I take it that no stranger has the right to decide whether the husband acted rightly or wrongly appear that every tenasted as sumether. although it was not all he could wish, as not he can all he proposes to use, it passed the rigid scrutiny of that office, famous for the care and strictness of its examinations, and a patent was issued to him, in connection with Mr. Bernard Terfloth, one of connection with Mr. Bernard Terfloth, one of our well-known mechanics, for this new invention. For street cars two hands of the rubber, tion. For street cars two hands of the rubber, two and a half inches in diameter and fifty-six feet in length each, will be used. Each piece two and a half inches in diameter and fity-six feet in length each, will be used. Each piece will be used. Each piece will be used. Each piece will be attached to a separate drum, and as the stretch of the rubber will be ten feet for one, five hundred and sixty feet will be run off the drum before it becomes necessary to use its drum before it becomes necessary to use its fellow-drum. In running off this five hundred and upper ranks of life die at and twenty feet, a distance of 14,175 feet, over and they are not wanted." Even the two miles, will be traversed by the cars; the two miles, will be traversed by the cars; the other drum is then called into requisition, and while it is propelling the car the exhausted drum is wound up by the same leverage which the conductor uses to stop and control the car; the daughters of working-men who become presched the world into his confidence, and the production in the rate of six per cent. the leeyer off the drum in motion, a simple operation, which can be reversed in a minute if it becomes necessary to stop the cars. The present cost of running a street railroad car is over three thousand dollars a year, independent of the five mules required for it, whose value must be between six and eightfor nine hundred dollars. With the new arrangement, the cars are put in running order with the railbeart with the present of about \$550 a car, and have, while running, only the \$50 a month to pay the driver or conductor, whatever he may be called. The rubber will certainly asso as the car will run, and the machinery it moves is not calculated to wear out fasts, as there can be but very little friction on cog wheels. It has every convenience for holding the bed clothes, is easily managed, and it is impossible for it to get out of order. The use of props or hinged feet to support the mattress when extended, or ropes to rogulate it, are cultivaly done away with, as they are all very unsafe and liable to get out of repair. The BEDSTEAD is formed by sinply turning out the ends, or closing them when the SOFA is wanted. They are, in comfort, convenience and appearance, far superior to and cost no more than a good Lounge.
