## Che Bloomfield Cimes.

Tuesday, December 5, 1871.

FARM AND HOUSEHOLD ITEMS

Pumpkin Ples.

Choose the best pumpkins that can be found. Take out the seeds, cut the rind carefully away, and then cut the pumpkin into thin and narrow bits. Stew over a moderate fire in a little water, just enough to keep the mass from burning, until soft. Turn off the water, if any remain, and let the putapkin steam over a slow fire about ten minutes. When sufficiently cooled, strain through a scive. Sweeten the pumpkin with sugar and a little molasses. The sugar and eggs should be beaten together. The flavoring requires gluger, the grated rind of a lemon or nutmeg, and salt. To one quart of pumpkin add one quart of milk and four eggs for ordinary

Heat the pumpkin scalding-hot before putting it upon the crust to bake, otherwise the crust will be soaked. Bake in a very hot oven. very hot oven.

Beets for Milch Cows.

There can be no doubt that the root crop is a most valuable auxiliary food for the late winter months and also during the winter and spring; and to one convicted of this the question will arise, which of all the various root crops, all things considered, is the best and most profitable to raise. Potatoes fatten, but do not add to the quantity or quality of the milk. The turnip furnishes a large amount of nutritious food, but has objections with some on account of the unpleasant flavor it imparts to the milk and butter. The carvot is highly esteemed; its cultivation however involves a great expense. But the sugar beet seems to possess many qualities that poentiarly fit it as a special crop for the winter feed of milch cows. Some, we are aware, do not think highly of it, but others-and among them the best known dairymen in the countryhave a contrary opinion.-Maine Farmer.

Paper Comfortables.

The mode of make comfortables warmer by lining them with newspapers, is good, as long as they last, which cannot be long, especially after washing a few times. I have tried a similar way of attaining the object on cold nights, when I have not had sufficient bedding over me, especially at hotels, where we cannot always get just what we want. Throw off one or two of the top covers from the bed' then pull from the pocket or satcliel, two or three large newspapers-one very large one will do spread them on the bed, replace the cover and you will have a warm and comfortable, night, without any perceptible increase in the weight of the bedding.

## Fattening.

The hunter knows that long before cold weather sets in, bears, deers beavers, muskrats and birds are all fat, and have not only their winter coat on their backs, but are well lined inside as a protection against the cold. If we would learn a lesson from this, we would hurry up our fat stock while they will naturally gain most rapidly, and get our stock generally into good condition, and shelter them well, now, before the extreme cold makes irreparable draughts on their system. The rule of the farmer should be like that of a good business man, to have means on hand to meet all drafts before they are due.

When Does a Lamb Become a Sheep.!

This question has been decided—according to law—in a suit which was lately brought against a railroad company for damages for killing thirteen sheep. It was contended that they were lambs; but the will naturally gain most rapidly, and get

contended that they were lambs; but the evidence sufficient to prove them sheep was not their age-which was fifteen monthsbut the fact that they had got their first pairs of teeth. So that a lamb becomes a sheep, legally, when it has its first permanent teeth.

With good feed and good care, one can have good animals. Calves must be kept growing the first winter. With plenty of water, good hay, and an occasional feed of roots, they will make large, handsome animals. Too many calves receive a stunt the first winter which they never get over afterward.

## Corn-Meal Rolls.

Make a kettle of corn meal mush. To two quarts of the mush add a teacup of unmelted lard sufficiently cool, and a cup of States. Assets over \$15,000,000 in each. yeast. Knead in flour till it is about the same as any other bread, and let it rise over night. In the morning roll out and bake in a moderate oven.

## Liniment.

No better liniment for bruises on man or beast was ever used than equal parts of laudanum, alchohol and oil of wormood. It reduces the swelling rapidly, if enflamed, and removes soreness like a chaim. The sconer applied of course the better.

To prevent cows from kicking buckle a strap tight around the cow back of the hips and in front of the udder, and she cannot kick.

