The ceremonics at the dedication last evening consisted of a vocal and instrumental concert, commencing at Ti o'clock and lasting until balf-past ten, in which several well-known performers took part. The room was then cleared of the benches, and dancing was in-dulged in until after one o'clook. Supper was dulged in until after one o'clook. Supper was shen announced, and the entire company present participated. The affair was one of the finest that has ever taken place in the Twenty-third Ward. Mr. Baird certainly decryes great credit for his enterprise in erecting a building of this kind, as well as for his liberality in entertaining his employes and neighbors.

Successfully Raised.— The steamboat samuel M. Felton, which was sunk in the Delaware near Claremont some time ago, has bein successfully raised, and is now upon more strict of the boilers. The shock reft the heavy tont of the boilers. The shock reft the heavy Tont of the boilers. The shock reft the heavy fron plating along a line twenty-five feet in length, making an opening about an inch in width. The hull was much broken by the rock pushing through the bottom. Ten of the deck beams were literally forced upwards. The broken part was then twenty-four to thirty-six inches wide. When she came to a level bottom the opening diminished about five inches. Messrs. Mason, Hobbs & Co., well-known wreckers, of this city, were applied to, and after much difficulty, succeeded in raising the boat by means of chains and pontoons under the bows, and a bulkhead under the keel. Steam pumps relieved the after part of the boat from water, and then the plating had to be replaced. This required about three weeks, and then the boat was got safely to Wilmington. In a few weeks she will again be making her trips on the river.

CITY MORTALITY.—The number of inter-ments in the city for the week ending at noon so-day was 255, against 171 during the same period last year. Of the whole number 134 were

Cummins, who was found dead at Beck's place and Grover street, as detailed in yesterday's Bulletin. There was no evidence to show that the deceased had been assaulted, and the verdict of the jury was that he came to his death from the effects of injuries received in fall.

A HEAVY STORM.—A heavy storm of rain prevailed during all last night, and most of the time the water came down in a steady pour. The streets and gutters got a pretty good cleaning, and the Delaware and Schuylkill rivers were much swollen, but the water did not rise to such an extent as to cause any apprehensions of a freshet.

THE HOMOCOPATHIC FAIR.—The fair now being held at Horticultural Hall, for the Home opathic Hospital fund, seems to be an entire success, if we may judge from the number and the flattering comments we hear from those who have visited it. A more magnificent display of rich and attractive articles it has never been our lot to witness, and they are has never been our lot to witness, and they are suited to every taste and to every pocket, combining the useful with the ornamental. We understand they are for the most part the result of the unceasing labor for months past of the ladies who now so invitingly display them to the admiration of visitors. These attacked the admiration of the desired that are admired to the second that the second th of the ladies who how so invitingly display them to the admiration of visitors. These attractions, the excellent arrangement of the tables, and the decorations of the hall, with Carl Sentz's deligiful musical accompaniments, combine to make Horticultural Hall a must exceed the place. CITY NOTICES.

WHAT IS THE MOST INTERESTING SUBJECT OF THE DAY?—If this question were propounded to many of the gentler sox, the reply would doubtless be, Matrimony; If to the aspiring young gentleman, if would probably be, Wealth, or the art of meney getting; but if the question were put to our domestic housekeepers, at this season of the year, the answer would cortainly be, Heat; or, How can the most heat be obtained out of the fuel burned during the winter season? To this latter question our reply would be, Purchark A Bravolving Light Bars-Burner. In a brief newspaper article it would be impossible to give a full description of the principle of Base-burning Stoves. The subject, however, has engaged the minds of some of the greatest intellects of the day. The late eminent Dr. Nott, of Albany, some thirty years ago, spent much time and money on the subject of lasse-burning Stoves, and several scientific men in England, France and Germany, have, at various times, devoted much thought and attention to the same subject, and spent agreat deal of money in constructing grates and stoves for the purpose of consuming the smoke, by causing it to pass over a mass of red-not burning fuel. But all these failed to achieve the object of their hopes. The electric telegraph, the great principle of the Baseburner' was also allowed to slumber in comparative obscurity, until summoned into a popular reality and a world-wide success by one of our own citizens. We alloud to the Rovolving Light Base-burning Stove, manufactured by our townsmen, Messra, James Spear & Co., and solid at their waveroqms, Nos. 1116 and 1118 Market street. WHAT IS THE MOST INTERESTING SUBJECT

factured by our townsmen, Messra. James Spear & Co., and sold at their warcroqms, Nos. 1116 and 1118 Market street.

Whatever may have been claimed heretofore, this is the only perfect stove of the kind in America, and indeed we may say in the world, as is shown by the fact that the customer books of the Messra. Spear include names from all over Europe and oven the remotest East, not excepting the Celestials themselves. The Ohinese, in fact, are in such raptures over the Spear stoves that they regard the maker of them as a sort of Occidental Divinity. As the New England fathers used to heap "blessins" on the plous head of good Dr. Wibur, so these devoted Chinamen, judging from our despatches, shout their grateful admiration over the name of Mr. Spear. Nor are they the only persons who bless the name of our enterprising townsman. Every well-regulated kitchen in Philadelphia resounds with his praises.

To purchasers of stoves we need hardly say that the advantages of purchasing from Messrs. Spear & Co. are illimitable. It is like purchasing laces in Brussels, velvets in Lyons and figs in Smyrna—it is getting them at headquarters. A word, to the wise, &c. We may state in this connection that the stoves referred to may always be seen in full operation at Messrs. Spear & and that the latter also manufacture the handsomest and most desirable heater for heating two rooms or more that is made in America.
