A perusal of the "Wants" columns of some of our contemporaries will almost always repay the searcher after philological curiosities. Here are a few recent specimens from the Ledger: "A Girl wants Cooking of Housework?" This is a poyelty Many ing or Housework." This is a novelty. Many servant girls are exceedingly raw, but very few of them will confess that they want cooking. Again: "A good washwoman wants to go out by the day, or take it home." If this worthy

aundress wants to go out, why does she not do it, without informing the public of the fact? And she wants to "take it home." Well, there can be no possible objection to that, if we only knew what "it" is. Another advertiser tells us that "a few gentlemen can have good board with home comforts, also two respectable ladies. with reference." As the "two respectable ladies" have referonces, there can be no moral objection to adding them to the "home comforts" offered darker and more enduring. But the treachery to these few gentlemen. It may be a man, or a woman or a Bloomer. It may even be Dr. Mary Walker; who knows? But there is one ndication that our "Young American Person" is of the feminine persuasion, for it is stipulated that "must be treated as an equal." THE DRAMA. It is a gratifying fact that a revulsion in favor of legitimate drama seems to have taken place in the theatres of this city. Mrs. Drew, having surfeited herself and the public with sensational nonsense, is presenting a series of noble old consedies in a manner that is credit able to berself and to that excellent company New Hotel to Lease. which hitherto this season, has not had a fair opportunity to prove its power. The consequence of this return to the higher class of are formations is a crowded theatre every night. For how long a period these standard plays will attract the public we do not know. Perhaps only for a week or two: but it is indisputable that Mrs. Drew has no reason to be dissatisfied with her present venture H. P. & C. R. TAYLOR, in this direction; nor, as well as we could perceive, has she had cause for complaint when she has tried the same experiment in the past. At the Chestnut Street Theatre Miss Keene is playing a very amusing version of one of the oldest and best of French conicdies. The play is unique in its character, and it is interesting i

as a curious representative of a school of legitimate drama with which our people are not familiar. It affords an entertainment, too, of the most enjoyable kind; for the text is filled with wit and humor, and the situations are funny even to grotesqueness. The Walnut after having given to Edwin Booth and Edwin Forrest opportunities to play two if the most successful engagements ever unrtaken by those excellent actors, now promises to present Miss Bateman, who brings with her from Europe a great reputation as an actress who has fulfilled the prophecies which were made of her when she appeared

BANKERS AND DEALERS IN GOVERNMENT SECURITIES

FINANCIAL.

No. 5 Nassau Street, New York November 8, 1869. The surprising development of our national resource and the rapidity with which the government is now en

abled to reduce the national debt, by weekly purchases render it apparent that the time is approaching wh the Five-Twonty honds may be funded at not over four er four and a half per cent. interest. Meanwhile their high price, as compared with other classes of securities paying an equal rate of interest, is leading to general inquiry for more profitable forms of investment in which money may be safely invested. During the war the necessities and peril of the govern ment, and the consequent cheapness of its securities, endered them so attractive that, from this cause, combined with the patriotic faith of the people in their

of the country, and diverted attention from other classes of securities which had before been deemed sufficiently onservative and sound to meet the wants of the most cantious investors. The government is no longer a borrower. It no longer needs the country's capital, but desires gratefully and IN honorably to repay it. The rapid accumulation of capital for investment,

the reduction of the national debt and improvement of the national credit-rendering it certain that hereafter but a comparatively low rate of interest can be derived from investment in government bonds-is compelling the search for other safe and well-guarded channels into which capital not employed in business may wisely flow. The enterprises of Peace, no less needful in their time and place, for the common welfare, than were the waste and cost of War, now call for the capital which the government no longer needs, and offer for its use a remuneration which the government need no longer pay, and in some cases, a security as stable and enduring as the faith of the nation itself. The desire to capitalize the premium which may now be realized upon Five-Twenty bonds, and which a material decline in Gold toward par, and the ability of the

lovernment to fund them at a lower rate of interest may

t any time extinguish, is felt by many holders who de-

ire some satisfactory assurance as to which of the many ower-priced securities in the market would afford the ecessary safety to justify an exchange. N. B.... Handkerchiefs, in Pancy Boxes, The applications for information and advice which are addressed to us daily, show how universal is the desire for this amurance, as to what forms of investment more profitable than Government securities at present market rates, are entitled to the confidence of investors. THURSDAY, Dec. 2.—The refusal of Secretary Boutwell to accept the bils at the recent proposed sale of Government treasure has checked the speculative tendencies of the gold market, and put a limit to op-rations in the precious metal. The clearances to-day at the Gold Bank were only twenty-five millions as against fifty millions yesterday, and the probability is that to mornow estatement will show a still greater reduction. The activity in the money market which set in on Tuesday afternoon and prevailed throughout yesterday, was still felt in the earlier hours of business to day, and rates as high as seven per cent. If it were quite freely pid for caulloans, and in some few instances as ixteenth to an eighth per cent for "turnit g" stocks. Near two o'clock money suddenly became abundant, and the rate declined to sown per cent. Indeed, after two, and certainly in the vicinity of three o'clock, it might have been had as low as six or over live per cent, but the early demand had been so active that borrowers had made their engagementsquite early in the day, and hence londers were in the majority and were compelled to carry balances unemployed over night. The fluctuatious in the money market are to be traced originally to the money ments of funds in the depositaries of the city funds and for the payment of real estate, personal and other local taxes. The Vanderbilt clique are further charged with having unloaded just previous to the recent decline and then withholding the money obtained by the sale of their stocks, their operations being timed to occur with the natural aggravation of the market arising out of the causes above, indicated.
