Tuesday, December 27, 1870.

#### A Good Offer.

It is well known that the regular subscription to DEMOREST'S MONTHLY MAGAZINE IS \$3. That we may bring our Journal to every house in this county, we have made arrangements, by which we are enabled to send the Bloomfield Times and Demorest's Monthly for one year

This Monthly stands unrivaled as a family magazine. Its choice literature, its superior music, its large amount of valuable information in regard to the Fashions, and artistic illustrations, give it a just claim to its well-earned title, "The Model Magazine of America." Those who prefer Godey's Ladies' Book can

Disappearance of an Island. A large island is missing. Capt. Plock, of the barque Adolphe, bound from Iquique to London, states, that while passing the New Hebrides Islands, he discovered that Aurora Island had entireit was before situated. What makes this occurrence the more deplorable, says the "Pall Mall Gazette," is that Aurora was one of the most fertile of the group of islands of which it formed a member .-It was last seen in latitude 15-2 S., longitude 168-25 E; it is described as having floor. been about thirty-six miles in length, and upwards of five miles in length, and upwards of five miles in breadth. Any information respecting it will be thankfully received and it becomes a question whether a reward should not be offered for its lar position. There is, however, the consolation-that if England were to dis pear like Aurora Island, there would, no doubt, be a rigid investigation made into the circumstances by the rest of this world. France would miss a useful depot for her refugees; Ireland would suffer fished us up again.

Gunpowder Plot at Harvard College.

Stoughton Hall, one of the dormities immediately under the rooms occupied by members of the freshman class. The result was the destruction of almost every thing in two of the rooms, the shock lifting the floor more than a foot, tearing up a plank in each of the rooms, scattering and destroying their contents, and sending the occupants forcibly up against the ceiling. In two of the adjacent rooms the floor was divided and one part raised nearly a foot. The rooms were soon filled with smoke, which, pouring up through the floor increased the terror of the already affrighted occupants .-An alarm of the fire was started and the Cambridge fire department turned out, but fortunately their services were not

Some idea of the power of the concussion may be gained from the fact that persons in the second story above were knocked off their feet, and the pictures hanging in the rooms in the third story were shaken from their nails to the floor. The strangest thing abour the explosion is that nobody was hurt. A person passing by the outside was knocked down by the rush of air from the cellar, and almost stunned. The whole affair is charged upon the sophomores, but nothing definite is known. A quantity of fuse was found in the cellar, which may aid in detecting the criminals. President Elliot the next morning at chapel spoke of the outrage, and desired the cooperation of the students in bringing the perpetrators to justice.

Attempted Burglary at the Mechanics' Saving Bank.

On Friday night last, some daring burbuilt. An entrance was effected by means burglars tools, once inside the building they immediately turned their attention to the door of the vault, and from the marks left of their manipulations determinedly worked to accomplish their designs. The door of the vault and lock, built by Herring, Farrel & Sherman, of New York, are of a very complicated nature, and three heavy iron flanges had to be disposed of before the burglars could entertain the thought that their efforts would a number of wedges and chisels of all sizes and styles, the first flange was chiseled through, but the next one being much heavier, they found it utterly impossible to make any impression upon it. Their working at the side only served to more effectually tighten the door of the vault at the top and the bottom. From the marks left on the door and flanges it is natural to suppose that they worked no little time in endeavoring to gain an entrance at this point, but finding that it would be impossible to do so, they desisted all further attempts here and receive "Godey's" and THE TIMES for \$3.50. shifted their quarters to a new and what they supposed would present a finer field of labor. Repairing to the side of the vault, near the rear, they tore off the wainscoating for a considerable distance but finding the wall built of heavy gran-ite thoroughly comented, they wisely came to the conclusion that all attempts to acly disappeared, and no trace of it was to complish their purposes would prove be seen on the face of the ocean where futile, and that considerable more time than one night would be necessary to gain admittance to the vault of the Mechanies' Saving bank, consequently they beat a retreat, leaving their wedges in position in the door of the vault, and nearly all their tools, scattered over the

Their workings must certainly have been very quietly proceeded with, as people are passing that locality at all hours of the night and had any unusual noise been made it could have been heard.

Among the tools left in the Bank were recovery. If large islands take to disap- a sledge hammer, jimmy, wedges, chisels, tice in the Alaska Herald. pearing in this fashion we shall soon cease | &c., two pairs of overalls and jackets, and to congratulate ourselves upon our "insu- also a pick handle, which was found standing by the window, and was doubtless intended to be used as a weapon of defense should their movements be discovered and their capture attempted.

vault has been constructed was the only barrier which impeded their progress, as from ennui with no one to abuse; and we may be sure that, unless we had previously settled the Albama claims, and the many visible marks of their manual labor plainly tell that they exerted themselves to the utmost to accomplish their nefarious purposes.

A number of the tools used, have been On Thursday evening a week, some of identified, and some clue has been obthe students of Harvard College exploded tained which we earnestly hope may rea large keg of powder in the cellar of sult in the apprehension of the burglars and should such be the ease, the bold villians may rest assured that stern and own peril, until assistance arrived. A large unrelenting justice will be speedily meted number of valuable buildings were thus out to them .- Altoona Tribune.

