This was then exemplified by citing the improved conditions of the hospitals of Paris, Vienna, Milan and Turin, in many of which the compounding of medicines; the apothecaries' shops, as well as the nursing, were under the charge of females. To insure the proper qualifications of women so employed by affording them the means of obtaining the necessary certificates of skill and capacity is undoubtedly a praiseworthy enterprise.

It is believed that this ferocious disposition in the character of Lopez towards his own mother was impressed on him by the influence of Mrs. Lynch, who could never forgive her disapproval of her (Mrs. Lynch's) relations to ber son. This story was referred to the Count d'Eu by the lady herself, in the presence of many Brazilian officers, soldiers, and a number of Paraguayans.
