THE CORINTH CANAL.

Ronte of the Work.

It is announced by despatch from Athens that work on the Corinth Canal will be begun at once. This ship canal is an old idea, but the project now about to be realized is of re-cent origin. The Isthmus of Corinth, through cent origin. The Isthmus of Corinth through which it will be cut, which separates the Gulfs of Athens and Corinth and unitset the Morea with Attica, is from four to eight miles wide, and presents no great obstacles to the engineer. For the trade of the Black Sea, Turkey, Asia Minor, and the Greek Archipelago, with the Mediterranean coast, and Southern Europe, it a more direct and more advantageous opens a more direct and more advanta route than that which is now followed. canal will not be of as great consequence to the world as the Suez Canal; but, beside its

advantages to other regions referred to, it will be of value to the countries whose commerce passes therefrom through the Straits of Gib-raltar. The Isthmus of Corinth possesses many interesting associations from ancient times—on it are various remains of autiquity, including the 1sthmian wall, and traces of the celebrated temple of Neptune. The city of Corinth, near by, was in remote days an entrepot for all merchandise passing from sea to sea, and commanded, at the same time, the sea, and commanded, at the same time, the traffic between Attica and the Morea, north and south. The Romans sacked it a century and a half before the Christian tra; and the place subsequently belonged to the Western Emperors, the Venetians, the Turks, and latterly to the Kingdom of Greece. The money for the cutting of the canal, now to be begun, was raised in London; and the work, which is nominally controlled by the Greek Government, will be in the hands of English capitalists, and engineers. This gives assurance that it will be pushed through quickly and successfully.—Tribune.
