LOCAL CHOWDER.—The crispness imparted to this morning's atmosphere by the frost of the night previous gave to it all the tonic properties of cinchona and pale sherry. The corresponding day of last year was among the most pleasant during the whole of March. This morning business men came down with um brellas under their arms.

We yesterday accompanied a friend to the establishment of a fashionable hair-dresser. He was taking a littleson to be shorn of a crop of ringlets about sixteen inches long. boy was anxious to get rid of them. boy was anxious to get rid of them. His mother had resolutely resisted all overtures with a view to their removal. The father was surreptitiously conniving at the disappearance of the curls. The little fellow was seated, and one by one-the golden tresses fell before the sciscors. To the respectful tonsor the gentleman was explaining the circumstances of the case. The reply was: "Do yousee, Monsieur, those young ladies in ze back room?" "Certainly." "Do you know what they are making?" "Wigs, I suppose." "Exactly, my dear sir. Vell, if all ze gentlemen would cut off ze hair of zare leetel boys as I cut off now ze hair of zis one, zen zare would be leetel work for ze ladies vot make ze wig?" we can slightly guess. That water metres will at once, if ever, he introduced into this city is not probable. To

do this the assent of Councils must be gained. Against restricting the supply of water for private consumers Chief Engineer Graeff is unyieldingly opposed. In an aqueous point of view, the Chief is somewhat sultanic in tendency. He recognizes the verity of the adage. dency. He recognizes the verity of the adage that cleanliness is next to godliness, and that that cleanliness is next to godliness, and that a clean Turk is in one respect in advance of a sullied Christian. The patentees of these metres present sugar-coated arguments in their favor. As waste of water is punishable by fine, the Chief is willing that the man who bothes three times a day shall pay no more for water than if he took but a single bath. The Water Department of Philadelphia is more than self-sustaining. Under the existing able management, it even turns money into the management, it even turns money into the

We were yesterday shown two small houses, on a down-town street, built of bricks stolen by the owner at the rate of from six to a dozen at a time. The owner was a carter in a brick-yard. Each night, on going out with his final lord, he dronned as many bricks as he was load, he dropped as many bricks as he was satisfied could be safely taken. He gathered them after nightfall. He was months in doing this, but successfully accomplished it. He re-cently confessed the fact. He has since begun

There are several people in the Almshouse at Blockley of the known longevity of over a hundred years. The women are older than the men. Than the former no class of Philadelphia poor are more tenderly cared for. The old ladies sleep upon feather-beds all the year old ladies sleep upon feather-beds an the year round. They are supplied with an article of tea that many old people outside of the Almshouse can never obtain, while in this, their second childhood, their whims and caprices are gratified whenever possible. Gentlemen of the Corn Exchange tell the value, to a cent, inside of five minutes, of a barrel of flour. Housekeepers can't do this until after baking a batch. The flour-dealer applies his test directly to the unleavened dough. To see a gentleman in a thousand dollar breast-pin converting a handful of flour and water-into a johnny cake is illustrative of the fact that practice makes perfect." At the and water into a johnny cake is illustrative of the fact that? practice makes perfect." At the Corn Exchange every morning the flour merchants call up recollections of boyhood, when they stood by their mothers' pie-board and rejoiced in the permission to model a cake in dough. What they then did as amusement they now do as amatter of dollars and cents. The tests of excellence in flour are sweetness, whiteness and tengeity. The whitest is far whiteness and tenacity. The whitest is far from necessarily being the sweetest. Exactly what a thousand barrels are worth will be told you in a minute by any one of a hundred gen-tlemen on the Corn Exchange by no other test than an ounce sample and sufficient water

to render it plastic.

With one well-directed blow he laid out the quadruped in a mortal street. The overtake out and struck the quiver. The owner rushed out and struck the gentleman. The latter did something that caused the cigar man to follow the example of the dog. THE LATE THEODORE WILSON.—The death of so many prominent citizens, of late, is imparting a certain degree of solemnity to the time. The demise of the late Theodore Wilson. son has left in sadness the entire membership of the Commercial Exchange. At the close of this morning's mercantile transactions, the clatter of voices ceased, the bustle of barter was hushed, and the Board were officially nowas hished, and he board with the loss of their late associate. President Nathan Brooke is among the youngest members of the Corn Exchange; he is also one of those, outside of the family circle, who most keenly feel the absence of him whose death they had assembled to mourn.
