THE PRUSSIAN VICTORY. There was another fight yesterday between the Prussians and French at Weissembourg, a little French town on the right bank of the Lauter river, immediately upon the frontier, thirty-four miles north of Strasbourg. The place was assaulted by three or four corps of the Prussian army under the command of the day we had to defend against the claim of an Crown Prince, and the opposing force, a single ambitious Jerseyman, Poe's ballad of the division of the French army, was driven from the field and the commanding general killed. A Bailroad Defaication in Baltimore. [Special Despatch to the Phila, Evening Bulletin.] WASHINGTON, Aug 5 .- There was conside able excitement yesterday in financial circles over a rumored defalcation of one of the officers of the Baltimore and Ohio Railroad. It appears on investigation that Mr. Crawford, late Secretary of the Company, admits having used 20,000 shares of the Company's stock, the value of which at par, fifty dollar per share, would be \$1,000,000, though at its market value it would not exceed five hundred thousand dollars, and that he had borrowed from various parties the sum of three hundred thousand dollars, hypothecat ing the stock at fifteen dollars per share as security for the loans thus made. The amount thus obtained had been invested partly in the purchase of a claim upon the General Governnent and partly in various money speculations. From previous information it was be lieved that the stock had been hypothecated chiefly at New York, but it is stated that this is not the fact: that it has all or nearly all been hypothecated in Baltimore. The money raised was upon an over-issue o stock of the Parkersburg Branch. The parties holding the stock will not, it is thought, be losers, the general impression being that the Company is liable for the whole issue. The certificates bear, it is said, the genuine signature of the President and Secretary of the Company, the proper persons to sign them, and are otherwise regular in form, and under the decision in the Schuyler case in connec tion with the New Haven Road, the Company

it is generally believed, will be liable. PENNSYLVANIA.

From the Coal Region.

[Special Despatch to the Phile. Evening Bulletin.] POTTSVILLE, Pa., Aug. 5 .- Under the ar rangement for 1870, by which the wages of the miners are made proportionate to the price of coal, three dollars per day being the basis, with a graduated scale up and down, the collieries south of Broad Mountain resumed work on Tuesday, and those north of the mountain, on yesterday, the latter having de manded some concession for contract, which has been acceded to by the operators. It is believed by competent judges here that

this new arrangement will bring the price of coal, at Port Carbon, to two dollars and a half per ton, at an early day. The general condition of the miners, at the end of this prolonged strike, is very distress-

ing. Many of the most thrifty men have not only exhausted all their savings, but have mortgaged their little properties, and in many ases their wives and daughters have crossedover into the rich farming district south of the coal region, begging for the support of their Notwithstanding the protracted strike in the

A DREADFUL ACCIDENT.

mdard.

The Result of the Careless Use of Drugs. The Chicago Tribune of July 31st says : 'One of those accidents which happen one in a while as a protest against permitting in-competent or careless persons to deal out drugs and chemicals, occurred in this city on Friday. The way it took place was this: Mr. Whitesman, a clerk in the dry goods store of andel Bros., at the corner of Clark and Van collaterals were four and not per second dates having balances left with them at ree per cent. For ign exchange was lover, although nominally for sixty days' sterling, and 100% and 100% and 100% for sixty days' sterling, and 100% a general dullness of the cay. Frices advanced ou light transactions, and the undertone of the market was decidedly firm. The steadiness of our secusities in the English market, the light offerings to day at the Tressury purchase and the steadiness of gold, com-bined to occasion an advance of a quartor to three-eighths per cent. In the more active issues. It should not be forgotten, however, that the foreign bankra, who were heavy purchasers at the recent low quotations, bought simply for a brief speculative tura and hot for investment. Hence, if the present price should bring out sales of the bonds so held it will not be all surprising. Indeed, the street may be pre-ly doubtful whether speculative sales at these prices. It does not all surprising the truth it is exterme-by doubtful whether speculative sales at these prices. Wi prove at all profitable. The government offer to will prove at all profitable. The government offer to have known the effect which those powerful lodies have upon each other, or how to mix them in proper and harmless proportion The sad consequence was that the unsuspect-ing young man took the bottle, which was hardly less destructive and daugerous than a torpedo, and went his way. He had not pro-ceeded far before the compound exploded, burning his face and body frightfully, and, worse than all, destroying his eyesight foran all, destroying ever. He was taken to his home at No. 228 State street, and Dr. Walker and others were summoned to his aid. They did all that skill and science could do to mitigate his sufferings. ut it was beyond human power to restore sight to his darkened eyes. "This is a case of peculiar hardship. A roung man, eighteen years of age, alone in. the world, without father or mother, meeks

with a fate, that, to most men, would be wors during all that time, not a ray of blessed sunshine will he see: he will not be able to gaze in the face of a triend, and, worse than all will be debarred from earning his living and, perhaps, will have to depend on the cold and precarious charity of the world. He is to be pitied; but what can be said of the sysim which is so loose as to place the lives o the public in constant peril, and which exposes us, one and all; to the di-astrous results of the mistakes made by untrained lignorar uses in drug stores "
