The substitute of the committee was then read, which strikes out all after the enacting clause, inserting the following: "That the Secretary of the Interior be directed to change the schedule and blanks to be used in enumerating the inhabitants of the United States in 1870 so as to make the same conform to the Constitution of the United States." This leaves the bill in other respects the same as that providing for the census of 1850.

Mr. Conkling, in advocating the substitute, said the Committee were desirous to let well enough alone. He referred to the law of 1850.

He con-luded by saying that the recommendation was, to let well enough alone, adapt the law of 1850 to the present Constitution of the United States in its provision concerning the parent constructing the Government railroad bridge between Rock Island and Davenport to change the same from the capacity of a double to that of a single track bridge.
