To Measure a Bin.

The following rule for determining the amount in bushels of a box or bin, was sent to the New York Farmer's Club, by Merchant Kelly, of Bostonville, Indiana, If you multiply the solid feet by 45, and divide the product by 56, the quotient will be bushels, because one solid foot is just 45 56 of a bushel of 215 2-4 inch-Example :-- How many bushels in a arib, box, bin, or wagon bed eight feet long,4 feet wide and 2 feet deep ? and 2 multiplied by 45, makes 2,880, which divided by 56 gives 51 3-7 bushels in said vessel. If it be ears of sorn, deduct for cobs. Some persons deduct a half for cobs.

Der Lameness in hogs is caused somesimes by the large pores in the back part of the leg getting clogged. They are a fittle above the knuckles in the back part of the legs. Wash the same legs with acap and luke warm water, using a stiff brush and rubbing hard till the pores are open, when the lamoness will leave.
