PARAGUAT AND BRAZIL. Taking for granted that the news of th death of Lopez is true, and that the war in | shall be whitewashed every week, and Paraguay is thus ended, the future of that that the police shall compel the property country becomes an interesting question. An owners to clean the vaults frequently. We en-American mail steamer from Rio Janeiro is dorse this suggestion heartily. Spasmodic acnearly due now at New York. For the war, which must be cleansed, and cleansed as often as it. war of Brazil against Paraguay, or rather of is adopted, we may escape an epidemic disease the Emperor Dom Pedro against the Dictator this summer; if there is any trifling with the Lopez. The people of Brazil have wearied of foulness of these slums, the worst consequences the burdens and the losses they have had to endure, and peace would have been made long ago if the people and their representatives had had their own way. But the Emperor was obstinate, and when one commanding ous. of the neighborhood it may be relied upon : Most of the streets are in a condition of olerable cleanliness; there are occasional appearances of garbage which would provoke complaint in any other quarter; but the gutters are free. and there are no great accumulations of offensive feculant matter. The shovels and rooms of the scavengers have evidently been used in the neighborhood recently; sometimes with good effect; at others in a slovenly and careless manner. 'The principal cause of complaint, however, was the dreadful condition of | The Richest Confections! he courts, cellars, yards and small alleys. Since the recent agitation in the newspaper: there has been a partial effort at reform. Whitewash has been applied freely in half-adozen places, and two or three of the most offensive cellars have been closed. But a vast deal remains to be done, and if these sanitary measures are not continued until the whole neighborhood is cleansed, the worst results are to be feared. In Spafford, Darcy, Bedford Lisbon and St. Mary's streets, and in the alleys connected with them, there are innumerable yards where the filth is piled up in great heaps which have not been disturbed for months; Congress Hall. where the vaults are overflowing so that a man with a sensitive nose cannot breathe within a hundred yards of them; where animal and vegetable matter lies rotting in the sun, nursing the seeds of pestilence, and where unclean buman beings are clustered together in poverty buman beings are clustered together in poverty dist without a chance to wash their bodies or to relieve their lungs from the poisonous atmosphere. In one yard, in Darcy street, there is a festering mass of garbage which seems to include almost every known

thing that is subject to decay, and which is great enough to fill a dozen carts. This plague spot has not been touched by the Board of Health or by anybody else since last spring. smelled rank to heaven last summer, and i there is not some pretty active work in that quarter it will smell a great deal worse, and cause a great deal of sickness this summer. The cellars in all these streets are horribly

dirty. They are used for lodgings nightly by a motley swarm of persons, and as there is no ventilation, and the lodgers are so unclean that a decent man would hardly like to touch them even with tongs, it will readily be believed that the cellars are in an unwholesome condition. The stench that pours up from the trap-doors of most of them is simply indescribable. A person accustomed to a purer atmosphere could not breathe this air five minntes without fainting. It is an undoubted fact that there have been several cases of fever of a malignant character in these dens, and there mangpant character in chose dens, and there are one or two now. In some instances death has resulted; and the body of one of the vic-tims was suffered to remain unburied until putrefaction set in. Whether this is "relapsing putrefaction set in. Dr. Goodman, a most competent and skilful cflicer, although he has not been summoned to attend any of the cases, doubts the asserted fact. If there are any more cases, the matter will probably be settled beyond dispute. The Coroner has promised that he will have dead bodies removed in the future, when the relatives of the deceased neglect burial, and the Board of Health has really done some good sanitary work within the past few days, so we may expect some improvement in the health and appearance of the district. But there is an enormous amount of labor to be done yet, and in the vaults, collars and yards the filth is of such a character and in such quantities as to require immediate and ceaseless attention. The Port Physician recommends that the worst cellars shall be closed up for the summer; that the dwellings, fences and out-houses tion in this matter is useless. We must have systematic, persistent effort through the whole of the warm weather; and this plague spot may be anticipated."
