THE UNIVERSITY OF PENNSYLVANIA. Is Medical Commencement.

8

The itest graduating class descended the eteps of the structure occupied by the Medical Department of the University of Pennsylvania with diplomas in their hands, in the year 1768. Since that period the University has put into the ranks of the medical faculty over 8,000 the ranks of the medical faculty over 8,000 practitioners of the healing art. It this morn-ing increased that number by reinforcements to the number of one hundred and thirteen. This class is not quite so large as the class of the year before. As will be seen be-low, its members come principally from Pennsylvania, Ohio and New Jersey : but almost every section of the Union is represented in its ranks. The school is the legitimate progeny of the University of Edin-burgh. It rated as a University ab initio, while other institutions were excluded from such distinguished recognition. Its diplomas, such distinguished recognition. Its diplomas, passing current everywhere, were credentials of value, so cosmopolitan that the prosperity of the institution from that day to this has steadilv increased.

As the institution expanded in usefulness, the rigidity of its examinations proportion-ately increased. The ordeal through which the one hundred and thirteen graduates of this

the one hundred and thirteen graduates of this year have successfully passed is among the severest ever known in this country. It is as searching as that of any corresponding insti-tution either in England or in Germany. To this fact may be ascribed the justifiable complacency of the young gentlemen who this morning received their parchments at the Academy of Music. By this time to-morrow many of them will be on the way to distant homes. The partings on these occasions are homes. The partings on these occasions are naturally tinged with soberness, rolleved some-fimes by the prospect of a reunion with the general alumni in future years. This was the case to-day. Alumni of the institution were present from many other, and from some far distant, places. Their presence imparted to the occasion such enhanced interest that in B. McClellan, M. D. Had the bullion been a distinction of First-Committee on Construction and Re-pair of, Highways and Sidewalks, including the laying of pipes and building of sewers. Second-Cleansing, including all matters which concern public health, viz.: cleansing merit, the class would have unanimously thrown up their hats in honor of the wearers As it was, they could do nothing of the kind. They, this morning, called a meeting to con-sider the subject. The procession moved down Tenth street to Walnut, and thence to Third-Committee on Lighting of Highthe Academy of Music. With three exceptions, the committee saw the force of this objection. The others persisted in marching with the gold upon their breasts. The three gentlemen were pointed out to our reporter as Edward Jame-, Penna.; E. B. Rentz, Penna., and Robert A. McKinney, of Texas.

The procession entered the Academy at twenty minutes before one o'clock. The vast auditorium was filled with the beauty and the times and order of their own meetings, elect their own chairman, and declare what numthe shall form a quorum. He purchased tickets and tendered in payment a \$50 note. THE FIRST CAVALRY.—The officers of the First Pennsylvania Cavalry (Col. Wm. Frish-muth commanding) held a regular meeting a few nights ago, and the reports of the several companies show that they have weekly drills and are increasing in number. The regiment is now composed of 600 men, uniformed and equipped, and ready for service. Colonel Frish-muth has ordered company inspections, and has detailed Major A. Hamberg and First Licutenant F. Merke as inspecting officers. The first annual ball of the regiment will take place at the National Guards' Hall, on Mon-day evening next, and it will, no doubt, be a andsome affair

VIOLATING THE REVENUE LAWS .-- Robt. Smith, cigar-dealer, on Market street, near Eighteenth, was before United States Com-misioner C. P. Clark to-day, upon the charge that 2,100 unstamped cigars were found in his place, and also a box containing 100 with an old stamp on it. Smith says that he trans-ferred the latter stamp from a bundle to the box, and that he did not manufacture the 2,100 elgars, but bought them from a woman. He was held in \$1,000 bail for trial.

WALKED OVERBOARD .- This morning about half-past three o'clock an unknown man, sup-posed to be a German, walked into the Dela ware at Willow street wharf. He called lustily for assistance, and Officers Morris and Clawson, of the Harbor Police, were quickly on the dock, but before they could render as sistance the man was drowned. His body was afterwards recovered. He was about 40 years of age, had dark hair and light mous-tache. He had on black coat, black vest, black pants and brown shirt.

