FARM AND HOUSEHOLD ITEMS

We invite communications from all persons who are interested in matters properly belonging to this department.

Kindness to Horses.

We sometimes see men having the care of and driving a team of horses or mules. whipping the poor animals because they do not understand their wishes. Many a time the leader horse or mule is unmercifully beaten for no other reason than that the driver's order is not understood. If gently to the leader, pat it a few times on the neck to re-assure it of his friendship. take hold of the bridle and lead it a few steps in the direction he wishes to go, and | ble, and then when the weeds show themall this without any excitement or anger on his part, the leader will always do its best to please him. In driving a horse to all you have to space. This method is a carriage, however gentle and well-trained he may be; something may frighten him; this is no fault of his-he cannot help it. All he needs is a word or two of encouragement, gently spoken, to reassure him of his master's care and presence, and then all is right. There should be no whipping done. The driver should recollect that he gets alarmed or frightened too sometimes, and would think hard of being whipped for it.

To Train a Horse to Stand.

The American Stock Journal contains the following instructions:

"Take your horse on the barn floor and throw a strap over his back and fasten it to his right fore foot; lead him along and say "whoa," at the same time pull down the strap, which throws him on three feet and makes him stop suddenly. This is the best way known to teach whoa, though you can put on the war bridle, and say whoa, and give him a sharp jerk that will stop him about as soon as the strap to his foot. Then put him in harness, with the foot strap, as directed to do under the head of "training to harness," and drive him up to the door. The moment he undertakes to move, take his foot and say whoa. Get in your carriage and get out again; rattle the thills; make all the noise getting in and out you can; give him to understand, by snatching his foot each time he moves, that he must stand until you tell him to go; and after a few times you can put the whole family in the carriage and he won't stir out of his tracks.

Look to Your Grafts.

It should not be forgotten that grafts, which have been set this spring, when they once fairly start to grow they mostly go ahead rapidly, and becoming laden with leaves, and the hold they have upon the stock being very slender, they frequently break off. Birds will also light upon them and their added weight snaps them. They, therefore, should be attended to and pruned, when they have shot six to eight inches by one-half. They usually make better branches by this abscision, and in no event is there any injury. Grafts set this spring should be examined, and where the wax has become loose and fallen away, or where the split has widened, additional wax should be supplied, otherwise the water gaining entrance will either kill or weaken them, giving them an unsightly appearance.

Directions for Cleaning Paint.

Provide a plate with some of the best whiting to be had, and have ready some clean warm water and a piece of flannel, which dip into the water and squeeze nearly dry; then take as much whiting as will adhere to it, apply to the painted surface, when a little rubbing will instantly remove any dirt or grease. After which wash well with clean water, rubbing it dry with soft flannels. Paint thus cleaned looks as well as when first laid, on, without any injury to the most delicate colors. It is far better than using soap, and does not require more than half the time and labor."

SOAP-SUDS FOR GRAPES .- A. J. Downing says: "I have seen the Isabella grape produce 3,000 fine clusters of wellripened grape fruit in a season, by the liberal use of manure and soap-suds from the weekly wash." The effect of soapsuds on other plants is something surprising. A cypress vine, which had remained stationary a fortnight, when about two inches high, immediately began growing after a good watering with soap-suds, and grew six inches the first five days.

Nice Articles for Breakfast.

Fried Bread is very good, and is prepared by simply dipping it in a couple of eggs well-beaten, to which a cup of milk, a little pepper, and salt have been added, and then frying it in butter. If it is too soft to turn, set it into the oven and brown it on top.

Ham Toast is also very good, and is made by chopping lean ham fine, mixing with it a little pepper, butter, and two well-beaten eggs; warm all in a pan, spread on hot buttered toast and serve.

COAL FOR Hogs .- Says an exchange ; if farmers would go to the coal pits and get all the rejected coal and break it up. and keep a supply where the hogs could have free access to it, they would have very few sick ones. It is from this part the driver in such a case, could speak that sulphuric acid is made, hence its medicinal properties.

MR. SAMUEL II, BECK is this day admitted to an interest in my business, New Bleomfield, January 15, 1870.

