of Charlemagne, that it has ordered the shield of the Pope to be placed ad perpetuum rei memoriam.

Numberless churches in the Italian peninsula have been repaired and adorned with these Emporium marbles.

Within the last few weeks sixteen large blocks of valuable marble have been discovered. One of these is a block of rose-colored oriental alabaster.

While some workmen were employed last week in making excavations in the cemetery of the Malomni, at the cemetery of the Certosa at Bologna, they discovered an Etruscan cemetery about seven feet below the surface.

Another favorable tradition is explained away. The mystery that attended the composition by Mozart of his famous requiem is at last explained by a foreign writer, who has discovered that a certain Frenchman, who lost his wife in 1701, decided to engage Mozart to compose a requiem, which he (the count) meant to pass off as his own composition.
