New Railroad Bridge.

CHICAGO, June 8.—A firm of contractors in this city performed a remarkable feat, rebuilding in one week the bridge burned down on the Pittsburgh, Cincinnati and St. Louis Railroad. It had three spans, in all 555 feet long, and was 74 feet above the water. Two hundred and twenty-five men were employed.

Whether as physicians we should encourage her to
eldert these relations, and to undertuke to occupy the
same positions with ourselves, is a question worthy of
cartiul and solemn consideration. He also alluded to
the negro, and declared it as a subject worthy of careful
consideration, whether a being presenting such a greaand decided anatomical peculiarity is fitted to be the
provessional and social associate of the whites.

On motion of Dr. Stetler, of this city, the
thanks of the Society were returned the hundred and twenty-five men were employed, and used 320,000 feet of lumber. Visit of Conncilmen. The Common Council of Louisville, Ky., are expected here to-day, to examine the President for his address, and a copy requeste for publication in the minutes.

The New York Money Market The shart, June 7.—The gold market was weak, an under steady sales of gold on the part of those who ar gradually abandoning the bull side of the room the prie fell to 113%, which is the lowest figure for gold since Aprillast. The steamer to-day took less than \$330,000 and it will be remembered that although last week' shipment was expected to reach two millions, it was only about a million. The complications in Europa are likely to lead to higher prices for and a heavy export of all kinds of breadstuffs this summer, and hence gold will have a powerful rival as an article of export to settle the balance of trade. It is said by the 'bulls' that the new Funding bill, should it become a law, will make a natural "corner" in gold, by authorizing the Sub-Treasuries to pay interest on deposits. They forget that as fast as the Secretary of the Treasury pays for bonds with the borrowed gold will flow into the will be sold in the open market by the previous owner of the bonds, and in this way the gold will flow into the premium all the time, each transaction necessarily depressing the premium, for the reason that the dobt is being steadily diminished.
