Mr. Wolfsohn's "Schumanh Malines." Want of space on Saturday prevented publication in our columns of a notice of Mr. Carl Wolfsohn's Schumann matines given This in the foyer of the Academy on Friday. This concert was one of the most delightful of the concert was one of the most delightful of the series. The principal feature of the programme was the fantasie in C Major which is, not only the greateat of Schumann's compositions for the piano, but one of the most splendid creations for that instrument in existence. It abounds in ideas, and it brings into play all the modern improvements in pianos. abounds in ideas, and it brings into play all the modern improvements in planos. The first movement is fantastic and full of pathos and passion; the second is grave, massive and march-like, working up constantly to great climaxes; the third one is a beautiful slow movement, full of delicious melody from beginning to end. The difficulties of this piece are appalling, but they were overcome by Mr. Wolfschn, who played with customary elegance, delicacy and feeling. This was the first performance of the fantasic ever given in this country, and we are glad to record that it gave intense satisfaction to the audience. The trio for piano, violin and violencello was given at one of the concerts last winter, but we were glad to hear it again from Messrs. Wolfschn, Kopta and Hennig, for it is a delightful composition, and it was played splendidly. We must accord waim praise to Mr. Wolfschn's management of the exquisite Schumann Romanza and the of the exquisite Schumann Romanza and the of the exquisite Schumann Romanza and the Träumerei, both of which were given in most artistic manner. Mr. Gastel sang tastefully and well, not only in the Schumann song, but in two others, which atoned for Signor Barili's absence. The next concert of this series—the "Raff Matinée," will be given on the 8th of April

-At the Amateurs' Drawing-Room on Satur day night M. Juignet's company played Le Meurtrier de Théodore, franslated with more freedom than sense Who Killed, Cock Robin. The audience was larger than might have been expected, considering the inclement weather, and we were pleased to observe an increased number of our French acquaintances present. The play, although it is long enough to fill completely the two and a half hours which form the model length of an evening's entertainment, is adjusted (except a trifling soubrette rôle) to three actors only, whose parts thus become excessively arduous. MM. Juignet and Edgard, with Mme. CITY NOTICES.

ALL ABOUT A HAT.—And a great deal may be said about a hat. It is pretty well known that in April. 1869, we went to Europe. Of course we took a hat: we wore that hat on the passage—when, one night, an awful fate befell it. It was in the upper berth; a trunk was there; a lurch of the vessel, and our hat was crushed. It was a sad-looking hat—a melancholy spectacle when we rescued it—looking like; a smash-down opera hat; we thrust our hand in it in despair, but what to our wondrons eyes should appear, "it resumed it when we arrived in old Europe, and through old Europa. On one eccasion, a hot day, it was lying in the car on the opposite seat; at a station some ladies got in, and one who was not a fairy in weight sat down on our hapless hat; down it went again; again did we apply the restorative, and, like a vessel that pitches, it came up again. We landed in this country after seven months absence; we still wore that hat, and it is still good-looking. We ought to have mentioned that it was made by Jones & Temple, No. 929 Chestnut street, who want to purchase it of us and put it under a glass case, but no money can purchase that hat,—Godey's Laties' Book.

cent. interest, and as an investment they are fully in currency. They are only issued upon each section of the Road as

as fast as the same is completed and in successful operation. Over two and a half millions of dollars have been expended on the Road. Eighty-three miles are about completed and equipped, and already show large earnings; and the remainder of the line is rapidly progress ing toward completion.

The State of Iowa, through which this road runs, is one of the richest agricultural sections in America. Its large population, extending with surprising rapidity, and its immense yield of grain, pork, wool and other agricultural products, create a pressing demand for the construction of this road, which affords the best possible guarantee for the boudholders, especially as the line runs through the wealthiest and most thickly populated section of the State.

The road also runs through the rich and growing State of Minnesota. Reference to the map of the United States will show that it traverses the most enterprising and growing portion of the West, and forms one of the great trunk lines in direct communication with New York, Chicago and St. Louis, being to the latter city ninety miles nearer from Northern Iowa and all portions of the State of Minnesota than by any other road now built or projected, and also the nearest route from

Central and Southern Iowa.

The road is opened for local traffic as rapid'y as constructed, and thus RECEIVES EARNINGS ON ITS COMPLETED SECTIONS GREATLY IN EXCESS OF THE AMOUNT NEEDED TO PAY THE IN-TEREST UPON LTS BONDS BEFORE THE ROAD IS FINISHED. The buyer of these Bonds 15 therefore guaranteed, by a great Tusiness already in existence on the route of the road, as well as by now current earnings, and has not to risk any of the contingencies which always attend the opening of roads in a new and

unsettled country. A limited quantity only of these Bonds are now offered at 95.

After a thorough investigation of the above enterprise, we recommend these Bonds as a first-class invest liberal rate of interest. All marketable securities at their full price, free of commission and express charges, received in payment. Pamphlets and maps furnished on application.

CENTRAL BAILROAD OF IOWA At 95, Free from Tax.

This railroad runs 234 miles porth and south through the finest and most thickly settled portion of the magnificent State of Iowa, and the only link wanting to connect the railway centres at St. Louis and St. Paul by an unbroken line, 147 miles shorter than any existing route. This road offers mady advantages. Its connections with other lines in terested by mutual ownership or running arrangements, will give it almost the entire north and south travel between its terminal

points and their vicinity. This road will have a great advantage over any other Western line in carrying the best quality of coal from where it is abundant in Southern Iowa to Northern Iowa and Minnesota, where none is to be found, and in securing return freights of lumber, for which the

demand is very great. Forty-six miles of the line are just completed, and eighty-eight miles more are graded. An abundant supply of iron, ties, and other materials has been contracted for. The Company have a large and daily increasing surplus of money on hand, and the stock subscriptions, and the sales of bonds, give them ample means to push the work forward, so that, with favorable weather, it is expected that the whole line will be completed this

So far as we can learn, every completed railroad in the Northwest is not only earning the interest on its bonds, but a dividend on its stock, and we believe the CENTRAL OF IOWA must occupy an equally strong financiai position.
