It is the almost inevitable result of ex-cessive drinking. In cases of delivium tre-mens these symptoms are rarely absent. Let a drinking man meet with an accident to his bones, deposed Dr. Shapleigh, especially a man suffering with fracture of the leg (so that he cannot move), and delivium almost invari-ably sets in. This fracture is an element in the cause of this man's death only because it involved the necessity for Keeping the man quict. The man himself admitted that he had been stricken with mania a pot for some time previous to the hour of his release by death. In a case like the present the évi-dence is not only presumptive, but conclusive. The fracture of the femur was but a remote cause of the man's death. After the witnesses

Bedford Street to be Washed.

The Board of Health, at its meeting on Tues day, received the report of the Sanitary Com-mittee on this subject. It was then resolved to furnish a hose for the use of the Rev. Mr. to furnish a noise for the use of the Lev. Mr. Long, in order to purify the street in the neigh-borhood of the Mission-house. Wm. H. Grimes was elected an additional inspector for six months.

The Duty of Physicians.

The Duty of Physicians. There are frequent rumors that contagious diseases are prevailing in Alaska street. Some time since it was said that relapsing fever was raging extensively there, but the mortality re-ports thus far fail to show any deaths as hav-ing occurred in that portion of the city. The general health law of 1818 has a provision in regard to contagious diseases, and as <u>physi-</u> cians either neglect or are not aware of it, we publish the section:

cians either neglect or are not aware of it, we publish the section: "SECTION XXV. Every person practising physic in the city, districts and townships aforesaid, who shall have a patient 'laboring under a pestilential or contagious disease (measles excepted), shall forthwith make a remeasures excepted), shall forthwith make a re-port in writing to the Health Officer, and for neglecting so to do shall be considered guilty of a misdemeanor, and subject to a fine not exceeding fifty dollars."

Malaria and the Guardians of the Poor. On Tuesday the Health Officer received an

anonymous note stating that a man and wife were lying "sick with a contagious disease, were lying "sick with a contagious disease, with no one to help or to care for them," at a house in Cross alley, St. Mary street, below Eighth. The matter was referred to Dr. Good-man, the Port Physician, and he made an in-vestigation. He found a colored woman, An-nie Murray, sick with malarial fever of a low type, not contagious. The husband had suf-fered with the same disease, but was able to walk out. The family were destitute, and Dr. Goodman recommended that the attention of Goodman recommended that the attention of the Guardians of the Poor be called to the case. Mr. Addicks at once sent notice to the proper officer of the Guardians of the Poor, but there was nobody in the office au-thorized to issue an order for the admission of sick women into the Almshouse, and she of sick women into the Almshouse, and she had to remain in her dirty and badly-cared-for room, at the risk of her life, until the next day. The Guardians of the Poor ought to pass a resolution authorizing such paupers to be admitted to the Almshouse on an order of the Health Officer, as such cases are more likely to come under his notice than that of the District Visitor of the Poor.

Denth and Destitution. Another circumstance which tends to show the misery and danger existing in this locality the misery and danger existing in this locality has just transpired. Inspector Williams, in going his rounds on Monday, accidentally dis-covered the body of a man which had been locked up in a room in house No. 706 St. Mary street for eleven days. When the Coroner held an inquest in the case, the parties in-terested said that they would attend to the burial, but for some reason, most probably poverty, the matter was not attended to, and but for the accidental discovery by Mr. Wil-inans, the body might have remained there but for the accidental discovery by bit. Whith the liams, the body might have remained there for weeks. The reader can imagine what would have been the result. Upon notification, the remains were buried by the Coroner.

The sickness now existing in the District seems to radiate from this horrible centre, which has been utterly unmolested for five years past.