The business will be continued at the same place, under the firm of F. MORTIMER & CO.

THE KIDNEYS.

THE Kidneys are two in number, situated at the upper part of the loin, surrounded by fat, and consisting of three parts, viz: the Anterior, the Interior and the Exterior.

The Anterior absorbs. Interior consists of tissues or veins, which serve as a deposit for the urine and convey it to the Exterior. The Exterior is a conductor also, terminating in a single tube, and called the Uniter. The Ureters are connected with the bladder.

The bladder is composed of various coverings or tissues, divided into parts, viz.: the Upper, the Lower, the Nervous, and the Mucous. The apper expels, the lower retains. Many have a desire to primate without the ability; others unimate without the ability; others unimate without the ability to retain.—This frequently occurs in children. This frequently occurs in children.

To care these affections, we must bring Into action the muscles, which are engaged in their various functions. If they are neglected, Gravel or December 1. or Dropsy may ensue.

The reader must also be made aware, that however slight may be the attack, it is sure to affect the bodily bea th and mertal powers, as our flesh and blood are supported from these GOUT, OR RHEUMATISM .- Pain occurring in

the loins are indicative of the above diseases. They occur in persons disposed to reld stomach and chalky concretions. The Gravel.—The gravel ensues from neglect or improper treatment of the kidneys.—These organs being weak, the water is not expelled from the bladder, but allowed to remain; it becomes feverish, and sediment forms. It is from this deposit that the stone is formed and manyle means.

Dropsy is a collection of water in some parts of the body, and bears different names, accordlag to the parts affected, viz.; when generally diffused over the body, it is called Amauren; when of the abdomen, Ascites; when of the thest, Hydrothorax.

TREATMENT.—Helmbold's highly concentrated compound Extract Buchn is deckledly one of the best remedies for diseases of the bladder, kidneys, bladder, drepsical swellings, rheumatism and gonty affections. Under this head we have arranged Dyerria, or difficulty and we have arranged Dyemia, or addictily and pain in passing water, Scarty Secretion, or small and frequent discharges of water; Strangary, or stopping of water; Hematuria, or bloody urine; Gout and Rheumatism of the kidneys, without any charge in quantity, but increase in color, or dark water. It was always highly recommend by the late Dr. Physick, in these effections. ick, in these affectious.

This medicine increases the power of digestion, end excites the absorberts into healthy exercise by which the watery or calcarcons depositions, and all unnatural enlargements, as well as pain and inflamation, are reduced, and it is taken by men, women, and eldidren. Directions for use and dict accompany.

PHILADELPHIA, Pa., Feb. 25, 1867.

H. T. HELMBOLD, Druggist: DEAR SIR-I have been a sufferer, for upward of twenty years, with gravel, bindder, and kidney affections, during which time I have used various medicinal preparations, and been under the treatment of the most eminent. Physicians, experiencing but little relief.

experiencing but little relief.

Having seen your preparations extensively advertised, I consulted with my family physician in regard to using your Extract Bucha.

I did this because I had used all kinds of advertised remedies, and had found them worthiess, and, some quite injurious; in fact, I despaired of ever getting well, and determined to use no remedies hereafter unless I knew of the ingredients. It was this that prompted me to use your remedy. As you advertised that it was composed of buchu, cubebs, and juniperberries, it occurred to me and my physician as an excellent combination, and, with his advice, an excellent combination, and, with his advice, after an examination of the article, and consulting again with the druggist, I concluded to try it. I commenced its use about eight months ago, at which time I was confined to my room. From the first bettle I was astonished and grat-From the first bettle I was astonished and gratified at the beneficial effect, and after using It three weeks, was able to walk out. I felt much like writing you a full statement of my case at the time, but thought my improvement might only be temporary, and therefore concluded to defer and see if it would effect a perfect cure, knowing then it would be of more value to you, and more satisfactory to me.

I am now able to report that a cure is effected for a frer using the remedy for five months.

I have not used any now for three months.

I have not used any now for three months, and feel as well in all respects as I ever did.

Your Buchu being devoid of any unpleasant taste and oder, a nice tonic and invigorator of the system, I do not mean to be without it

whenever occasion may require its use in such