A TROUBLESOME FELLOW.—Thomas Dalton stopped his cart in the centre of the roadway, at Eighth and Vine streets, yesterday after-noon. The cars on both Eighth and Vine streets were prevented from passing. Thomas stubbornly refused to budge from his position. A policeman finally arrested him and raised the blockade. Dalton was taken before Al-derman Boswell, and was held in \$500 bail.

FIRE AND NARROW ESCAPE .- Last night about twelve o'clock a fire occurred in the dwelling of James Gleason, No. 138 Grape in the kitchen, ran out into the hallway and up the staircase. The interior of the house was badly damaged. The family was asleep at the time of the fire, and was rescued from the second-story window by the police, assisted by a number of citizens.

CARELESSNESS .- The awning in front of a to be on fire about 12 o'clock last night. Po-liceman Mahoney, of the Ninth District, saw the flames a few moments after the gas lamp near the awning had been lighted, and it i supposed that the lamp-lighter carelessly threw his match on the canvas. The only damage done was the tearing up of the awning.

OF THE CENTRAL BAILROAD OF IOWA.

At 95, Free from Tax.

This railroad runs 234 miles north and south through the finest and most thickly settled portion of the magnificent State of Iowa, and the only link wanting to connect the railway centres at St. Louis and St. Paul by an unbroken line, 147 miles shorter than any existing route. This road offers many advantages. The building of the railroad north from St. Paul to Duluth, at the head of Lake Superior, where five railroads will soon centre-the construction of the Northern Pacific Railroad, already begun-and the rapid development of a new and productive country in Minnesota and the Northwest, must furnish a large Southern traffic. As the Upper Mississippi is frozen over during the Winter, and its navigation is often uncertain during the Summer, from low water; this road must have at all times a large amount of transportation, and a. monopoly of the business at some seasons of the year. Its connections with other lines interested by mutual ownership or running arrangements, will give it almost the entire north and south travel between its terminal points and their vicinity.

This road will have a great advantage over any other Western line in carrying the best quality of coal from where it is abundant in Southern Iowa to Northern Iowa and Minnesota, where none is to be found, and in securing return freights of lumber, for which the demand is very great.

Forty-six miles of the line are just completed, and eighty-eight miles more are graded. An abundant supply of iron, ties, and other materials has been contracted for. The Company have a large and daily increasing surplus of money on hand, and the stock subscriptions, and the sales of bonds, give them ample means to push the work forward, so that, with favorable weather, it is expected that the whole line will be completed this season.

SECURITY OF THE INVESTMENT.

So far as we can learn, every completed railroad in the Northwest is not only earning the interest on its bonds, but a dividend on its stock, and we believe the CENTRAL OF IOWA must occupy an equally strong financiai position. The amount of Bonds to be issued is but

\$16,000 per mile, or less than four millions, in all Of which over One Million have

To ride in the Chestnut street cars of an evening with valuables in your pocket is equivalent to attracting the attention of some thief. The fraternity gather their harvest especially on he nights of performances at the Academy of Music, and from passengers in the New York evening train. Last night thieves were as active as they were bold. Upon one car alone we saw four of them. Upon reaching the

we saw four of them. Upon reaching the A cademy, one of the passengers—by no means a simpleton in other matters—found himself minus his opera-glass. It had been taken from his outside pocket while standing in the centre of the crowded vehicle. The detectives either don't know these thieves or have no disposition to arrest them. The former we charitably believe to be the case. If the ap-pointment of the detective force were rested n hands like those of Chief Kelly or Mr. Ben. Franklin, the entire brotherhood of thieves would be in a flutter. As it now is, they look upon many of them with no other sentiment

than contempt. JUNGER M.ENNERCHOR.—During the pre-sent season the Junger Männerchor has given a series of private solrées. These entertain-ments have been of the most delightful character, and, in addition to the pleasure which they have afforded, the members and their families have contributed greatly to protheir families have contributed greatly to pro-mote harmony, good feeling and social inter-course. The last of the series was given last night at Musical Fund Hall. There was a good attendance. Mr. H. G. Runkel acted as Master of Ceremonies. The music was under the direction of Mr. John Greim, of the Ger mania Orchestra. The programme was well arranged. Dancing commenced at nine o'clock and was continued until a late hour. As usua with the Germans, everybody participated and everybody had a pleasant time. At mid-night a fine supper was served by Mr. John Misch, the atter of the society. Everything passed off in the most agreeable manner.

