modern civilization and amenity of manners. hind you, until, perhaps a mile from where own lips a confession of her misdeeds. Ove Tours is perfectly tranquil, and has relapsed at once into its habitual duliness. \_\_\_\_ OUR POTTSVILLE LETTER.

as the miners call it. Ever and anon, as you espondence of the Phila. Evening Bulletin.] POTTSVILLE, April 12, 1870.—There are and recalls to your startled mind how, in your four ways of developing a coal mine, and the school-boy days, continuities attending the choice of the proper Did mouth and gibber in the streets of Rome." one are aptly hit off in a pen and ink sketch, But the ghost disappears as you approach, by a native artist," which adorns the wall of and you put your hand on a prop, a log placed regards the feminine characters. the room wherein I write. It is simply a rough on end to support the roof, which is clothed with Pasea plays very forcibly "Madame de la Roseon end to support the root, which is clothed with a substance resembling the whitest, softest wool.

The discussing the all-important question of the slope, shall we slope, shalf or tunnel?"

The discussing the slope there is the slope that the s Shall we slope, shaft or tunnel?" The dis- presto lit is gone. It has not dripped through cussion is greatly simplified and the conclusion | your fingers like water, nor escaped in a puff hastened by the voluntary assistance of a of smoke. It has not melted nor collapsed, hastened by the voluntary assistance of a daughter of Erin, evidently the landlady, who is left of a mass as large as your two hands is left of a mass as large as your two hands would hold is a lump of dirty white, stringy substance, scarcely as large as the end of your rrangement of the strata at the point to be decide the question. A good idea of e general disposition of coal veins may be stained by setting a section of jelly-cake on edge, and tilting it at any angle to the surface

ha joke 'indigenous to the coal regions, and thumb. It is very beautiful in its place, but it poe which is highly appreciated there.

Usually the character of the ground and the

It is a kind of fungus, never found except in is impossible to pack it up and carry it home. damp mines, and for which I have never heard a name. Nor is this the only contrivance they have in these caverns to scare nervous people. One's imagination becomes painfully acute, and is ready to take fright at every new sight or ne table. The layers of jelly will represent sound. You turn a corner, and there meets the coal, and the intervening cake the rocks between which it lies. Now hide the lower you an apparition with fiery eyes and uncouth shape'; and it needs a second glance to tell you that it is only a mule standing quietly on the art of the cake under a napkin, and the exposed ortion will be a model of strata thrown up track awaiting orders. Or you hear a rapid, fluttering noise approaching, and before you can get out of the way something dashes to a mountain, the napkin being the surface of the earth, and the cake beneath it the corresponding portion of our globe. This illustraagainst your head and puts out your light. I be it understood, bears reference only to is only a bat. The mines are full of them, and the coal reached by a single mine. To get an idea of the whole coal field, take the jelly-cake selves. Or you are standing beside a wall of selves. Or you are standing beside a wall o entire, double it in the form of the letter U, coal, seemingly massive as the everlasting hills y your napkin in the hollow, set another of whose roots it forms a part, when a quick in the same form, touching it, and another explosion, sharp and clear as a rifle-shot, and ouching that, and so on, to the dozen or loud as a park of artillery, sends you quakin eenth cake. Each cake will then represent gangway. It is nothing—only a crack in the coal. Or your guide lifts his laws to with fear to the other side "coal basin," and the whole a "coal field." Now let us return to our section, which is roof, and instantly there is a flash as of light ning; or he touches it to a fissure in the coabasins." If the operator finds a good place or his breaker at the end of the mountain, or and a stream of fire flashes half-way across the he edge of the cake, he digs a number of hole gangway. It is coal-gas-sulphuretted hydrogen-the same which makes your winter evenalled "shaftings" through the overlying earth, until he finds where the vein "crops out."

