NEW BLOOMFIELD, PENN'A.

Tuesday, March 7, 1871.

THE premium on Gold remains very steady, and all attempts to force up the price have failed. The closing rate last week was 110%.

THE bill making Philadelphia the place of holding the centennial anniversary has passed both houses of Congress. For this legislation we may thank the exertions of the Pennsylvania Senators.

GEORGE L. HARRISON, Esq. of Phila-delphia, has been appointed by the Gov-ernor as President of the Board of Public Charities, in place of Gen. Kane who resigned. This is undoubtedly a good change, and we trust will enable the board to work more harmoniously.

DR HELMBOLD took his famous 5horse tandem team to Washington during the late Carnival. It probably attracted more attention than any other displayed on the avenue, as it undoubtedly is the finest turn out in the United States. this comes from making good medicines and advertising them freely.

THE Forty Second Congress met at noon on Saturday. It is probable that this session will last for a month, and perhaps more, as considerable business has been left undone by the Congress which has just expired. The administration is also very anxious to have a report from the San Domingo Commissioners, and to have action taken on that subject.

THE difficulties between the miners, the operators and the railroad companies still continue without any immediate prospect of a compromise. Already the trouble is having a sad effect on the manufacturing interests of the country, besides forcing coal up to such a price in the cities as to cause great suffering to the poorer classes. The price for coal in New York is now \$12,50 per ton, and they say the quantity is not sufficient for another months supply.

THE PUBLIC debt statement of March 1st shoes that the total debt at that date was \$2, 444,737,661,23, being a decrease of \$7,317,960,08 during the month of February. When we consider the pecuniary difficulties under which thousands are suffering, and the general stagnation ment: of business, throughout the whole country, it would seem as though it would be a wise policy to manage the finances of the a large monthly decrease of the debt,

men. During the Carnival at Washington an electric light was shown from the dome of the Capitol on two evenings by which fine print could be read at the Treasury—so says the "Chroniele."— The light was produced by electricity passing between two carbon points .-The electricity was generated by eighty cells of Grove's battery, with twelve and or dust. a half square feet of Plantinum surface. It is not improbable that at no distant time the leading thoroughfares of our cities will at night be rendered as light as noonday by the use of electric illuminating apparatus.

On the evening of the 1st inst., Miss Mary Connell, a young lady of 28 years, daughter of the State Senator, George Connell, was waylaid by a ruffian, who attacked her, knocking her senseless by a blow in the face, and then rifled her pockets of a valuable gold anchor lever watch and chain, and her pocket-book containing a small amount of money.— The outrage took place within a couple of squares of her father's residence, on the Darby road near Mount Moriah Cemetery, Twenty-seventh Ward. Miss Connell is a music teacher. At the time of the attack she was on her way home from the city, where she had been attending history of skating on the Hudson.

Recently a party of white men en-tered the abode of a colored man in Hempstead, assaulted the old man, and placed his wife on a heated stove. old man seized an axe and buried it in the head of one of the party, who was born away by his comrades. The axe is born away by his comrades. The axe is covered with blood, hair, and brain matit may be, cannot be found alive.

A Brave Girl.

The following incident which happened on Lake Champlain, is told by a correspondent living at Plattsburg:

One evening a short time since a young lady and gentleman of this village, who had frequently been skating before, went out upon the bay, but believing the old axiom that "Two is company," went to an unfrequented part, where they could enjoy the skating and each other's society unmolested.

After skating for some little time near shore, the gentleman proposed that they should go further out where the ice was smoother, to which she consented, and they accordingly ventured out about two miles. Here they found the ice in beautiful condition, and the gentleman was proceeding to do the grapevine, forward and backward roll, together with many other fancy figures only known to accomgave way beneath him, and in a moment he found himself struggling in cepts may have the weight of example." the water and unable to extricate himself the ice breaking as fast as he attempted to raise himself on its edge .-The young lady, true to her womanly instincts, began to scream at the top of her voice, but the privacy they had sought had taken them beyond the hearing of to them. He besought her to go to the shore and endeavor to procure assistance, but she well knew he must perish before she could get back, even if she found no difficulty in procuring assistance. Then an idea came into her head, and she immediately put it in execution.

short, as the yielding ice warned her when she moved toward him and tried to throw him one end. What more could she do? She hesitated a moment; then, slipping off her gaiters, both stockings were soon tied to the end of the dress and jacket, and yet it was too short .-Meantime, the young man was rapidly becoming exhausted, and if she was to save him no time was to be lost. For a moment her hands disappeared in the drapery about her waist, and then something fell on the ice about her feet—it was her hoop-skirt. This was quickly servered into half a dozen pieces, and added to the jacket, dress, and stockings, and, to her great delight, this made the line long enough to reach him. Bravely she tug-ged at one end of it, while he clutched the other with the grip of a man who knew that that was all which stood between him and eternity. In a few min-utes she landed him safely on the solid ice, and then the red jacket and dress were wrapped about her as best they could be, and the two started for home, where they arrived without being noticed by any one. Few were the words spoken on the journey home; but they must have been to the purpose, as the wedding suits are ordered, and before the ice shall disappear from our beautiful lake they will be married.

