The greater part of the road is already completed, and the carnings from the indished portion are already more than sufficient to pay operating expenses and interest on the bonds. The balance of the work is progressing rapidly, in time for the movement of the coming grain crops, which, it is estimated, will double the present income of the road.

The established character of this line, running as it does through the heart of the most thickly settled and richest portion of the great Stancol Lowa, together with its present advanced condition and large earnings, warrann is in unhesitatingly recommending these bonds to investor as in every respect, an undoubted security. These bonds have 50 years to run, are convertible at the option of the holder into the stock of the Company at pur, and the payment of the principal is provided for by a staking fund. The convertibility privilege attached to three-bonds cannut-fail-to-cause them at no distant day to command a market price considerably above par, besides paying about 9 per cent., currency, interest in the meanwhile.