CHOWDER.—Things are brisk to-day along the river front. The army of stevedores looks more cheerful than for some time past. Preparations for pleasure navigation also are visibly under way. We noticed two steam pleasure vachts this morning taking a run to give a little exercise to their machinery. What is true of steam yachts is true also of pleasure raft propelled by sails. Bace street wharf is particularly lively. The stevedores here are black men. In discharging salt from the shipblack men. BROAD STREET .- This thoroughfare, as i. well known, is one of the finest in the world. well known, is one of the lnest in the world, and its popularity as a drive is daily increas-ing. Every fine afternoon the street, north of Coates street, where the Nicolson pave-ment begins, is taken possession of by pleas-ure teams of every description. Whileso many vehicles, are going, in both directions—and some persons are not very particular at what some persons are not very particular at what rate of speed they drive—accidents are of very rare occurrence. This is owing to the very excellent manner in which the police force, under Day Sergeant Adam Reese, performs its du-ties. Until policemen were detailed to prevent fast driving, Broad street was scarcely safe for any but "fast" teams. By the excellent management of Sergeant Reese, reckless driving on the street has been almost totally

abolished. The presence of a policeman at every few yards is a sufficient warning to those who are disposed to give their "nags" a full swing. SUICIDE IN GERMANTOWN .- Thomas Trott aged 60 years, residing on Jofferson street, near Clinton, committed suicide by taking haudanum, on Wednesday morning. He was employed as engineer in Redles's turning shop, on Clinton street. Lately he has taken to drink and for some time his been in a melan-choly mood. On Wednesday morning he pur-

Subsequently the bothe wa-discovered by some of the family and medical aid was summoned, but it was without avail, aid was summoned, but it was without avail, and Trott died at one o'clock in the afternoon

SERIOUS CHARGE.-Reuben Pickering, an Englishman, was before Ald. Heins upon the charge of attempting an aggravated asthe charge of attempting an approximated as sould upon a little girl 14 years of age. He is a bell-hanger by trade, and was at work in a new house in the Nineteenth Ward. The child went into the house to gather chips, and then, it is alleged, the assault was attempted The accused was held in §1,500 bail to answer.

He was subsequently ar-rested and was committed by Alderman Alex-

ander. RETURN OF BISHOP WOOD.-We understand that letters have been received from Rt. Rev. John F. Wood, Bishop of the Catholic diocese of Philadelphia, announcing his in-tended return to this country from Rome, where he has been attending the Geumenical Council. It is expected that he will be here by Easter.

in currency. They are only issued upon each section of the Road as as fast as the same is completed and in successful operation. Over two and a half millions of dollars have been expended on the Boad. Eighty-three miles are about completed and equipped, and already show large carnings; and the remainder of the line is rapidly progress

ing toward completion. The State of Iowa, through which this road runs, is one of the richest agricultural sections in America. Its large population, extending with surprising rapidity, and its immense yield of grain, pork, wool and other ag ricultural products, create a pressing demand for the construction of this road, which affords the best nossible

guarantee for the bondholders, especially as the line runs through the wealthiest and most thickly populated ection of the State. The road also runs through the rich and growing Silve

of Minnesota. Reference to the map of the United States will show that it traverses the most enterprising and growing portion of the West, and forms one of the great trunk lines in direct communication with Neu York, Chicago and St. Louis, being to the latter city ninety miles nearer from Northern Iowa and all portions of the State of Minnesota than by any other road

now built or projected, and also the nearest ronte from Central and Southern Iowa. The read is opened for local traffic as rapidly as constructed, and thus RECEIVES EARNINGS ON ITS

COMPLETED SECTIONS GREATLY IN EXCESS OF THE AMOUNT NEEDED TO PAY THE IN-

TEREST UPON ITS BONDS BEFORE THE ROAD IS FINISHED. The buyer of these Bonds as

> ence on the route of the road, as well as by now current earnings, and has not to risk any of the contingencies which always attend the opening of roads in a new and unsettled country.

A limited quantity only of these Bonds are now offered at 95.

After a thorough investigation of the above enterprise, we recommend these Bonds as a first-class invest-ment, affording absolute safety, and paying an unusually