At a recent lekture in Newark, Professor Weeks performed this experi-

A quantity of lime was placed in a metallic box about two feet long and eighthe compartments, and in a few moments particularly when this decrease is made the savory smell of the edibles and aro-from that indebtedness which pays no infilled the room.

> While the cooking was going on the Professor turned with all the cool selfpossession of an accomplished cook away from the steaming supper and talked about phosphorus. A silver coffee-pot and china cup were passed to the audience and the contents tasted and tested, and more than one lady admired the plan of so quickly getting a meal without smoke

On Thursday three Newburghers, named respectively Charles F. and Geo June and Gilbert Carpenter, skated from Newburg to Albany, a distance of 100 miles, in seven hours and five minutes' skating. From Newburg to Poughkeepsie, distance sixteen miles, they found the ice very rough, and were one hour and fifty minutes skating that distance. From Hyde Park to Catskill, forty miles, the ice was in splendid condition for skating and ice-boating, and they made that distance in two hours and a half, or an average of sixteen miles an hour. Just before reaching Castleton they found the ice very rough, and were compelled to cross and recross the river several times. On the last mile of the one hundred Charles F. June made a "spurt," and skated it in three minutes and one second. The feat is believed to be without parallel in the

A despatch from Neenah, Wisconsin, says on Saturday night last John Hess, who has been confined in jail at Oshkosh, Wisconsin, escaped and immediately went to Neenah his former home, thence to the home of his divorced wife, and murdered her. The murderer then repaired to his brother's house, and hid in the attic, where he was discovered and ter, and a physician says that whoever an effort made to arrest him, when he shot himself through the head.

An Example.

The McConnelsville Herald says:
"Rev. Cooper, of the Presbyterian church, of this place, took an advanced position on the temperance question last Sunday. An advanced position for a minister even. Before the morning service began the deacons of the church made their annual report, and announced that the books were open for subscriptions for the coming year. After this announcement was made, Rev. Cooper instructed the deacons as follows: 'To receive no money on subscriptions from families, any part of whose income is derived from the sale of intoxicating liquors; to mark all such subscriptions as paid, and charge the same to his account; that if the amount allowed him as salary could not be raised from other sources, the salary might be reduced just as much as the subscriptions from these doubtful plished skaters, when suddenly the ice sources amounted to.' These instructions gave way beneath him, and in a mo- were given by Rev. Cooper that his pre-

> A married woman in Kansas, who recently cloped with a physician, left the following unique note for her husband:

"Dear Hubby: You're played out. I like Dr. —— so well that I prefer goall who could have been of any service ing with him, you, good for nothing degenerate cuss. It's none of your business where we've gone to. It won't do you a bit of good to follow us, for I won't live with you another day to save your life. You made a mistake in thinking I loved you. I never did. I married you for convicnience' sake. I've got the ba-She first took off her jacket and dress, and tying them together undertook to reach him with one end; but it was too who has you next will have a healthy old prize. Good-bye. Be virtuous and you will be happy. YOUR LATE WIFE.

> There is a good story told in Washington about a Chinese servant employed by Admiral Porter. On reception day the duty of attending door was assigned to Ah Sin. Accustomed to the social usages of his own land, where a visitor's rank is indicated by the size of the card, and where a huge yellow one means the presence of a prince, he treated the little bits of pasteboard with contempt. While nodding his head and tossing the bit of paper unceremoniously in the basket, the gas collector happened to present his bill. The long yellow slip took Ah Sin, and with profound salaams he bowed the astonished gas man into the presence of the amazed family.

> per Dr. A. D. Newell of New Brunswick, N. J. had a pure-blooded Chester hog, which he valued at \$60. By arrangement, sixty of his acquaintances invested \$1 for a chance of the ownership of the hog, the person guessing nearest to its weight to win the animal. The various guesses were recorded on paper, and each placed in a separate envelope.-When the envelopes were opened and the pig weighed, it was found that Postmarer Fisher, J. Patterson, and J. M. Jackson were the winners, they having guessed the exact weight-680 pounds. The highest guess was 950 and the lowest

The wife of a Methodist preacher in Richmond, Ind., a few days ago teen inches wide, and about a foot deep. battered the head of an old German furnation so as to develope and stimulate Water was poured upon the lime, and a niture dealer with a piece of lumber, and the industries of the country rather than lid containing recesses for articles to be smashed his windows, because he insultto extract the life blood of every enter- cooked placed over the lime. Tea, coffee, ed her. She was arrested for this, and prise in this foolish struggle to make eggs, and beefsteak were then placed in on the examination before the mayor it transpired that the sensitive female, being ignorant of the German language, had misunderstood a word of friendly salutation for an insult; whereupon she had resorted to the measure already described to vindicate her claims to respect-

A Utica man has brought suit against a neighbor for a singular cause.-It seems the complainant had a wife, which of itself seemed sufficient cause for complaint. Well, this wife got ready to hang herself, when this neighbor rushed up and cut the rope. It is almost impossible to find a place where there are not meddlesome neighbors, who are always attending to other people's business.