THE NEXT APPORTIONMENT. - The House of Representatives now has 244 members. By the new law, Congress, under the next apportionment, is to have 234 members. The census returns indicate that the population is about 38,000, 000, an increase of 7,000,000 since 1860. This will give about 163,258 population to a member. The New England States will each lose one member, Massachusetts losing two. New York will lose four, Pennsylvania and Ohio three each. Of the Southern States, Virginia, North Car-olina, Lousiana and Kentucky will lose one each and Texas will gain one. Of the Western States, Michigan, Minnesota, Iowa, Wisconsin and Kansas gain one, each, and Illinois and Missouri two. New Jersey, it is thought, may gain one, and is the only State on the Atlantic coast which will gain. Of the whole country, New England loses seven, the Middle States nine, and the Southern States three -while the West gains nine-the Pacific States remaining as heretofore.

MESSERS. ALLEN, proprietors of the Montreal ocean steamships, comtemplate establishing a steam fleet between Philadelphia and Liverpool.

The sweetest thing in bonnetsa pretty face.

A Caution to Publishers.

The most outrageous swindle which has come to our knowledge is the folglars attempted to rob the vault of the lowing : - A paper called "Moore's Rec-Mechanics' Saving Bank, corner of ord," (it is a pity a true record of the fel-Eighth Avenue and Twelfth Street and low could'nt be had,) is sent to a large numwere only unsuccessful in their efforts by ber of papers throughout the country .the manner in which the vault has been The "Record" purports to be published by Moore, Howard & Co., advertising agents, of prying open one of the windows open- 517 Locust street, and contains advertiseing on Eighth Avenue with a jimmy ments of H. A. Carty, 315 Chestnut St., Being supplied with a complete kit of Philadelphia, and of L. Perkins & Co., Wilmington, Del., which a slip mailed with the paper authorizes the recipient to publish; bills for such insertion to be sent to the above agency. The whole thing is a gross swindle, there being no such firm as M. H. & Co. at the designated number in Locust St., nor probably any where else .-Neither is there any such person as McCarty at 315 Chestnut street. As to Perkins & Co., we cannot say, but a person is be crowned with success. By means of judged by the company they keep, and P. & Co. are in very bad company.

The Grand Jury of Washington found an indictment against Congressman Bowen of South Carolina for bigamy. He married in August last, in that city Mrs. Pittigrew King, then a clerk in one of the departments; and now some of his political opponents at home have set on foot this conspiracy against him. About ten years ago he was intimate with a woman, but was never married to her, and has never recognized her as his wife. But recently desiring to marry, she\_filed a bill applying for a divorce in Louisville to which no attention was paid, as she specified no time nor place of her marriage to Bowen. She subsequently married a man out West, and will, if called, testify that she was never married to Bowen, who has no apprehension at all of convic-

#### Miscellaneous News Items.

"A Stratford, Conn., man has buried his fourth wife and is looking about for the fifth. That he should many again appears to be a four gone conclusion.

The "Times" of India mentions that during last year, in Java, 182 men, 52 wo-men, and 28 children were killed by tigers, 158 persons by crocodiles, and 22 by snakes.

"New Orleans, St. Louis, San Francisco, and New Jerusalem papers please copy," is a note attached to a marriage no-

Peter Adams, a merchant of Bath, New York, recently, was swindled by a confidence man out of \$1,475, the entire amount with which he came to the city the day before, for the purpose of purchasing a stock of goods for the winter trade.

A would-be highwayman, near Prov-The complete manner in which the idence, seized a gentleman's horse, when the owner sprang out from his wagon and gave him a sound thrashing, a courageous lady passing by volunteering to hold the horse during the ceremony.

A singular occurrence is reported from Fostora, Ind. A Mrs. Hanna had suffered for eight years from cancer in the stomach. A few hours after her death the gasses generated in the stomach and produced so violent an explosion as to shake the house in which she lay.

A little German girl, of Azatlan, Wis., exhibited great presence of mind last saved from conflagration.

From the issue of March 23 of 'Brother Jonathan,' a paper published in New York, in 1861, we extract the following item: A young Swedish girl, Christine Nilsson, has been sent to Paris by the Duchess of Ossgothland, to be educated at her expresses as a signar in consequence of her expense, as a singer, in consequence of

the great beauty of her voice. A mean trickster recently called up-on a Miss Rowe, at Manchester, N. H., and informed her that her brother, who resides in Kansas, had died a few days pre-viously, and that his friends there were short about \$30 in making up the funeral expenses. She immediately advanced the money, supposing that it was to be sent by express. Next day she discovered that she had been made the dupe of a wily scoun-

A man was exhumed recently from the cellar of a ruined house in Strasbourg, where he had been buried under ruins for more than five weeks. He had sustained life during all this while from some lard oil, of which a barrel had been stored in the cellar. When brought to the light, the unfortunate man presented a horrible sight and could scarcely move a

Some remarkable stones have been found on the site of a mound in the south-west part of Montgomery county, Mo., which bear evidence of having been cut by hand for building an arch. They are beveled like arch stones, one of them being in the shape of a key stone. The corners are all straight and well defined, and there can be no doubt but that they were worked by the hand of a man, it may be centu-
