

FARM AND HOUSEHOLD ITEMS.

We invite communications from all persons who are interested in matters properly belonging to this department.

Look Ahead!

At this season of the year, farmers should carefully lay their plans for the coming season. What to plant, and where to plant it, should be well considered, and the plans for Spring carefully laid. Take into consideration what crops are likely to prove the most ready sale, and the most productive, and govern yourself accordingly.

About Driving.

Drive slow for a mile or two, until the horse gets warmed up, then increase the speed gradually; if urged beyond his natural gait for a day's travel, it will injure him, but for an hour's drive, you may put on a little extra speed.

If brought into the stable very warm, let him cool a little before the blanket is put on, for if put on immediately it will add to the heat. If not very warm, blanket him at once. As soon as cool, clean and rub him down—rub his legs well. Do not let him stand over night without being cleaned and well-rubbed.

In teaching a young horse to drive well, do not hurry to see how fast he can trot. Keep each pace clear and distinct from the other—that is, in walking, make him walk, and do not allow him to trot. While trotting, be equally careful that he keeps steady at his pace, and do not allow him to slack into a walk.

The Dyspeptic Farmer.

It is a curious fact that our dyspeptic farmers, hard-working early rising, big dinner-eating, though they be, take better care of their horses than they do of themselves. As the horses come, steaming with work, you will always hear:

"John, let their cool off before you feed them."

But the farmer who insists on this treatment of his horses will sit down to the dinner table hot and fatigued and commence at once to satisfy his cravings of an unnatural appetite. And after dinner he bolts off to the field, fretful and uneasy under the impression that his employes are taking undue advantage of him of a fifteen minutes' rest he allowed.

This man cannot understand why his neighbor, who cares for his stomach as much as he does for his horses, and who eats at the proper time and in the proper manner, and insists on every man having a rest of half an hour after eating, is so free from sickness, is always in such a humor, and accomplishes so much more than himself. We have some farmers of the dyspeptic type in every neighborhood.

Twenty grains of carbonate of soda, taken the last thing upon going to bed, will frequently produce sleep when all sedatives have failed.

A mere ribbon left off from the neck will cause sore throat, and perhaps death—so physicians say. Young ladies, take notice.

FOUTZ'S CELEBRATED Horse and Cattle Powders.

This preparation, long and favorably known, will thoroughly re-invigorate broken down and low-spirited horses, by strengthening and cleansing the stomach and intestines. It is a sure preventive of all diseases incident to this animal, such as LUNG FEVER, GLANDERS, YELLOW WATER, HEAVES, COUGHS, DISTEMPER, FEVERS, FOUN RIVER, LOSS OF APPETITE AND VITAL ENERGY, &c. Its use improves the wind, increases the appetite, gives a smooth and glossy skin—and transforms the miserable skeleton into a fine-looking and spirited horse.

To keepers of Cows this preparation is invaluable. It is a sure preventive against Rinderpest, Hollow Horn, &c. It has been proven by actual experiment to increase the quantity of milk and cream twenty per cent, and make the butter firm and sweet. In fattening cattle, it gives them an appetite, loosens their hide, and makes them thrive much faster.

In all diseases of Swine, such as Coughs, Ulcers in the Lungs, Liver, &c., this article acts as a specific. By putting from one-half a paper to a paper in a barrel of swill the above diseases will be eradicated or entirely prevented. If given in time, a certain preventive and cure for the Hog Cholera.

THE ONLY RELIABLE CURE FOR

DYSPEPSIA

IN THE KNOWN WORLD!

DR. WISHART'S GREAT AMERICAN DYSPEPSIA PILLS and PINE TREE TAR CORDIAL are a positive and infallible cure for Dyspepsia in its most aggravated form and no matter of how long standing.

They penetrate the secret abode of this terrible disease, and exterminate it, root and branch, forever.

They alleviate more agony and silent suffering than tongue can tell.

They are noted for curing the most desperate and hopeless cases, when every known means fails to afford relief.

No form of dyspepsia or indigestion can resist their penetrating power.

DR. WISHART'S PINE TREE TAR CORDIAL

It is the vital principle of the Pine Tree, obtained by a peculiar process in the distillation of the tar, by which its highest medicinal properties are retained. It invigorates the digestive organs and restores the appetite. It strengthens the debilitated system, it purifies and enriches the blood, and expels from the system the corruption which scrofula breeds on the lungs. It dissolves the mucus or phlegm which stops the air passages of the lungs. Its healing principle acts upon the irritated surface of the lungs and throat penetrating to each diseased part, relieving pain and subduing inflammation. It is the result of years of study and experiment, and it is offered to the afflicted with the positive assurance of its power to cure the following diseases, if the patient has not too long delayed a resort to the means of cure:

Consumption of the Lungs, Cough, Sore Throat and Hoarseness, Bronchitis, Liver Complaint, Blind and Bleeding Piles, Asthma, Whooping Cough, Diphtheria, &c., &c.

A medical expert, holding honorable collegiate diplomas, devotes his entire time to the examination of patients at the office parlors. Associated with him are three consulting physicians of acknowledged eminence whose services are given to the public FREE OF CHARGE.

This opportunity is given by no other institution in the country.

Letters from any part of the country asking advice will be promptly and gratuitously responded to. Where convenient, remittances should take the shape of