BSA. There is a prarie in Arkansas covered with salt some three or four inches in depth. All about the sources of the Arkansas river are salt springs. In one place a crust of rock of solid salt has been formed over 160 acres of land .-The water of the springs near are so salt that if the hands are thrust into them, and suffered to dry in the air, they become as white as snow with incrustation.

Syracuse, N.Y., juries do not place a very high value on babies. Recently a four-year-old child was killed by the cars near that city, and the jury awarded the parents \$200. Later two bear cubs were killed by the cars, and the jury awarded the owner \$450 for each cub.

A wag of a fellow recently put a bottle of castor oil among some specimens of strained honey, at the California fair, and the committee thought, when they tasted of it, "Those were the queerest bees they ever saw.

A peculiar feature in each of the locomotives built for the Great Western, of Canada, is the placing of a bell in front of the engine, with gearing to the driving-wheel.

Granting Pensions to Officers, Soldiers, Sailors and their Widows of the War of 1812. The following are substantially its provis-

The First Section authorizes the placing on the pension roll all surviving officers, enlisted and drafted men, militia and volunteers, of the Naval or Military service of the United States, who served a period of Sixty Days in the war of 1812, and were honorably discharged. Also that other officers, personally named in any resolution of Congress, although their term of service may have been tess than sixty days, shall be placed upon the pension rolls. Soldiers and others who, at any time during the late rebellion, adhered to the cause of the enemies of the government, forfeit their pensions. All applicants for pension are required to take an oath to support the Constitution of the United States. The surviving veidoes of all such officers and enlisted and drafted men are entitled to pensions, provided that such widows shall have been married prior to the treaty of peace which terminated the war of 1812, and SHALL NOT HAVE RE-MARRIED. (The treaty of peace which terminated on the 17th of The First Section authorizes the placing or

SHALL NOT HAVE RE-MARRIED. (The treaty of peace was concluded on the 17th of February, 1815.)

The Second section provides that the Act shall not apply to any person who is receiving a pension at the rate of 85 per month, nor to any person receiving a less pension than 85 per month, except for the difference between the pension received and 85 per month. This section also provides that pensions under this act shall be 85 per month, to be paid from and after the passage of the act, and during the term of the pensioner's natural life.

The Third section provides that, before the name of any person shall be placed upon the pension rolls under the act, the proof shall be made under such rules as the Secretary of the Interior may prescribe, and that any person

made inder such rines as the secretary of the Interior may prescribe, and that any person who shall falsely take an oath required to be taken shall be deemed guilty of perjury, and his name stricken from the rolls. Also, that the loss of the soldier's discharge shall not deprise any person of the benefit of the provisions of the act.

CARSON'S

Stellar Oil!

THE alarming increase in the number of fright ful accidents, resulting in terrible deaths and the destruction of valuable property, caused by the indiscriminate use of oils, known under the name of petroleum, prompts us to call your special attention to an article which will, wherever USED, remove the CAUSE of such accidents.—We allude to

Carson's Stellar Oil

ILLUMINATING PURPOSES.

The proprietor of this Oil has for several years felt the necessity of providing for, and presenting to the public, as a substitute for the dangerous compounds which are sent broadcast over the country, an oil that is SAFE and BRILLIANT, and entirely reliable. After a long series of laborious and costly experiments, he has succeeded in providing, and now offers to the public, such a substitute in "CARSON'S STELLAR OIL." It should be used by every family,—

1ST, Because it is safe beyond a question. The

primary purpose in the preparation of STELLAR OIL has been to make it PERFECTLY SAFE, thus insuring the lives and property of those who

D. Because it is the most BRILLIANT liquid II tuminator now known.

ID, Because it is more economical, in the long run, than any of the dangerous offs and fluids now in too common use.

TH, Because it is intensely BRILLIANT, and therefore economical, giving the greatest possible light at the least expenditure to the consumer. Its present standard of SAFETY AND

BRILLIANCY will always be maintained,-for upon this the proprietor depends for sustaining the high reputation the STELLAR OIL now

To prevent the adulteration of this with the ex-plosive compounds now known under the name of kerosene, &c., &c., it is put up for family use in Five Gallon cans, each can being scaled, and stamped with the trade-mark of the proprietor; it cannot be tampered with between the manufac-turer and consumer. None is genuine without the TRADE-MARK.

STELLAR OIL is sold only by weight, each can containing five gallons of six and a half pounds each, thus securing to every purchaser full measure. It is the duty and interest of all dealers and consumers of illuminating oil to use the STELLAR OIL outs, because it alone is known to be safe and reliable.
