Brinton, M. D., and G. H. Napheys, M. D.
The field which this work occupies is a popular reply to Strauss would be a prophylactic, and reply to Strauss would be a prophylactic would be a prophylact

The field which this work occupies is a popular one, and represents to the physician the best results obtained by the whole profession. The present number is the fifth issue, and shows the most important discoveries of European medical science, while suitable prominence is given to the labors of American investigators, so well deserved by them for their practical well deserved by them for their practical general Church History, this translation has he was a good man. Better this than all learnand conscientious method. This number been of excellent service to the theologians of ing, than all eloquence; for "whether there be and conscientious method. This number contains a well-edited department of Matoria Medica and Therapautics compiled took bad the pleasure of a personal interview to knowledge, it shall vanish away; but love teria Medica and Therapeutics, compiled with Neander at Berlin, where he was received abideth forever." Having in life been Christ's, by Dr. Horatio C. Wood, of this city, and Dr. | with Meanuer at Berlin, where he was received by the venerable Church historian with a charble is Christ's now by a still closer tie, and so Louis Elsberg, of New York. The work for acteristic warmth of affection. In 1846, ap dwelleth with him eternally.—The Methodist.

S. W. Butler, M. D., 115 South Seventh street.

The same publisher issues The Medical and Burgical Reporter, edited by Drs. Butler and Brinton, of which the February and March numbers display an excellent digest of American cases and many useful notices of medical and wrote day and uight. In time, as was inevitable, even his strong frame ago laid out a plan for recataloguing all the fixed stars from the first to the ninth magnitudes inclusive, and confided to Professor Safford the task of cataloguing those situated gave way under the pressure put upon it. within a belt of about ten degrees in breadth, within a belt of about ten degrees in breadth, after was subject to sudden attacks of functional magazines:

Sanford the task of cataloguing these statements about ten degrees in breadth, within a belt of about ten degrees in breadth, the zone being that which is in the zenith of chicago when on the Southern meridian. The additional magazines:

The Woman's Advocate for March, published by Willaim P. Tomlinson, New York;

The Gardener's Monthly for March, published by Brickloe & Marct, Philadelphia; Wood's

Wood's Household Magazines for March, published by Brickloe & Marct, Philadelphia; Wood's

Reproheld Magazines:

after was subject to sudden attacks of functional derangement of the heart. He never had firm health after that year.

In the same year—1848—he resigned his share of Professor Safford, and each requires at least two independent observations to determine its position with the required accuracy. by Brickloe & Marot, Philadelphia; Wood's Methodist Quarterly Review, to which he had been elected by the General Conference. In the During the last year he made 4,300 observa-

stars.

The task is being prosecuted under great difturer and Builder for March, published by Western & Co., 37 Park Row, New York; especially those suggested by the then little known philosophy of Comte. Every number of the Review bore the impress of the editor's nearly perpendicular position, and the eye end watched for in a stooping posture, with the face turned upward—one of the most fatiguing pos tions possible. os tions possible.

The principal object to be gained by this herculean labor is a knowledge of the motions of the fixed stars in space. The positions, as now noted, will be reduced, and cleared of rors, and corrected for refraction, aberration, and nutation, and the results compared with those obtained by similar labor, in 1800 and 1820. It is already known that most of the fixed stars are affected with what is known as
