How to Make a Cheap Cellar-Bottom.

In sections of country where there is an abundance of cobble-stones, collect a few loads of stone about four or five inches in diameter, grade the bottom of the cellar, lay the cobbles in rows, and ram them down one-third of their thickness into the ground, so that they will not rock or be sunk below the line of rows by any heavy pressure, such as the weight of a hogshead of molasses or a tierce of vinegar. The bottom of the cellar should be graded so that the outside will be at least two inches lower than the middle. A mistake sometimes occurs by grading the cellar bottom in such a manner that the centre will be two or three inches lower than the outside, when, should water enter, it will flow directly towards the middle. A straightedged board should be placed on each row of stones as they are being laid, so that the upper side may be in line with each other. Afer the stones are laid, place a few boards on the stones to walk on; then make a grouting of clean sand and water lime, or Rosendale cement, and pour on the stones until all the interstices are filled. As soon as the grouting has set, spread a layer of good cement mortar one inch thick over the top of the pavement, and trowel the surface off smoothly. In order to spread the mortar true and even on the surfase, lay an inch board one foot from the wall on the surface of the pavement, stand on the board and fill the space with mortar even with the top of the board; after which, move the board one foot, fill the space with mortar and trowel it of smoothly. Such a floor will cost less than a board floor, and will endure as long as the superstructure is kept in repair.

A floor made in the foregoing manner on the ground in the basement of a barn, piggery, or a stable, would be rat-proof, and would be found cheaper and more serviceable than a plank floor. The work should be done in the former part of the growing season, so that the cement may have sufficient time to get dry and hard before cold

The Seventh Year Rainy Season

Mr. J. E. Hichcock, of Whitesville, Missouri, writes as follows to the editor of the Furm Journal. We submit without com-

"Would it not be well to draw your readers' attention to this year, 1872, as being the regular septennial rainy season? "Being forewarned is being forearmed." In 1858 I was farming in Illinois. We had some 40 acres of corn we could not cultivate at all. In 1845 I cultivated in the mud. No matter how many wet seasons intervene, we may surely prepare for an abundance of rain every seven years. Let all our farmers strive to get their corn ground ready for the seed early and plant while fresh, before the weeds have started. Then, perhaps, one good cultivation can be given the crop, which on new lands at least will give a fair yield. The great secret in raising a good crop of this important staple. (any season) lies in getting the plant started ahead of the weeds, when it is comparatively easy to cultivate properly.'

Pear Blight in New York.

At a late meeting of the Western New York Farmer's club, Mr. Quimby said be had noticed that the pear blight was more prevalent last year than common. It generally commeuced on the extremity of the limbs and was easily headed by cutting off the limb below the diseased part. If neglected the disease works down the limb to the body and soon destroys the tree. He had noticed that where limbs touched each other the disease was imparted. This would not be received as orthodox testimony in the west. True pear blight is not got rid of so easily.

La A standing antidote for poison by oak, ivy, etc., is to take a handful of quick lime, dissolve in water, let it stand half an hour, then paint the poisoned parts with it. Three or four applications will never fail to gure the most aggravated cases. Poison from boes, hornets, spider bites, etc., are instantly arrested by the application of equal parts of common salt and bicarbonate of soda, well rubbed on the place bitten or stung.

The following is the approved philosopby of preventing bens from scratching up the garden. Put gaffs or spurs on the hens, reverse them instead of the points up, have them pointed downward. Then when a hen lifts her leg to scratch, as it decends the point of the spur catches in the ground, placing the foot forward and a stroke with the other leg is attended with ike results, until the hen walks herself right out of the garden. If you don't believe it you can try it.

find its impurities bursting through the skin in Pimples, Eriptions, in Swess; cleause it when you find it obstructed and shuggish in the veins; cleanse it when it is foul, your feelings will tell you when. Keep the blood pure, and the health of the system will follow.

Grateful thousands proclaim Vientran Birrenss the most wonderful Invigorant that ever sustained the shiking system.

reas the most wonderful Invigorant that ever sustained the sinking system.

Pin, Tape, and other Worms, lurking in the system of so many thousands, are effectually destroyed and removed. Says a distinguished physiologist: There is scarcely an individual upon the face of the earth whose body is exempt from the presence of worms. It is not upon the healthy elements of the body that worms exist, but upon the diseased homors and alimy deposits that breed these living monsters of disease. No system of Medicine, no vermitages, no anthelminics, will free the system from worms like these Bitters.

No system of Menicine, to vermitages, no antielminics, will free the system from worms like these Bitters.

Mechanical Diseases. Persons engaged in Paints and Minerals, such as Plumbers, Type-setters, Gold-besters, and Miners, as they advance in life, will be subject to paralysis of the Boweis. To guard against this take a dose of Walker's Vinegas Bitters once or twice a week, as a Preventive.

Billous, Remittent, and Intermittent Povers, which are so prevalent in the valleys of our great rivers throughout the United States, especially those of the Mississuppi, Olio, Missouri, Illinois, Tennessee, Cumberland, Arkansas, Red, Colorado, Braros, Rio Grande, Pearl, Alabama, Mobile, Savamah, Rostiolic, James, and many others, with their vast tributaries, throughout our entire country during the Sommerand Autumn, and remarkably so during seasons of unusual heat and dryness, are invariably accompanied by extensive deraugements of the stomach and liver, and other abdomand viscera. There are always more or less obstructions of the liver, a weakness and irritable state of the stomach, and great torpor of the bowels, being clogged up with vitated accumulations. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to Dr. J. Walker's Viringas Bittrens, as they will speedily remove the dark-colored viscid matter with which the bowels are loaded, at the same time stimulating the secretions of the liver, and generally restoring the healthy functions of the digestive organs.

The properties of Dr. Walker's Vinegar flyttres are Aperient, Disphoretic and Carminative, Natritious, Lazative, Disphoretic and Carminative, Natritious, Lazative, Dispetic, Sedative, Counter-Irritant, Sudorine, Alterative, and Anti-Bilious.

The Aperleus and mild Lazative properties of Dr. Walker's Vinegar Bitters are the best safegard in all cases of eruptions and malignant fevers, their balsamic, healing, and soothing properties protect the humors of the fances. Their Sedative properties allay pain in the nervous system, stomach, and bowels, either from inflammation, wind, coile, cramps, etc. Their Counter-Irritant influence extends throughout the system. Their Diureus properties act on the Kidneys, correcting and regulating the flow of urine. Their Anti-Bilious properties simulate the liver, in the secretion of bile, and its discharges through the bilary ducts, and are superior to all remedial agents, for the cure of Bilious Ferox, Fever and Ague, etc.

Fortify the body against disease by purifying all its duids with Vinegar Bittrees. No enidemic can take hold of a system thus forcamed. The liver, the atomach, the loowing the kidneys, and the merces are remisered disease proof by this great savigorant.