ings cheerful in your home in the great cityand the dreaded "fire-damp" of the miner. to the vein thus found, if he judges it workble, he drives a horizontal passage, following Being lighter than common air, it collects in he curves and twistings of the vein as nearly hollow places in the roof, and may be readily is possible, but always keeping a uniform grade exploded there. The fissure is a "blower, just enough to let the mine water run out at and leads to some small cavity in which the entrance. This is called a "drift"—somemes, though rarely in this country, an adit loose by a stroke of the miner's pick. These But suppose he finds that his breaker blowers are often fired by the miners to obtain must be located on the side of the mountain. ist be located on the side of the mountain light by which to work. They burn now bores horizontally, as before, but harmlessly for a while, but, if not through the rock this time, until he strikes a watched, will ignite the coal. Two or three watched, will ignite the coal. coal vein lying at right angles to the hole he is driving. This is a "tunnel," and when the this one, and communicating with it, was set rein is reached, "gangways" are driven along on fire by the carelessness of some workmen it on both sides of the tunnel, in the same manwho, on quitting work on Saturday night, left ner as the drift above mentioned. Gangways a couple of blowers burning. They set fire to are incident to all coal mines however de- the woodwork of the mine and to the coal veloped. They are long, narrow galleries, are itself; and nothing but the fact of its being on always horizontal or nearly so, and always follone of the lowest levels saved the mine. The low the general tend of the vein, never leaving the coal except to cut off some sharp angle which may be met with as the work pro-To illustrate a "slope," we must slice off the part of our jelly-cake, as it lies—or stands—inclined, in such a way that the layers of jelly may appear on the surface at different heights. Putting up our breaker on or near one of these exposed veins, it is evident that we cannot follow it horizontally, because in that direction there is nothing to follow. We, therefore sink a slope, sloping, as its name determined a few months ago at tragical one, happened a few months ago at this shaft. An old superintendent was about to be rotated out of office and a new one retained in. The retiring officer, proud of the appearance of his mine, which he had put in apple-pie order, including many chief men of the company, to OAK HALL. OAK HALL.

above water level.

that direction there is nothing to follow. We, therefore, sink a slope, sloping, as its name denotes, and following the vein as deep as it is desirable to go—usually one hundred yards for the first "lift"—but not, generally, following the vein as close as a drift. The cars must be drawn up this incline by means of a rope worked by a steam engine; and it is best to have a smooth, straight track for them to run on.

Trom the bottom of the slope gangways run at From the bottom of the slope gangways run at and the miners succeeded in escaping without right angles to it, as in the case of the tunnel.

The "shaft" is simply an enormous well.

The "shaft" is simply an enormous well. Our breaker being located somewhere on the falls without their assistance; but, after the napkin, we know there is coal under it, and we dig a well until we reach it. It is a four-sided would be as well to add that there would be as well to add that there well, and may be, as is the shaft of the Hickory well, and may be, as is the shaft of the Hickory is no instance on record in which it fell on a wisitor. Indeed, in the course of a somewhat wide one way, and twenty-two the other way.

extensive experience among coal mines, I have extensive experience among coal mines, I have The drift and tunnel are called openings never heard of an instance in which a visitor "above water level," because they are so arto a mine was in any way injured. Their guides are always careful to keep them in safe ranged that the water, which is found in every ine, will run out at the entrance, and require places and out of harm's way. And I have no attention on the part of the operator, except been assured by old and experienced miners that three-fourths of the accidents which befall the water can only be removed from slopes that three-fourths of the accidents which befall the miners themselves are the result of their id shafts by the use of machinery, and they own carelessness. I have seen half a dozen are styled openings "below water level."
Hence it is that of two collieries within a few miners riding in to work on a mine wagon, Hence it is that of two collieries within a few bundred feet of each other, at Tuscaror a, one least half of them with lighted pipes in their mouths, and each and every one of them had below water level, though its opening is probably a hundred feet in perpendicular height above that of its neighbor, which is nothing of handling powder and filling blasts nothing of handling powder and once with lamp on head and pipe in mouth, and once Of course, every Philadelphian is acquainted

the passage-way, and you have reached the end of the mine—"the face of the gangway,"

"The sheeted ghosts

for the benefit of the BULLETIN'S New York readers. Philadelphians will please skip the foregoing, and read only-the following description of the Hickory Shaft, which is one of the lions of the Schuylkill coal field, and description of the schuylkill coal field and description in a while the lamp falls off, or the pipe drops lions of the Schuylkill coal field, and deserves to be typographed (excuse the pun—I really couldn't help it) before its fame is eclipsed by the mighty shaft which the Reading Rail-road Company threaten to sink near it. That is extected to be at least a thousand feet deep. was going on in another part of the mine suddenly became uncontrollable.

The Hickory, then, will be a mere bagatelle.

Nevertheless, its six hundred and sixty-six feet are as yet unsurpassed in the region, and a sumble into it is no holiday trip (unintentional of my subject. I must leave it, in the hope that mmble into it is no holiday trip (unintentional of my subject. I must leave it, in the hope that again), as one poor fellow found to his cost. He was repairing the pump, with an inch of so far as I have undertaken to illustrate wha was long a mystery to myself, I have at least hoard and five hundred feet of nothing at all partially succeeded. between him and the bottom. He fell, ween him and the bottom. He fell,
