FARM AND HOUSEHOLD ITEMS

We invite communications from all persons who are interested in matters properly belonging to this department.

Dutch Cheese.

A correspondent wants to know how "Dutch Curds are made." We suppose this inquiry is concerning the make of what is known as cottage cheese...

The milk is allowed to sour and become loppered or thick, when it is gently heated, which facilitates the separation of the whey. The curds are then gathered up, salted, or otherwise, to suit the taste...

In summer some use large cans, having a spigot near the bottom; the sour milk is placed in these cans, and allowed to stand in the sun to thicken. The heat of the sun will be sufficient to separate the whey...

Sometimes this kind of cheese is potted and left to decompose, and when it has acquired a strong, villainous smell, it is regarded as most delicious by those who have acquired a taste for eating it in this state.

Whitewashing Trees.

Don't whitewash the bark upon fruit and ornamental trees. We are at a loss to know for what purpose some persons thus coat the bark of fruit and shade trees about their premises with lime...

How to do up Shirt Bosoms.

We have often heard ladies express a desire to know by what process the fine gloss observed on new linens, shirt bosoms, etc., is produced, and in order to gratify them, we subjoin the following recipe for making gum arabic starch...

A Valuable Recipe.

The Journal de St. Quintin publishes a recipe for curing cattle of the fermentation produced in their stomachs from eating green clover and other green food.

To Remove Stains.

To take the stain of any fruit from any fabric, put the garment in a vessel, pour boiling water over it, and let it stand till cool, then wash it and the stain is gone.

Animals require much water, varying according to size, food used, work done, and other circumstances. A horse requires eight gallons a day.

CONSUMPTION. ITS CURE AND ITS PREVENTIVE.

By J. H. SCHENCK, M. D. Many a human being has passed away for whose death there was no other reason than the neglect of known and indisputably proven means of cure.

DR. JOSEPH H. SCHENCK'S SIMPLE TREATMENT, and availed themselves of his wonderfully efficacious medicines, they would not have fallen. Dr. Schenck has in his own case proved that wherever sufficient vitality remains, that vitality, by his medicines and his directions for their use, is quickened into healthful vigor.

The sea-weed Tonic and Mandrake Pills are the first two weapons with which the citadel of the malady is assailed. Two-thirds of the cases of consumption originate in dyspepsia and a functionally deranged liver. With this condition the bronchial tubes "sympathize" with the stomach. They respond to the morbid action of the liver. Here then comes the commanding result, and the setting in, with all its distressing symptoms of CONSUMPTION.