New Advertisements THE CAUSE AND CURE OF

CONSUMPTIONS

THE primary cause of Consumption is derangement of the digestive organs. This
derangement produces dedicient attrition and
assimilation. By assimilation, I mean that
process by which the nutriment of the food is
converted into blood, and thence into the solids
of the body. Persons with digestion thus impaired, having the slightest predisposition to
pulmonary disease, or if they take cold, will be
very liable to have Consumption of the Lamps
in some of its forms; and I hold that it will be
impossible to cure any case of Consumption
without first restoring a good digestion and
healthy assimilation. The very first thing to
be done is to cleanse the stomach and bowels
from all diseased mucus and slime, which is
clogging these organs so that they cannot perform their functions, and then rouse up and
restore the liver to a healthy action. For this
purpose the surest and best remedy is Schenck's
Mandrake Pills. These Pills clean the stomach and bowels of all the dead and morbid
slime that is causing disease and decay in the
whole system. These will also out the liver of

Mandrake Filis. These Filis clean the stomach and bowels of all the dead and morbid slime that is causing disease and decay in the whole system. They will clear out the liver of all diseased bile that has accumulated there, and rouse it up to a new and healthy action, by which natural and healthy biles's secreted.

The stomach, bowels, and liver are thus cleansed by the use of Schenck's Mandrake Pills; but there remains in the stomach an excess of acid, the organ is torpid and the appetite poor. In the bowels the lasteals are weak, and requiring strength and support. It is in a condition like this that Schenck's Scaweed Tonic proves to be the most valuable remedy ever discovered. It is alkaline, and its use will neutralize all excess of acid, making the stomach sweet and fresh; it will give permanent tone to this important organ, and treatragood, hearty appetite, and prepare the system for the first process of good digostion, and, us timately make good, healthy, living blood—After this preparatory treatment, what remains to cure most case of Consamption is the free and persevering use of Schenk's Palmonic Syrup. The Pulmonic Syrup nourishes the system, parifies the blood, and is readily alisorbed into the circulation, and thence distributed to the diseased lungs. There it ripens all morbid matters, whether in the form of absects see or tubercles, and then assists Nature to expel all the diseased matter, in the form of recexpectoration, when once it ripens. It is then by the great healing and parylying peoperies of Schenk's Paimonic Syrup, that all ulcers and cavities are healed up sound, and my pattent is cured.

The essential thing to be done in curing Con-

essential thing to be done in curing Con-The essential thing to be done in curring con-sumption is to get up a good, appetite and a good digestion, so that the bady will grow in flesh and get strong. If a person has discused lungs—a cavity or abscess there—rhe cavity cannot heal, the matter cannot ripen so long as the system is below par. What is necessary to cure is a new order of things—a good appe-tite, a good nutrition, the bady to grow in flesh and get fat; then Nature is helped, the cavities will heal, the matter will ripen and be thrown off in large quanties, and the person will regain

and get fat; then Nature is helped, the cavities will heal, the matter will ripen and be thrown off in large quanties, and the person will regain health and sterength. This is the true and one ly plan to cure Consumption, and if a person is not entirely destroyed, or even if one lung is entirely gone, if there is enough vitality left in the other to heat up, there is hope.

I have seen many persons cured with only one sound lung, live land enjoy life to a good old age. This is what Schenek's Medicines will do to cure Consumption. They will clean out the stomach, sweeten and strengthen it, get up a good digestion, and give Nature the system of all the diseases that is in the lungs, whatever the form may be.

It is important that while using Schenek's Medicines, care should be exercised not to take cold: keep in-doors in cold and damp weather; avoid night air, and take out-door exercise only in a genial and warm sunshine:

I wish it distinctly understood that when I recommend a patient to be careful in regard to taking cold, while using my Medicines, I do so for a special reason. A man who has but partially recovered from the effects of a had cold is far more liable to a relapse than one who has been entirely cured; and it is precisely the same in regard to Cousamption. So long as the lungs are not perfectly licaled, just so long is their

been entirely circuit; and it is precisely the same in regard to Consumption. So long as the lungs are not perfectly licaled, just so long is there imminent danger of a full return of the disease. Hence it is that I so strenuously caution pulmonary patients against exposing themselves to an atmosphere that is not genial and pleasant. Confirmed Consumptives' lungs are a mass of sores, which the least change of atmosphere will inflame. The grand secret of my success with my Medicines consists in my ability to subdue inflammation instead of provokity to subdue inflammation instead of provoking it, as many of the faculty do. An inflamed

possession of my new building, at the North-cast Corner of Sixth and Arch Streets, where I shall be pleased to give advice to all who may

require it.

Full directions accompany all my Remedies, so that a person in any part of the world can be readily cured by a strict observance of the same.
